Acknowledgements and Credits

Alberta Report gratefully acknowledges the indispensable contribution of hundreds of citizens to this project, some of whom are listed below.

Individuals

Mrs. Marguerite Ahlf, Local Historian, Edson
Ralph Allman, Alberta Energy Resources Conservation Board, Calgary
Brian Andre, Addressing Technician, County of Strathcona
Mary Andrews, Local Historian, Banff
Judy Archie, Secretary-Manager, Leduc Chamber of Commerce
John Barr, Director of Public Affairs, Syncrude Canada Ltd., Edmonton
Mrs. Edith Bedy, Local Historian, Drayton Valley
Bill Bell, Local Historian, Leduc
P. Belley, Planning Department Secretary, Town of High River
Dorothy Bergos, Manager, Drumheller Chamber of Commerce
Willy Bogdan, Kelowna, B.C., former Director of Mapping, Alberta Bureau of Surveying and Mapping
Arlene Borgstede, Local Historian, St. Albert
Courtney Breckenridge, Director of Municipal Planning, County of Parkland
Henry Bruch, Planning Department, Municipal District of Rocky View
Brenda Bryce, Secretary, Sherwood Park Chamber of Commerce
Les Canning, Engineering Assistant, Town of Peace River
Alan Cassley, Senior Project Engineer, Pipeline Department, Energy Resources Conservation Board, Calgary
B. Charchun, Land Records/Surveys Officers, Alberta Region, Indian and Northern Affairs, Edmonton
Chris Clark, Photographer, Kelowna, B.C.
Ed Clarke, President, Capital Markets West, Ponoka
Jeanette Cook, Development Clerk, Municipal District of Sturgeon
Murray Cook, Local Historian, Peace River
Jean Cote, Canadian National Railways Historian, Edmonton
Patricia Craig, Photo Library Co-ordinator, Alberta Public Affairs Bureau, Edmonton
Robert Cundy, Executive Director, Red Deer Regional Planning Commission
Michael Dawe, Archivist, Red Deer District Museum and Archives
Hugh Dempsey, Chief Curator, Glenbow Museum, Calgary
William Dewan, Director of Public Relations, Canadian National Railways, Edmonton
T.C. Dick, Signing/marking Co-ordinator, Traffic Operations Division, City of Calgary
E. Dietrich, Technician, Red Deer Regional Planning Commission
Richard Dressler, R.S.D. Canadian Geographics Ltd., Edmonton
Mary Fitl, Information Officer, Alberta Recreation and Parks
Jane Flaherty, General Manager, Jasper Chamber of Commerce
Don Foulger, Government of Canada, Energy Mines and Resources, Ottawa
Ed Fox, Energy Resources Conservation Board, Calgary
A.M. Gibeault, Town Manager, Town of Morinville
Barb Giese, Secretary, County of Parkland
R.N. Giffen, Executive Director, Edmonton Metropolitan Regional Planning Commission
R. Bruce Goodwin, Executive Director, Prairie Provinces Water Board, Regina
Wayne Gordon, City Planner, City of St. Albert
K. Gwodz, Technician, Red Deer Regional Planning Commission
Brian Haley, Long Range Planning, City of Calgary
Dr. Stan Hambley, Local Historian, Camrose
Lesly A. Hanson, Manager, Stony Plain Chamber of Commerce
Dianne Harp, Community Relations Officer, City of Fort McMurray
Patrick Hart, Cartographer, City of Fort McMurray
E.G. (Ted) Hicks, Development Officer, Town of Edson
George K. Higa, Engineering Design Supervisor, City of Lethbridge
Barb Holub, Manager, Hinton Chamber of Commerce
Rob Honsberger, former Assistant City Commissioner, City of Lloydminster
Dennis N. Hoybak, Assistant Supervisor, Alberta Recreation and Parks, Edmonton
Gary L. Hudson, Development Officer, Town of Airdrie
Hiromi Ikemura, Senior Planning Technician, City of St. Albert
Ron Jacob, Planning Department, City of Calgary
Alex Johnston, Local Historian, Lethbridge
Marilyn Kan, Local Historian, Jasper
Gerry Keefe, Project Engineer, Town of Drayton Valley
Ed Kennedy, Executive Director, Alberta Bureau of Surveying and Mapping, Edmonton
Eugene Kletke, Assistant Director, Technical Services, Alberta Bureau of Surveying and Mapping, Edmonton
Mrs. Lilian Knupp, Local Historian, High River
John Kost, Manager, Town of Ponoka
Gerry Krish, Senior Marketing Consultant, Travel Alberta, Edmonton
Juliette Lafleur, Local Historian, St. Paul
Donelda Laing, Manager, Spruce Grove Chamber of Commerce
Clair Lamarre, Information Officer, Parks Canada, Calgary
Debbie Landis, Grande Prairie Chamber of Commerce
Maurice Landry, Director of Development & Engineering, Town of Brooks
Omer Lavallee, Historian, Canadian Pacific Railway, Montreal, Que.
Pat Lengyel, Secretary-Manager, Stettler and District Chamber of Commerce
Jean Lillie, Secretary-Treasurer, Vegreville District Chamber of Commerce
Colette Longhe, Tourism Assistant, Camrose Chamber of Commerce
Esther Lunan, Local Historian, Spruce Grove
D. Macdonald, Municipal Planning Director, Edmonton Metropolitan Regional Planning Commission
Perry Mah, Photographer, Edmonton
Jack Marsh, Mapping Branch, Alberta Energy and Natural Resources, Edmonton
Brian McFarlane, Area Supervisor, Energy Resources Conservation Board, Edmonton
Brian Miller, Public Affairs, Alberta Economic Development, Edmonton
Cheryl Mocan, Communications Co-ordinator, Calgary Transit
Arthur W. Murdoch, Assistant Provincial Archivist, Archives of Ontario, Toronto
Gunter Narquardt, Government of Canada, Energy Mines and Resources, Ottawa
Les Newman, Economics, Energy Resources Conservation Board, Calgary
Dave Oliphant, Manager, Medicine Hat Chamber of Commerce
Earl Olson, Director of Public Affairs, Canadian Pacific Railway, Calgary
Jim Orydsuk, Planning Department, City of Edmonton
Gill Oslund, Snell & Oslund Surveys (1979) Ltd., Red Deer
Sharon Pearce, Director of Communications, Alberta Bureau of Surveying and Mapping, Edmonton
Don Pearson, Gas Department, Energy Resources Conservation Board, Calgary
Kathryn A. Persson, Communications Co-ordinator, Heritage Park Society, Calgary
Lynda Pierce, Manager, Lloydminster Chamber of Commerce
Ken Pinoski, Development Officer, County of Leduc
Marguerite Playle, Local Historian, Drumheller
Linda Plumer, Secretary, Brooks Chamber of Commerce
Robert Popow, President, Lacombe Chamber of Commerce
Art Potvin, Alberta Agriculture, Irrigation Division, Lethbridge
Bruce Randall, Business Development Officer, City of St. Albert
Alex Rennie, Public Affairs, Canadian National Railways, Edmonton
Gordon Riddell, Planning Services Division, Alberta Municipal Affairs, Edmonton
I. Robinson, Executive Director, Calgary Regional Planning Commission
C.F. Schile, Local Government Administrator, Town of Taber
Fred Schulz, Alberta Transportation, Edmonton
Rita Sigvaldason, Secretary, Crowsnest Pass Chamber of Commerce
Mike Skakum, Regional Publishing and Printing Co-ordinator, Parks Canada, Calgary
Wayne Sorenson, Construction Programming Branch, Alberta Transportation, Edmonton
N. Sveinson, President, Innisfail Chamber of Commerce
G. Thomas, Chief Draftsman, Calgary Regional Planning Commission
W.H. Thrall, Director, Lands Membership and Estates, Indian and Northern Affairs Canada, Edmonton
Tom Tinkler, Creative Services, Alberta Public Affairs Bureau, Edmonton
John Trefanenko, St. Paul Chamber of Commerce
Henry Unrau, Local Historian, Sherwood Park
Bill Vander Meer, Engineering Department, City of Edmonton
Beckie Vogel, Office Supervisor, Banff Chamber of Commerce
Carl Von Einsiedel, Northern Pipeline Agency, Calgary
Robert J. Walker, Proofreader, Edmonton
Thomas Walls, Alberta Recreation and Parks, Edmonton
Marvin Weiss, Assistant Director, Provincial Mapping, Alberta Bureau of Surveying and Mapping, Edmonton
Ronald Whistance-Smith, Curator, University of Alberta Map Collection, Edmonton
I.L.E. White, Administrative Supervisor, Traffic Planning Section, City of Edmonton
Ken Williams, Regional Information Adviser, Indian and Northern Affairs Canada, Edmonton
Tom Willock, Director, Medicine Hat Museum and Art Gallery
Dr. L.J. (Roy) Wilson, Instructor, Medicine Hat College
W.L. Winger, Municipal Manager, Town of Whitecourt
Lorill Wingrave, Secretary-Manager, Wetaskiwin Chamber of Commerce
Mrs. C.R. Wood, Local Historian, Stony Plain
Libby Young, Local Historian, Lloydminster

How the atlas came about

That a magazine should produce an atlas is an idea that can make no claim to originality. In 1982 the *Reader's Digest* of Canada published a remarkably detailed Atlas of Canada. Prior to that, *Time* magazine came out with a competent Atlas of the World. Even an atlas of Alberta is not new. The University of Alberta turned out a fine volume in 1969. But the university, being an academic institution, produced what was in essence an academic atlas depicting the geophysics of the province, vital to research and learning, but not immediately useful to Albertans in their everyday lives. If a provincial news magazine is to produce a provincial atlas, I, its publisher, decided, it must be something like the news itself—pertinent to people's immediate needs, up-to-date, for many people indispensable. Great idea, said *Alberta Report*'s editors, but did I have the faintest idea of what I was undertaking? The answer after nearly two years finding out: No.

The atlas as we conceived it must be divided into three parts. First, there must be an historical section presenting maps of the province as it developed from its origins in the fur trade until now.

Second, and by far the most problematic, there must be what we considered a "bread and butter" section, showing detailed street maps of 39 Alberta cities and towns, locating every school, church, park, hospital, hotel or motel, shopping centre, bank, liquor store, post office, police station, grain elevator, all-night restaurant or service station, estate development, showing all streets and avenues and how they are numbered and which ones are one-way, showing details of the downtowns of both major cities, with every building over three storeys clearly identified, showing where the business, industrial and residential sections lie, showing railways and through highways, bridges, points of interest, in fact anything anyone would need to navigate with confidence through every urban area in Alberta.

Third, there must be a resource section, depicting the province's natural assets in a way most useful to the reader: national and provincial parks showing such things as hiking trails and campgrounds; a map showing the over 500 lakes and rivers of Alberta and how they drain to the ocean; maps of all the major oil and gas fields with detail on the size of each reserve, which company drilled the discovery well and when; similar maps of the oil and gas pipelines; maps showing the many passes through the Rocky Mountains, all but four of which have never been developed; instructional maps on such things as how to read an Alberta survey description; and finally, of course, maps showing the location of agricultural producing areas, where the various grains are grown, where livestock is raised.

Before undertaking such a project, *AR* initially consulted Edward A. Kennedy, executive director of the Alberta Bureau of Surveying and Mapping. The first and the third sections, he said, were well within the range of feasibility; the second would represent a massive undertaking since this much detail on the cities and towns had never to his knowledge been assembled. However, for the best advice on how to do it he directed us to Willy Bogdan, former director of mapping of the Alberta Bureau of Surveying and Mapping, now retired in Kelowna.

Mr. Bogdan's enthusiasm for the project was immediate. He flew to Edmonton and set out a method of producing the essential municipal maps for the second section. But we needed a determined man to run the project, he said, one who would not rest until it was finished. We found such a man on our own staff. Artist Derrick Sorochan joined the project as its production director in July of 1982 and supervised the preparation of almost every map in the book. He was assisted throughout the project by Linda A. Taylor. The artistic concepts are those of *AR* art director Jeanneke Sundland. Artist Tesoro DeGuzman Jr. laid out the pages and created the cover design.

What we lacked was what cartographers call "field information." It was all very well to announce we would include every church, but where were all the churches located? Where were the all-night service stations? Where precisely were all the hotels and banks? We pondered a half dozen ways of having the information gathered for us and found that nothing worked, but to go out and get it ourselves. This of course, entailed a street-by-street survey of every municipality in Alberta with a population over 4,900. Who could be found for this?

The answer came in two people. Victor Beranek, recently arrived from Poland where he had run a driving school, was a man with a gift for accuracy and a need for a job. Thomas Byfield, then 17, who has been a member of the Byfield family since he was about four weeks old, had inherited from his Indian forebears an uncanny sense of direction and location. Together over the period of about nine months they tracked the province—an odd team, the stocky young Indian, notebook and work maps in hand, the erect and dignified European pointing out data that the maps must contain. Meanwhile, as their information began pouring back to the tiny room at *AR*'s head offices, Mr.

Clockwise from upper right: Production Manager Sorochan, the Survey and Mapping Bureau's Kennedy, field workers Byfield and Beranek, cartographer Bogdan, artist Taylor.

Sorochan had hired another three staff artists to work it into the blank maps the province had provided and three more people to check each location, first against the field work, then against such sources as telephone books and city directories. Slowly all the municipal maps that appear in this volume took shape.

But even then, was the information really correct? To provide yet another check on it, *AR* circulation manager Keith Bennett sent the completed maps to chambers of commerce throughout Alberta. Map checkers were hired at Edmonton and Calgary to go over all the streets again. Downtown maps were checked by Miss Taylor and by *AR* staffers at Calgary. Even taxicab companies were consulted to see if their drivers could find errors. And from all these sources little errors continued to be found. Streets that had been slated for development were not yet there. This bank branch had closed and another opened. The problem is, of course, that a map is a static thing and a city is never static. It constantly changes.

In the meantime, Ronald Whistance-Smith, director of the University of Alberta's map collection, had with the Glenbow Foundation and the Canadian Pacific Railway helped us to assemble the collection of maps in the historical section. The Energy Resources Conservation Board, Parks Canada, various agencies of the provincial government, and Donald Brown, a professional cartographer, had provided the maps appearing in the resource section.

By the fall of 1983 we concluded that the work was as accurate as we could make it, and the time had come to bring the job to a conclusion. We are grateful for the help of hundreds of people, some of whom are identified on page 3. Whether the work is a success, however, only you, the reader, can decide.

Ted Byfield
Publisher
Alberta Report

How to use the atlas

How to find:

- **A church, school, hotel, point of interest, or named street or avenue in Edmonton;**
  Turn to the Edmonton general index on pages 34 and 35. Find the sought-for subject in the appropriate list. Turn to the denoted page. Check the square indicated by the grid numbers for the subject. Churches are indicated thus ♟, schools thus ⌂, hotels thus □, points of interest thus ✱. (Example: To find the Riviera Hotel in Edmonton, look under hotels on page 34. The Riviera is listed as 13,C4,50. Turn to page 50. Look in square C4 for 13.)
- **A specific building in downtown Edmonton;**
  Turn to page 47. Look it up in the list of downtown buildings. Search the square indicated by the grid numbers for the building you're looking for whose name will be spelled out on the map. (Nearly all buildings over three storeys are shown.)
- **A specific building at the University of Alberta;**
  Turn to page 48. Look it up in the list of university buildings. Search the square indicated by the grid numbers for the building you're looking for whose name will be spelled out on the map.
- **A church, school, hotel, point of interest or named street or avenue in Calgary;**
  Turn to the Calgary general index on pages 72 and 73. Find the sought-for subject in the appropriate list. Turn to the denoted page. Check the square indicated by the grid numbers for the subject. Churches are indicated thus ♟, schools thus ⌂, hotels thus □, points of interest thus ✱. (Example: To find the Highlander Motor Hotel in Calgary, look under hotels on page 73. The Highlander is listed as 18, E2, 79. Turn to page 79. Look in square E2 for 18.)
- **A specific building in downtown Calgary;**
  Turn to pages 82 and 83. Look it up on the list of downtown buildings. Search the square indicated by the grid numbers for the building you're looking for whose name will be spelled out on the map. (Nearly all buildings over three storeys are shown.)
- **A specific building at the University of Calgary;**
  Turn to page 81. Look it up in the list of university buildings. Search the square indicated by the grid numbers for the building you're looking for whose name will be spelled out on the map.
- **A church, school, hotel or point of interest in any Alberta city or town over 4,900 population other than Calgary or Edmonton;**
  See the Municipal Map Index below. Turn to the map of the city or town. The symbols and grid numbers for the churches, schools, hotels and points of interest are given in the legend beside the map. (Indexes are also provided for the named streets and avenues of the city of St. Albert, and Sherwood Park.)
- **The location and population of any town in Alberta;**
  Turn to pages 26 and 27. Look up the name of the town in the gazetteer. Turn to the page and grid numbers indicated. Search the given square for the town. Its population is carried behind its name in the gazetteer.
- **A given neighbourhood in Calgary or Edmonton;**
  The names of the neighbourhood subdivisions of Edmonton are carried on the map on page 33. Those in Calgary are on page 71.
- **The location of an Alberta Indian reserve or Metis settlement;**
  The Indian reserves are on page 131, the Metis settlements on page 135.
- **A county or municipal district in Alberta;**
  Counties and municipal districts are listed by number on page 25, and shown on the accompanying map. The population and county seat is also shown.
- **The distance between Alberta centres:**
  A road distance table in miles and kilometres is given on the outside endsheet inside the back cover.
- **The identification of a school, church, hotel, or point of interest that you see on a map;**
  Check the legend that accompanies each map or the general legend at right for the meaning of the symbol. The number will identify the specific building.

Table of Contents

The *Atlas of Alberta* is divided into three sections:

How Alberta Developed which shows the history of the province in maps from those of the earliest fur traders to maps of the cities at various stages of their growth. Pages 8-23.

Alberta Today which consists of contemporary maps of the province in the 1980s including highly detailed renderings of its 39 biggest cities and towns. Population and location data, transportation facilities and a brief history are included for each municipality shown. Pages 24-141.

Resources of Alberta which shows in map form the province's natural assets, both renewable and non-renewable. Pages 142 to 160.

A View of Alberta ____ **Inside front cover**
This photograph was taken of a relief map of Alberta originally constructed in wood under the direction of Mr. Willy Bogdan, former director of mapping with the Alberta Bureau of Surveying and Mapping. It was on a scale of 1" equals 8 miles. Some 1,500 copies of it were later made in fibreglass for public schools and numerous public buildings. The photograph is by Perry Mah.

Alberta Compared ____ **Frontpiece**
Alberta is contrasted in scale with Great Britain, California and Ontario.

Provincial Symbols ____ **Frontpiece**
The provincial coat of arms, the wild rose, the great horned own and the mace are depicted on a background of the Alberta tartan.

Acknowledgements and Credits ____ 3

How the Atlas was Produced ____ 4
A project that was expected to take only a few months wound up taking more than 18, but the result is something unique to the province of Alberta.

How to use the Atlas ____ 5
The *Atlas of Alberta* can serve many purposes for anyone travelling within cities or between cities in the province. Here are specific instructions on how to get the most efficient use out of it.

How Alberta developed

A History of Map-making in Alberta ____ 8
From the first elementary sketches of the earliest fur traders, through the amazing accomplishments of David Thompson and the Dominion Land Survey to the sophistications of modern electronically aided cartography, Ronald Whistance-Smith, map curator of the University of Alberta, tells how map making developed in our province.

The Earliest Known Maps ____ 9
Alberta's first closest-to-accurate map-making was done by two early partners of the North West Company, Peter Pond and Sir Alexander Mackenzie. The former mapped sections of what are now the Clearwater River and Lake Athabasca, founding in the process Fort Chipewyan. The latter traversed the northern part of the province en route to the Pacific. The Alberta sections of their mapped records are shown.

The Astonishing Map of David Thompson ____ 10-11
A North West Company partner, his Metis wife, and their children travelled by canoe and dogsled across western Canada and the northwestern United States to provide the first detailed rendering of that vast area. Its accuracy amazes geographers to this day. Thompson's whole map is shown and a "blow-up" of the Alberta portion with the map of modern Alberta overlaid for comparison.

The Empire of the Fur Trades ____ 12
After its union with the North West Company in 1821, the HBC ruled the West from scores of scattered fur trading posts. The map shows those that were located in Alberta both before and after the union of the companies.

The Changing Political Boundaries of the West ____ 13
From the earliest institutions of the white man western Canada has known five former systems of political boundaries. The five are shown.

The Original Plan for the Canadian Pacific ____ 14
The coming of the railroad in the last two decades of the 19th century began the development of modern Alberta. But if the Canadian Pacific's Sir Sandford Fleming had had his way, the modern province would have looked very different. Here is his plan for the CPR which would have taken it through Edmonton and the Yellowhead Pass, rather than Calgary and the Kicking Horse.

The First Roads ____ 15
These early patrol trails taken by the Royal North West Mounted Police in what is now southern Alberta were in effect the province's first road system.

1905—The New Province ____ 16
This is an adaptation of the first known map of Alberta (The township boundaries have been removed to improve clarity.) A few roads have been developed and settlement is largely restricted to the area of the Canadian Pacific mainline and the Calgary-Edmonton corridor.

The Settlements Take Root ____ 17
Here are some of the first known maps of Lethbridge, Red Deer and Medicine Hat.

Edmonton at Two Stages ____ 18-19
Maps made in 1882 and 1911 show the captial, first as it emerged from its long history as a fur trading station, then on the eve of its merger with the City of Strathcona, its neighbour across the river. Also shown is a map of the Fort Edmonton Park area which has reconstructed life in the capital city at various stages of its development.

Calgary on the Brink of Two Booms ____ 20-21
Calgary's development nearly all occurred in two great booms, one three decades before the First World War, the other one decade following the Second. The maps show the city as it looked prior to each, in 1883 and 1955.

The Coal Mine Map of Edmonton ____ 22
Edmonton's second major industry was the mining of coal and even today the workings of old coal mines underlie much of the modern city. This map and cross-section sketch show where they are located.

The Turner Valley Oil Strike ____ 23
Alberta's oil industry was born at Turner Valley, just south of Calgary. This map of the early properties leased for development in the area lists Alberta's original oil companies. Few of the names are recognizable today.

Alberta Today

Alberta—The Province ____ 24
A survey of the province's geography, climate, people, economy, government and transportation. Also included are two maps showing distances and driving times from Alberta to major cities throughout North America and the distance to major cities of the world.

Rural Municipalities ____ 25
This map shows all of the counties, municipal districts and improvement districts in the province with an accompanying list of their seats of government and populations.

The Province as a Whole ____ 26-31
In this map showing Alberta's cities, towns, villages, hamlets, highways and railways, the province is divided into five segments for greater clarity.

Gazetteer of Alberta ____ 26-27
An alphabetical list of all cities, towns, villages and hamlets indicates their position on the map and gives their populations.

Edmonton—How It Developed ____ 32
This map shows the progressive annexation by Edmonton of its neighbouring communities, giving the year, name and physical size of each annexed area.

Edmonton—Its neighbourhoods and Subdivisions ____ 33
All sections within the capital city have community names. This map locates and names them.

Edmonton—General Index ____ 34-35
Listed are all the named streets in the capital city, all the schools, churches, hotels and points of interest with references giving their location on the maps that follow.

Edmonton Key Map—Wards and Telephone Exchanges ____ 35
Besides showing the way the city has been segmented in the maps that follow, this key map shows the ward boundaries for aldermanic elections, and how the first three digits of a telephone number reveal from what part of the city the call came.

Edmonton in Detail ____ 36-55
The city has been divided into ten segments. How they fit together is shown on the key map on page 35, and each segment map carries a key map to locate that segment in the city as a whole.

Edmonton Downtown ____ 47
This map shows nearly all buildings in the downtown area over three storeys in height.

Edmonton—The University of Alberta ____ 48
This map locates all buildings, roads and footpaths in the campus area.

Edmonton—Old Strathcona ____ 49
This map details historic buildings being preserved in the central area of the former city of Strathcona on modern Edmonton's southside.

Greater Edmonton ____ 56-59
Four maps give the major buildings, industrial sites, estate developments and named roads in the bordering areas up to 15 miles beyond the city limits. They are segmented into northwest, northeast, southwest and southeast zones.

Fort Saskatchewan ____ 60-61

Leduc ____ 62-63

Sherwood Park ____ 64

Named Streets of Sherwood Park and St. Albert ____ 65

St. Albert ____ 66-67

Spruce Grove ____ 68

Stony Plain ____ 69

Calgary—Its System of Wards and How the City Grew ____ 70
The map shows the progressive annexation by Calgary of its neighbouring communities, giving the year and physical size of each area annexed. It also shows ward boundaries for aldermanic elections.

Calgary Key Map and Calgary Neighbourhoods ____ 71
The map shows how the city has been segmented in the detailed maps that follow. It also identifies the names and location of Calgary's many neighbourhoods.

Calgary—General Index ____ 72-73
Listed are all the named streets in Calgary, all the schools, churches, hotels and points of interest with references giving their location on the maps that follow.

Calgary in Detail ____ 74-92
The city has been divided into nine segments. How they fit together is shown on the key map on page 71, and each segment carries a key map to locate that segment in the city as a whole.

Calgary—The University ____ 81
Map locates all buildings and roads in the campus area.

Calgary Downtown ____ 82-83
This map show nearly all buildings in the downtown area over three storeys in height.

Greater Calgary ____ 93-96
Four maps give the major buildings, industrial sites, estate developments and named roads in the bordering areas up to 15 miles beyond urban development. They are segmented into northwest, northeast, southwest and southeast zones.

Airdrie ____ 97

Fort McMurray ____ 98-99

Grande Prairie ____ 100-101

Lethbridge ____ 102-104

Irrigation System ____ 104-105
A map showing southern Alberta's irrigation system including the 13 districts, reservoirs and main canals.

Medicine Hat ____ 105-107

Red Deer ____ 108-109

Banff ____ 110

Brooks ____ 111

Camrose ____ 112-113

Crowsnest Pass ____ 114-116
Bellevue 114; Hillcrest Mines 114; Blairmore 115; Frank 115; Coleman 116.

Drayton Valley ____ 117

Drumheller ____ 118-119

Edson ____ 120-121

Hinton ____ 122-123

Elevation Profiles of the Yellowhead and Trans-Canada Highways ____ 123
The elevations reached by two major routes across the province are compared in these drawings.

High River ____ 124

Innisfail ____ 125

Jasper ____ 126

Lacombe ____ 127

Lloydminster ____ 128-129

Morinville ____ 130

Indian Reserves of Alberta ____ 131
The map gives the location of Alberta's 92 Indian reserves, and defines the boundaries of each of three treaties that were signed with the native peoples.

Peace River ____ 132-133

Ponoka ____ 134

St. Paul ____ 135

Metis Settlements of Alberta ____ 135
Specific settlements for Metis people were worked out following the Riel rebellion. Map locates the six that survive today.

Stettler ____ 136

Taber ____ 137

Vegreville ____ 138

Wetaskiwin ____ 139

Whitecourt ____ 140-141

The Resources of Alberta

What They are and What Each Contributes ____ 142
An outline of the natural resources so far discovered in Alberta with a chart comparing how much each contributes to the gross provincial product.

The Oil Fields of Alberta ____ 143
The map shows all the major fields, the estimated recoverable reserve at the time of discovery, which company drilled the discovery well and when.

The Oil Pipelines of Alberta ____ 144
The map shows the terminus of each and the company that operates it.

The Gas Pipelines of Alberta ____ 145
The map shows the terminus of each and the company that operates it.

The Gas Fields of Alberta ____ 146
The map shows all the major fields, the estimated recoverable reserve at the time of discovery, which company drilled the discovery well and when.

Resources of Alberta ____ 147
Maps depicting location and types of coal deposits, coal mines, mineral deposits, forest management areas, pulp mills and sawmills, forest yields, bedrock geology and soil types.

The Crops of Alberta ____ 148
Six maps of the province show the areas of greater and lesser intensity of acreage seeded to barley, wheat, canola, tame hay, rye and oats.

Livestock of Alberta ____ 149
Five maps of Alberta define the intensity of cattle, hogs, dairy cows, sheep and lambs and poultry. A sixth map locates greenhouse concentrations throughout the province.

Passes through the Rocky Mountains ____ 150-151
Highway and railway development has occurred in only four passes through the Rockies—the Crowsnest, the Kicking Horse, the Yellowhead and the Pine. In fact, there are 79 more. These two maps locate them all and the highest of the peaks that overlook them.

The National and Provincial Parks ____ 152-156
Factual information is given on the public parks system of Alberta in a preamble, followed by detailed maps of three national and one provincial park. The maps show trails and campgrounds.

Waterton National Park ____ 152

Banff National Park ____ 153

Jasper National Park ____ 154

Kananaskis Provincial Park ____ 155
Map also includes Kananaskis Country.

Provincial Parks across the Province ____ 156
Map locates the provincial government's 61 parks scattered throughout Alberta.

How to Read an Alberta Survey Description ____ 157
The Dominion Land Survey system which defines property boundaries throughout the province and is the basis of legal descriptions of nearly every parcel of land, whether rural, residential or commercial, is described with accompanying maps.

Lakes, River and Water Basins of Alberta ____ 158-159
The map locates every one of Alberta's 519 lakes and rivers, dividing them into the province's four watersheds, those drained into the sea by the Mackenzie, the Churchill, the Nelson and the Mississippi Rivers. An accompanying map shows their relative waterflow.

Climate in Alberta ____ 160
Eight maps show Alberta's weather zones, intensity of sunshine throughout the province, average number of frost-free days, distribution of snowfall, year-round precipitation and mean temperature zones.

Alberta's Electoral Districts ____ **Outside endsheet**
Boundaries of provincial constituencies are given for the whole province with expanded maps for Edmonton and Calgary.

Mileage Chart ____ **Inside back cover**
Mileages between Alberta cities and towns is given in both miles and kilometres. Accompanying map shows the highways throughout the province.

The map of Alberta is never complete

by Ronald Whistance-Smith

If our civilization did not already possess the idea of the map, someone would surely invent it—and quickly. It is so basic a tool in understanding one's surroundings, and so rapidly conveys this understanding to others. But in fact it was invented a very long time ago. Five-thousand-year-old maps on clay tablets, both regional and "world," have been found in the Tigris-Euphrates region, and other early ones on Italian cave walls, on the bottom of Egyptian coffins, and on various pieces of bone. In the South Pacific, pre-literate Marshall Islanders created maps from the centre ribs of palm leaves lashed together with fibre cord. The ribs form a pattern representing the waves as deflected by islands, with the islands themselves denoted by shells or coral fastened to the ribs. A trained native navigator reads the pattern of main swells set up by the Trade Winds and the secondary cross swells resulting from deflection. Animal skins were much used in Europe, both before and after the invention of paper. Many early navigational charts drawn on sheepskin or parchment were able to withstand the rigours of sea travel.

Indian map makers in northwestern North America also used animal skin (deer, beaver and bear); these, and native guides, were of no small help to the first European arrivals in constructing their own maps of the continent's vast interior. The newcomers had rudimentary compasses to assist them in establishing direction, and they estimated distances between points on the basis of the time it took to travel between them. Indian map makers, apparently lacking the compass, nevertheless seem to have had a remarkable ability to portray in proper perspective the territory over which they roamed.

Henry Kelsey was the first European, so far as we know, to reach what we call Alberta. A Hudson's Bay Company employee, he was sent into the western interior in 1684 to convince the plains Indians that they should bring their furs to the English on Hudson Bay rather than to the French around Lake Superior. Explorer Kelsey produced no map of his journey (though so far as we know he made it back to his post without getting lost), but his reports convinced his superiors of the need for mapping the interior.

Courtesy of the Provincial Archives of Alberta

Dominion land surveyors in western Canada, late 1800s or early 1900s

The first maps to show reasonable estimates of the longitude of the west coast of North America had appeared in the mid-16th century, but many continued to depict a greatly exaggerated western extension north of the Spanish explorations. Some cartographers showed the inlet of the Strait of Juan de Fuca leading to a great inland sea, sometimes extending this body of water well into present-day Alberta and labelling it the "Great Sea of the West" or "Mer de l'Ouest." Others, not so sure, simply wrote (in French or English) "It be not known whether this be land or water."

Such maps were being published right up until the 1760s. Though accurate latitudinal information, which required just the basic survey equipment of the time—a sextant or quadrant—was fairly common by then, establishment of longitude was much more difficult. In 1789, however, a talented Hudson's Bay Company surveyor named Philip Turnor set out for the Lake Athabasca country, accompanied by an apprentice named Peter Fidler. Another HBC apprentice, one David Thompson, was to have gone too. But he broke his leg while hauling firewood at the post, an injury which was to plague him through many of his later illustrious years as the premier mapper of the West. (See article, page 10.) During this trip, in 1791, Turnor established the longitude of Fort Chipewyan, to calculate the distance between this post and Hudson's Bay. The following year, Captain George Vancouver established the longitude of Nootka Sound and other parts of the west coast, thereby enabling distance calculations between the interior and the coast.

Meanwhile intrepid voyagers had been filling in many of the details. The Chevalier de La Verendrye as early as 1729-30 had been collecting maps and information both from the Indians and the French coureurs de bois, which were combined at Quebec into a map extending from Lake of the Woods as far west as the Rockies. La Verendrye and his sons in 1731 embarked westward from Lake Nipigon, north of Lake Superior, to found new fur trade posts and gather still more information. They did not reach Alberta, but one son, Pierre, had a group of Indians produce a map of the country west of the Red River, showing lakes, rivers and heights of land; another La Verendrye son, Francois, is credited with the discovery of the Saskatchewan River in 1749.

For its part, the Hudson's Bay Company, seeking to combat the French incursion, in 1754 sent Anthony Henday into the interior. His job was to persuade the Indians to bring their furs to the English on the Bay rather than to the French around Lake Superior. The HBC, although it realized the need for maps in its fur trade operations, was not so committed to exploration and survey in general as some thought it should be. Other expeditions were only carried out under pressure from the government hydrographer in London. In any event, Henday in this instance reached what we now call Rocky Mountain House, and the information he brought back would have found its way on to HBC maps. So did data from the diaries kept by the factors of all the scattered trading posts. So indeed did the discoveries recorded and published by competing Montreal fur traders like the La Verendryes, like Connecticut Yankee trader Peter Pond who made maps of western Canada between 1785 and 1790 (some of them produced for prominent Americans like the president of Harvard University to support Pond's arguments for increased U.S. involvement in the area), and like former HBC apprentice David Thompson after he was appointed "Surveyor and Map Maker" by the rival company in 1797.

Official HBC map maker Aaron Arrowsmith in London published his first map of North America, the British territories and the northern U.S., in four sheets in 1795. By 1802 he was able to issue an enlarged, six-sheet edition including the rest of the U.S. Succeeding editions of the Arrowsmith map—about a score of them between 1795 and 1850—incorporated not only the work of HBC and North West Company explorers but copied information from the maps of the American Lewis and Clark expedition and that of Zebulon Pike. Nevertheless in the late 1850s, when governments began the work of evaluating Rupert's Land for possible purchase from the Hudson's Bay Company, David Thompson's map of the country that stretches from Hudson Bay to the Fraser River in the north, and from Sault Ste. Marie to the mouth of the Columbia in the south, was considered the best available. (It is said in fact that as late as 1915 many maps published by the Canadian government, by railways and other agencies, were based on the cartographic work performed by David Thompson one hundred years earlier.) The survey which next entered present-day Alberta, to evaluate the country in terms of suitability for settlement, was the famous expedition led by Captain John Palliser. The observations of its medical doctor, geologist and naturalist, Dr. James Hector, delineated the "fertile belt" on the northern fringe of the more arid prairie and the three steppes of the western interior, and led to the definition of the "Palliser Triangle" in southwestern Saskatchewan and southeastern Alberta. Dr. Hector is also credited with discovery of the Kicking Horse Pass; indeed it was he who was kicked in the head there by his horse.

The maps prepared by the British War Office from field sketches by Captain Palliser, Dr. Hector and expedition botanist Eugene Borgeau set the stage for more detailed Alberta surveys some 25 years later, when settlement began to warrant them. By then, the surveyors had been the direct cause of the first of the two Riel Rebellions, the one at Red River in 1869, sparked when advance survey parties arrived on the Metis lands. The full western survey of a square township grid pattern actually began on the prairies in Manitoba in 1871, four years after Confederation and a year after the transfer of Rupert's Land to Canada. By the early 1880s township maps at a scale of one inch to one-half mile (1:31,680) began to appear. The more refined instruments by then available resulted in maps which, if they lost much of the old romance and beauty, gained much more in detail and accuracy.

The first of the Alberta township maps was of the Edmonton area, published in 1881. More were gradually produced, always of the settled areas, in two series of sectional maps, one at a scale of one inch to three miles, the other at one inch to six miles. They indicated relief by a series of short pen strokes called hachures, by form lines, and later by contours (lines joining points of equal height above sea level). The first attempt to provide systematic map coverage of Canada, they continued in circulation until the early 1950s when a federal 4" = 1 mile series, based on aerial photos, covered the prairies.

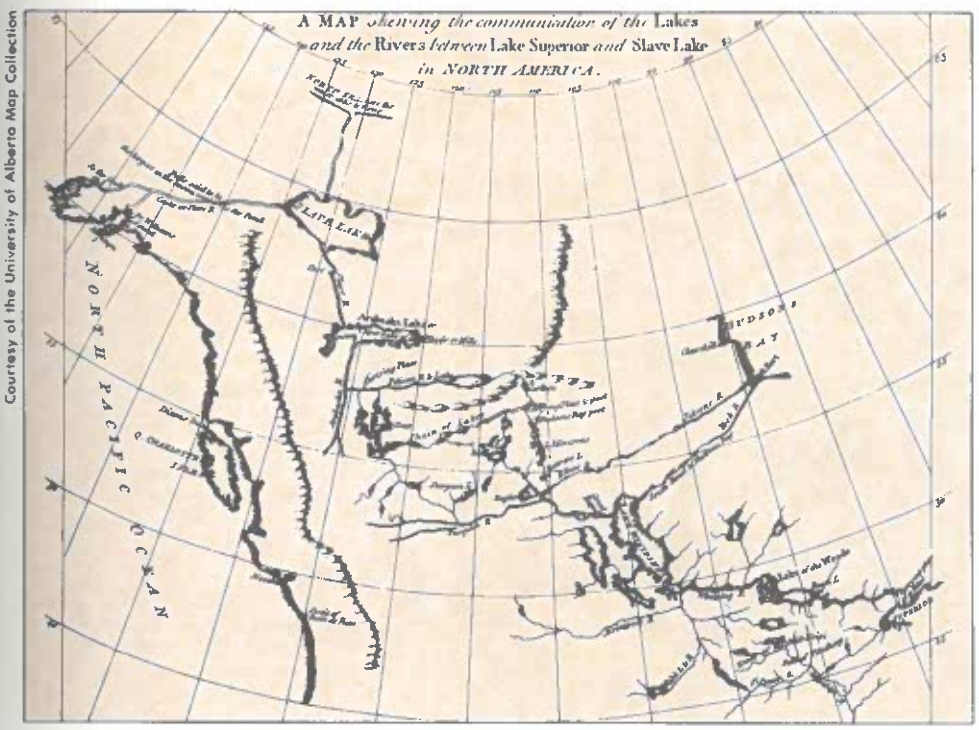
Since the frontier of settlement is still advancing in Alberta, new townships are always being surveyed and new roads built. Besides, old surveys are continually being checked and the geodetic network, the base to which all surveys are tied, is constantly being refined. The modern surveyor has electronic measuring equipment, satellites which can tell him his exact position on the earth regardless of weather, calculators to speed his conclusions, and computers which will store myriad information and then produce from it a map of a given area on a given scale. The computer, using data received from satellites, can indeed be called upon to show relative soil moisture patterns, vegetation types, diseased vegetation, crop patterns, cloud patterns, or any other patterns.

Map making has come a long, long way—but the satellite maps still serve the same purpose as the palm frond wave patterns, or the clay tablets of the Euphrates, or the Cree deerhide depiction . . . They help us form an image of our surroundings; they help us find our way; and they satisfy a need to know.

Ronald Whistance-Smith is curator of the University of Alberta Map Collection

The earliest maps

The earliest maps of that section of the world's surface that would one day become known as Alberta were produced by fur traders who had to first penetrate and then cross the province's northern regions in their search for a river passage across the continent. Before there was an Edmonton therefore, and long before there was a Calgary, a fur station had been established at Fort Chipewyan in the province's northeastern sector, a key point on a trade route that was soon to be channelling fur east and goods west along the rivers that border the Canadian Shield. The two maps on this page are among the earliest on which recognizable geographic features of modern Alberta begin to appear.



Courtesy of the University of Alberta Map Collection

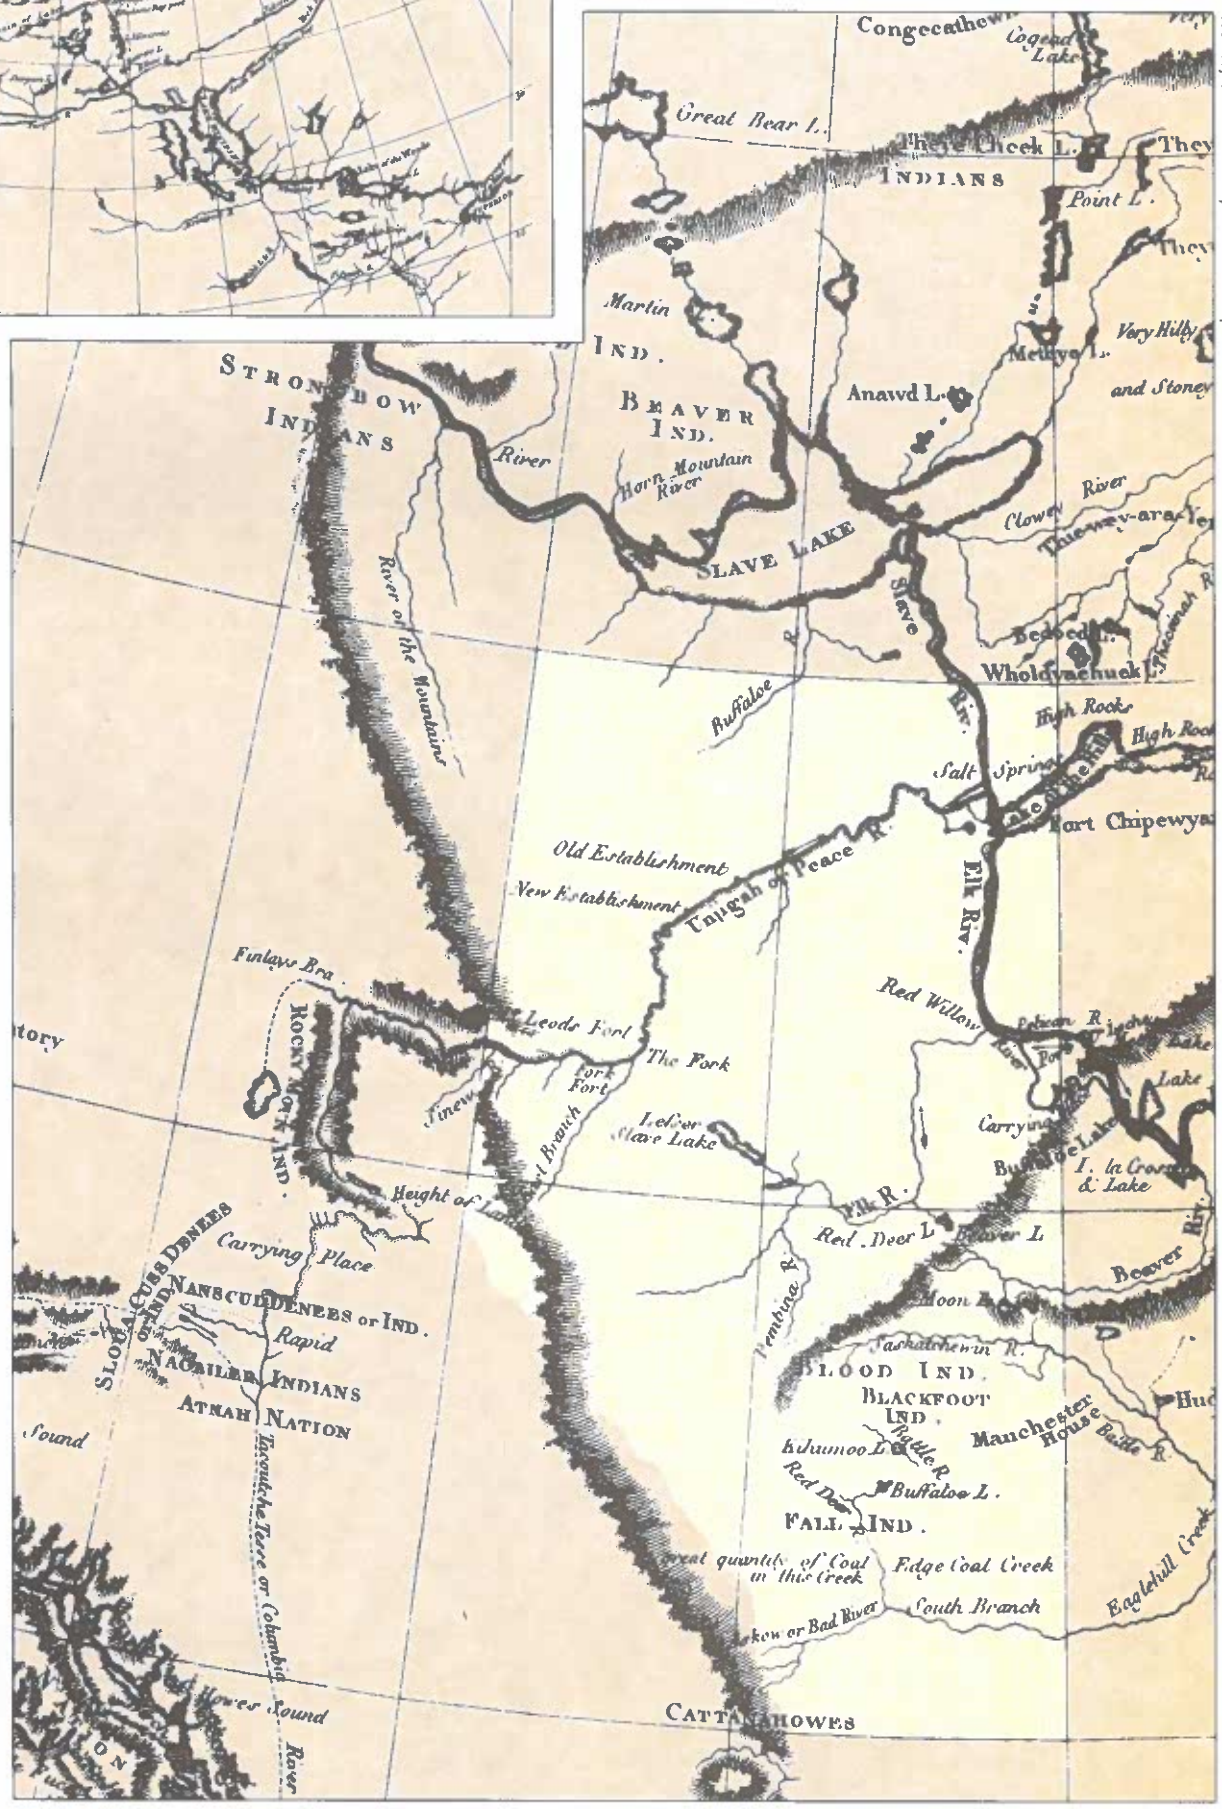
The map above was prepared by Peter Pond, an American fur trader who had moved into Montreal shortly after the British captured it from the French. Like others who would follow through the centuries, he was a born promoter of western possibilities, and Pond's original version of this map he is said to have scrawled in a Quebec bar as he drummed up investment capital for his fur trade ventures in the Athabasca region.

Pond, however, was leaning largely on hearsay from the Indians as the map demonstrates. He believed, for instance, that a river drained great Slave westward to the Pacific. He called it "Cooks or Slave River," and it was said to plunge over a waterfall that is "the largest in the world."

He told his plans to a Dr. P. Doddridge, who relayed them to a friend in London, adding: "Another man, by the name of M'Kenzie, was left by Pond at Slave Lake with orders to go down the (Cook's) River, and from thence to Unalaska, and so to Kamchatka, and thence to England, through Russia, &c. If he meets with no accident, you may have him with you next year . . ."

This was the limit of Pond's achievements and his subsequent involvement in two murders forced the Nor'Westers to discredit him. But the "M'Kenzie" mentioned was, of course, Sir Alexander Mackenzie who followed "Cook's River" to its actual mouth on the Arctic Ocean and, since it wasn't the Pacific, termed it "the River of Disappointment." Today it bears his name. In a subsequent voyage up the Peace and over into the upper reaches of the Fraser he did find a route to the Pacific.

His travels bequeathed to posterity the map at the right, a portion of his full rendering of northern North America as it was known at that time. Modern Alberta is shown in outline. Certain observations of Alberta have already been made—the coal deposits in the southwest have been noted; the Red Deer, Battle, Beaver and Peace Rivers have been named, as have both branches of the Saskatchewan. The Athabasca he calls the Elk, and Lake Athabasca "the Lake of the Hills."



Courtesy of the University of Alberta Map Collection

David Thompson's amazing map

The first comprehensive map to include all of the area of the future Alberta was produced in 1813 and 1814 by the veteran fur trader and surveyor David Thompson. Its accuracy and scope were so impressive that they amaze geographers to this day. Much of the work was in fact done by Thompson, his wife and their numerous children travelling across a wilderness by foot, dogsled and canoe.

Thompson, born to poverty in London, England in 1770, attended the famous Grey Coat School for orphaned children, then apprenticed with the Hudson's Bay Company. He served 14 years on the shores of Hudson Bay and on the Saskatchewan River. But the HBC's arch-rivals, the North West Company of Montreal, gave him the opportunity he cherished—to combine surveying and fur trading.

In the succeeding 15 years, from 1797 to 1812, he travelled more than 50,000 miles throughout what is now the Canadian West and American Northwest from his headquarters at Rocky Mountain House, Alberta. He crossed, recrossed and crossed again the Rockies through Howse and Athabasca Passes. He was the first white man to traverse the Columbia from source to mouth, and he established Canadian fur trading posts as he went. He mapped the headwaters of the Missouri, the Churchill, Lake Athabasca, both the Saskatchewans and many of their tributaries. Accompanying him on many of these journeys was his Metis wife, Charlotte Small, and some of their seven sons and six daughters.

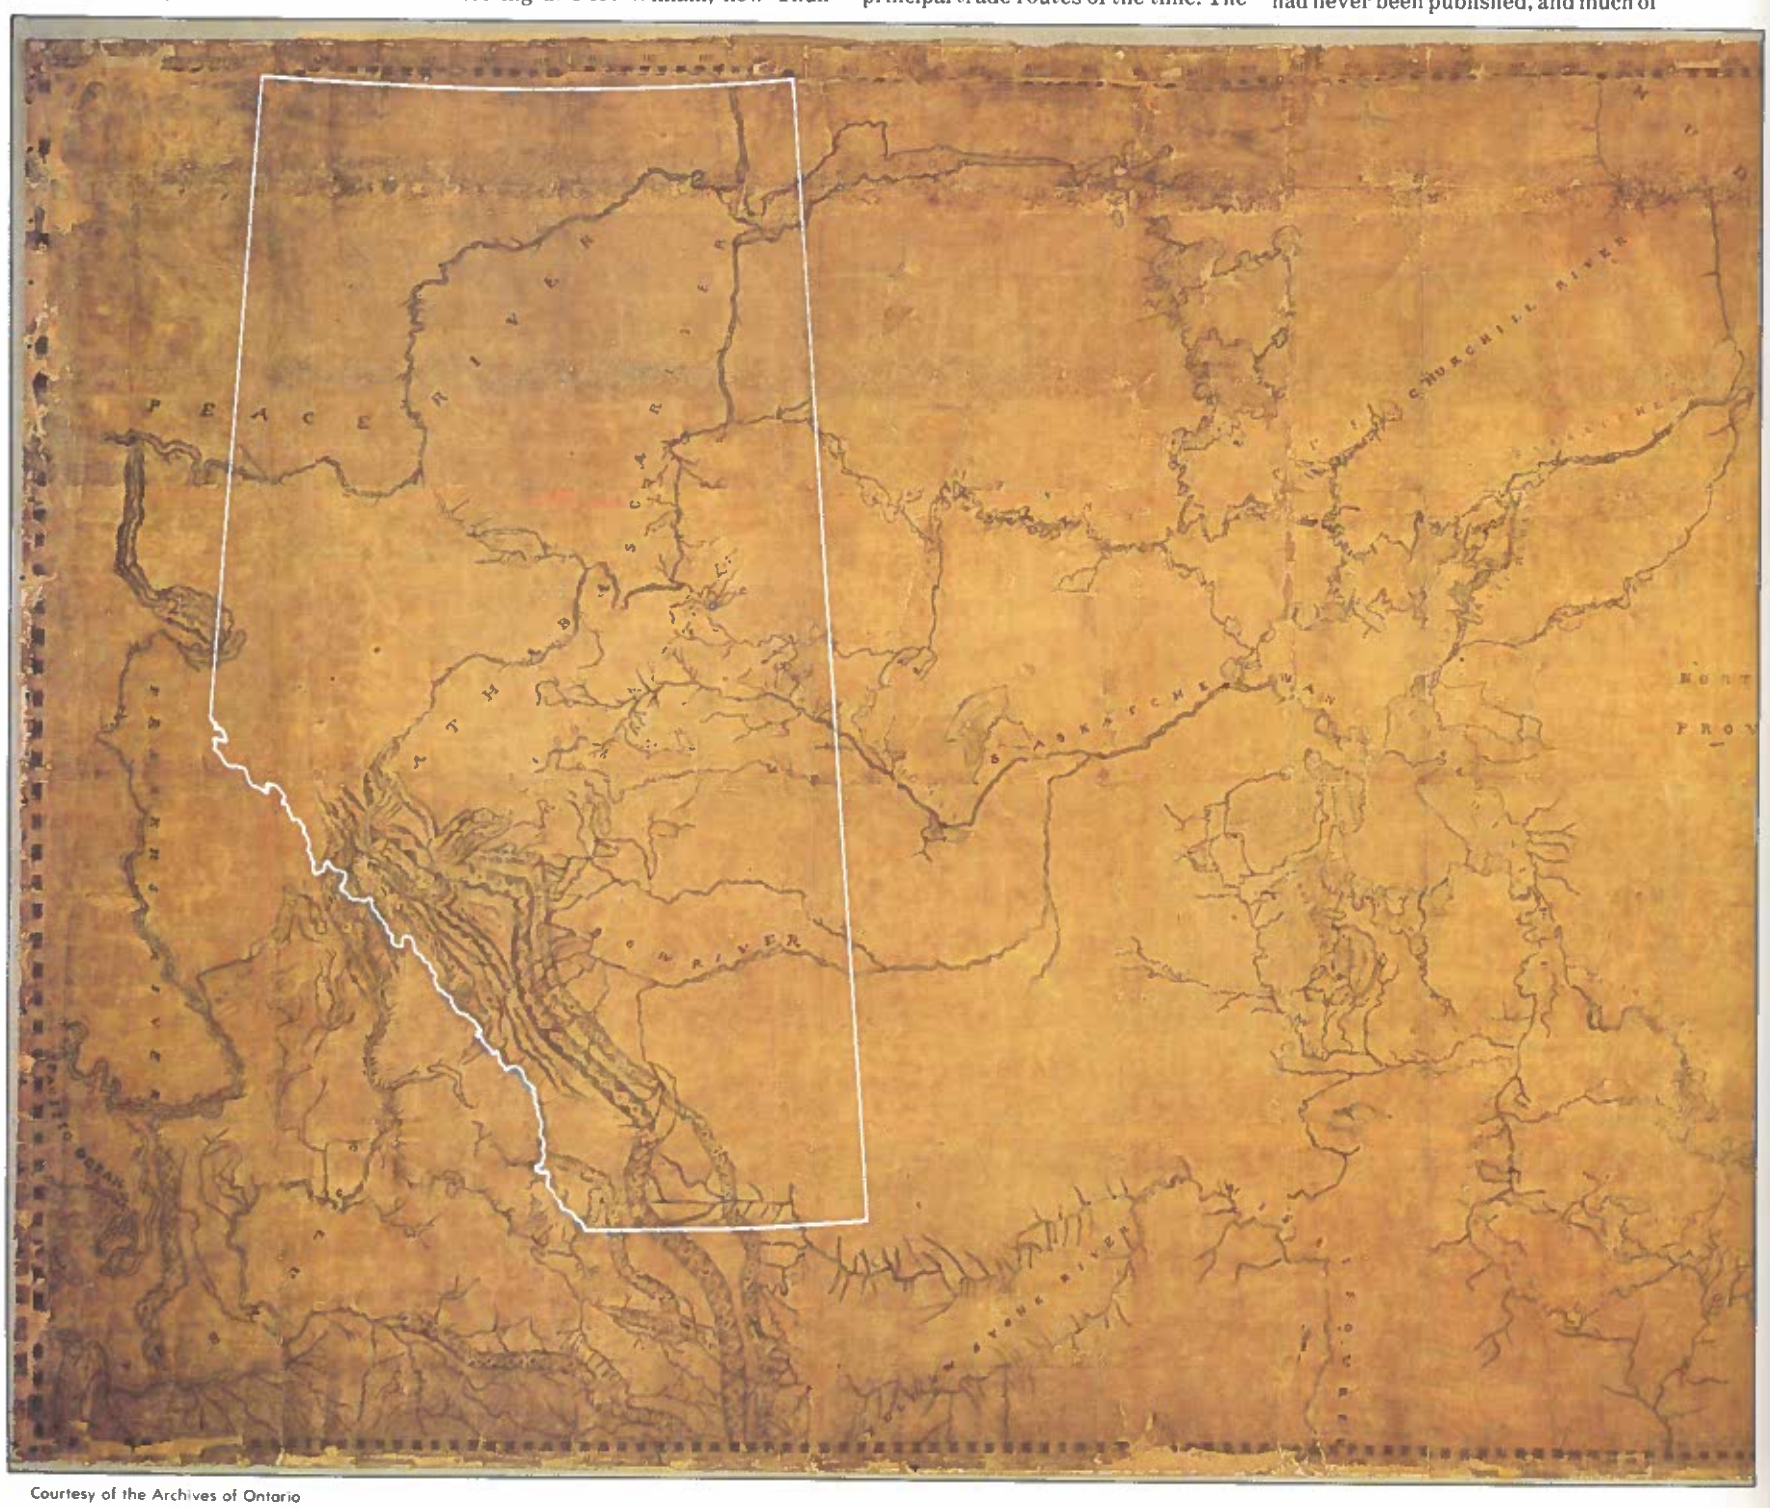
All their findings he incorporated into one map of northwestern North America which at a dramatic meeting was unveiled before the partners of the North West Company at its annual meeting at Fort William, now Thunder Bay, Ontario.

The map in its entirety is reprinted below. It resides today in the Archives of Onario at Toronto. It covers, of course, most of Western Canada, and the map bearings of its thousands of lakes and rivers were so accurate that they remained the basis of much Canadian map making right into the early 20th century.

The Alberta portion of the map is in "blow up" on page 11, and from it you can see exactly what Thompson did and did not know. The Peace and Athabasca Rivers are carried in detail because these were, of course, the highways of the fur trade. The Clearwater is shown entering the Athabasca from the east (at what is now Fort McMurray) with Lac la Loche and what is now called Peter Pond Lake precisely located on the Saskatchewan side of the border. These were principal trade routes of the time. The North Saskatchewan, the Battle, the Red Deer and the Bow are also in position, as is Lesser Slave Lake and the Lesser Slave River which connects it to the Athabasca.

However, there are curious, if understandable, omissions. For example, a gap is shown in the Rockies between the headwater of the Athabasca near modern Jasper and that of the Peace, indicating Thompson's admission that he didn't know what was in there.

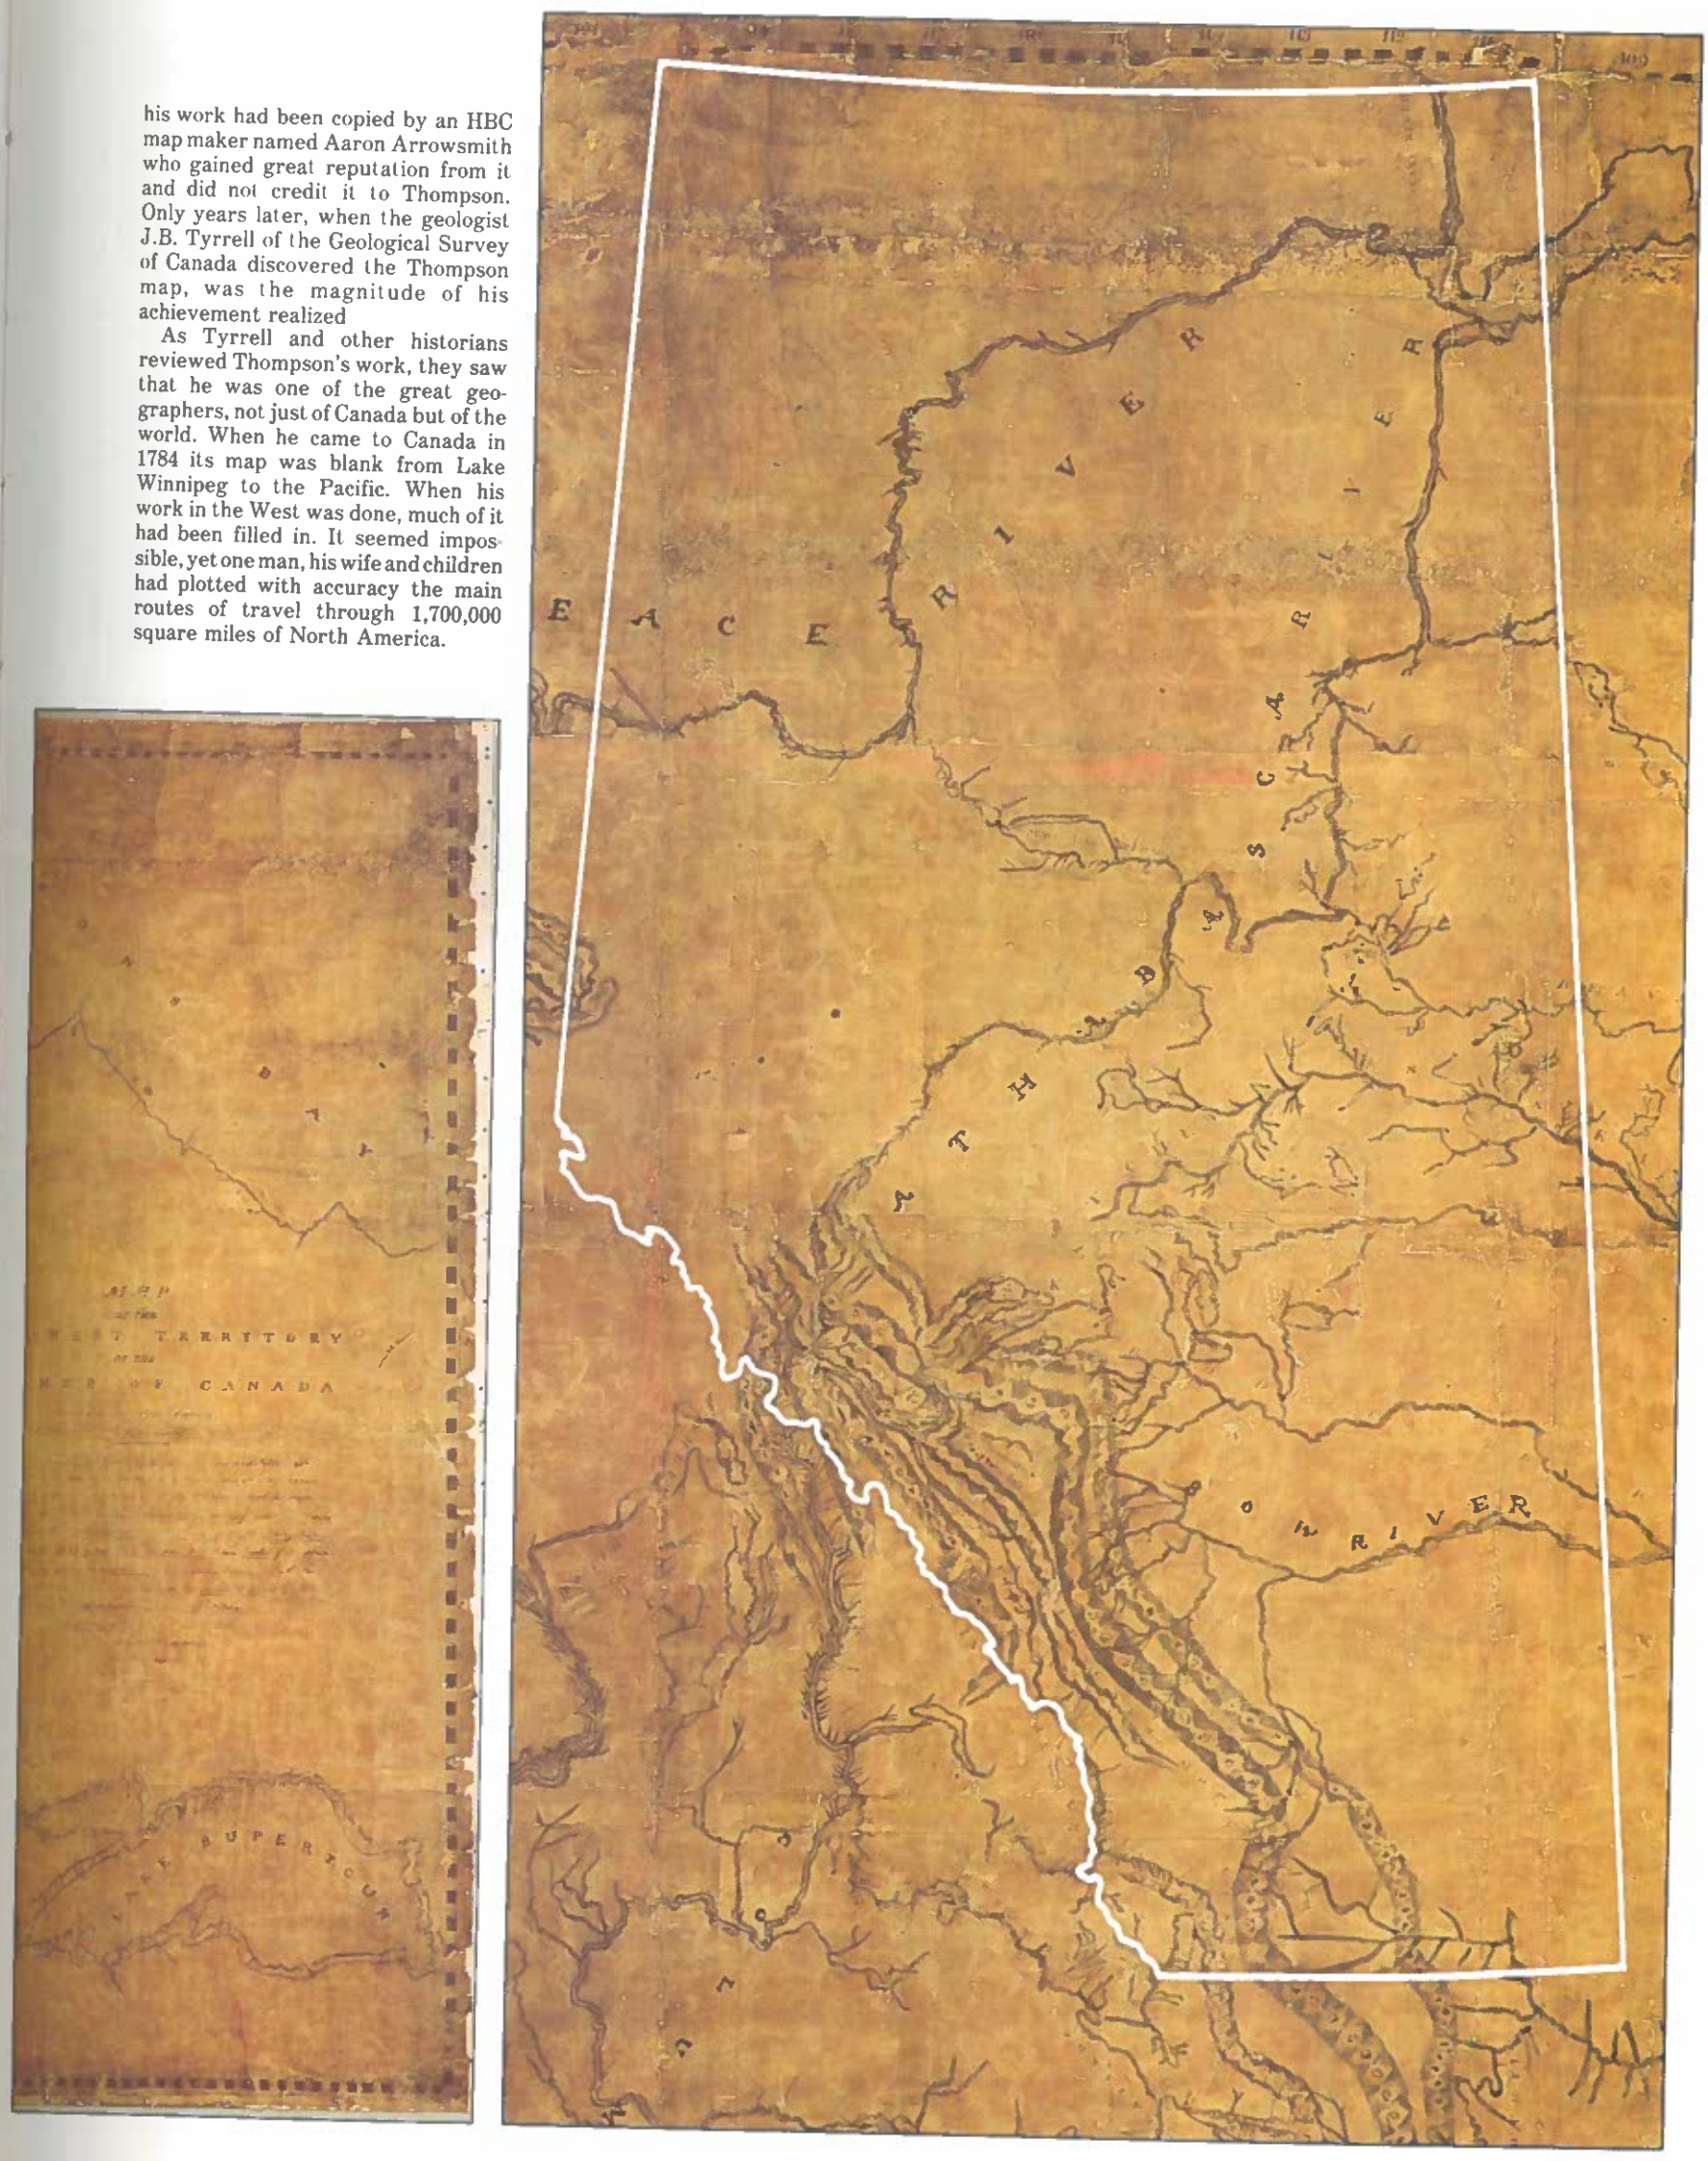
In 1812 Thompson left the West for good and moved to Terrebonne near Montreal. His career in the East, however, was a gradual slide into oblivion that ended sadly. He subsequntly spent 10 years surveying the international boundary between Quebec and what is now Manitoba. He died in obscurity near Montreal in 1857, nearly blind and in dire poverty. This was due to two facts. His great map had never been published, and much of



Courtesy of the Archives of Ontario

his work had been copied by an HBC map maker named Aaron Arrowsmith who gained great reputation from it and did not credit it to Thompson. Only years later, when the geologist J.B. Tyrrell of the Geological Survey of Canada discovered the Thompson map, was the magnitude of his achievement realized

As Tyrrell and other historians reviewed Thompson's work, they saw that he was one of the great geographers, not just of Canada but of the world. When he came to Canada in 1784 its map was blank from Lake Winnipeg to the Pacific. When his work in the West was done, much of it had been filled in. It seemed impossible, yet one man, his wife and children had plotted with accuracy the main routes of travel through 1,700,000 square miles of North America.



Courtesy of the Archives of Ontario

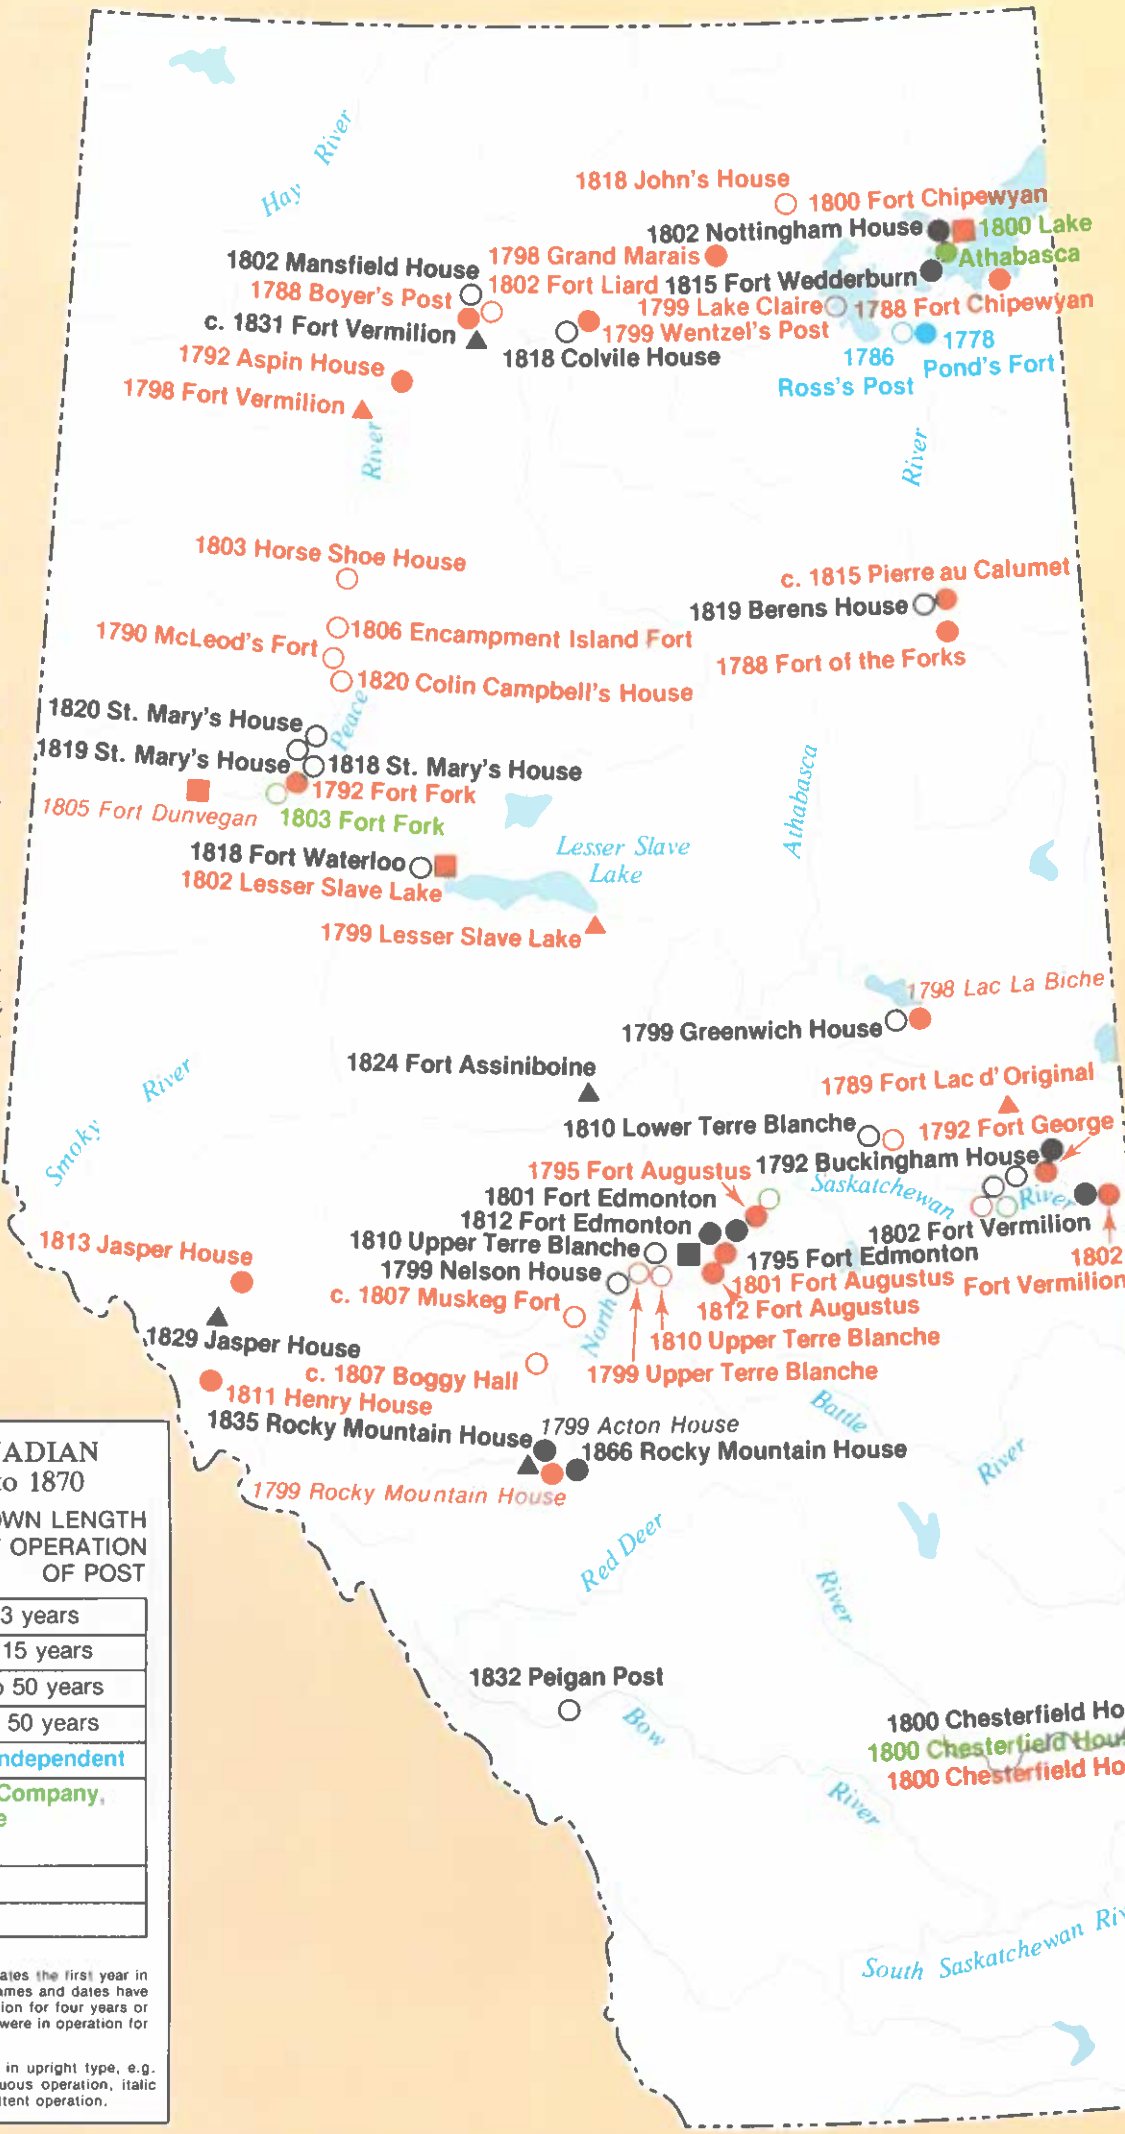
The forts of Alberta

The first white establishments in the province were the forts of the fur trade, and its earliest maps would have shown heavy development in the far north and centre, almost nothing in the south.

Note, for instance, that the posts with the earliest dates were established in the Lake Athabasca area, beginning with "Pond's Fort" of 1778, the first recorded development in the province. Others followed in the next decade along the Athabasca and Peace Rivers.

But by then development was also occurring along the North Saskatchewan. Fort Edmonton and Fort Augustus had appeared by 1795, and Rocky Mountain House by 1799. The name "Terre Blanche," bestowed on North Saskatchewan forts at that period, survives today as "Whitemud," the name of a creek at Edmonton and also a freeway.

But development at Calgary had scarcely started. The only trace on the Bow was Peigan Post of 1832, three to four decades after Edmonton had started. Calgary's day would come later with the arrival of the Canadian Pacific which at first sent it soaring ahead of Edmonton.



POSTS OF THE CANADIAN FUR TRADE, 1600 to 1870

FIRST KNOWN OWNER OF POST*	KNOWN LENGTH OF OPERATION OF POST
○ ○ ○ ○	1 to 3 years
● ● ● ●	4 to 15 years
▲ ▲ – ▲	16 to 50 years
■ ■ – ■	Over 50 years
	Canadian Independent
	New North West Company, also known as the XY Company
	North West Company
	Hudson's Bay Company

c. (circa) = about

The date applied to a post on the map indicates the first year in which it is known to have been operated. Names and dates have been applied to all posts that were in operation for four years or more, and where space allows, to those that were in operation for less than four years.

* Change of ownership is not shown. Names in upright type, e.g. **1835 Rocky Mountain House** signify continuous operation, italic type, e.g. *1799 Acton House* signifies intermittent operation.

Adopted by Geo Graphica Consulting Ltd. from records in the University of Alberta Map Collection.

Boundaries of the past

1 (1825)

In its earliest recorded history, the territory that was to become Alberta was claimed by the Hudson's Bay Company of London and the North West Company of Montreal. In 1820 the companies merged, conferring the whole region on the HBC. However, a U.S.-British treaty created the Oregon territory, jointly possessed by both, and a sliver of the territory lay within modern Alberta.

2 (1862)

The colony of British Columbia together with the adjoining Stickeen Territory begins to fashion what will one day approximate Alberta's western boundary.

3 (1876)

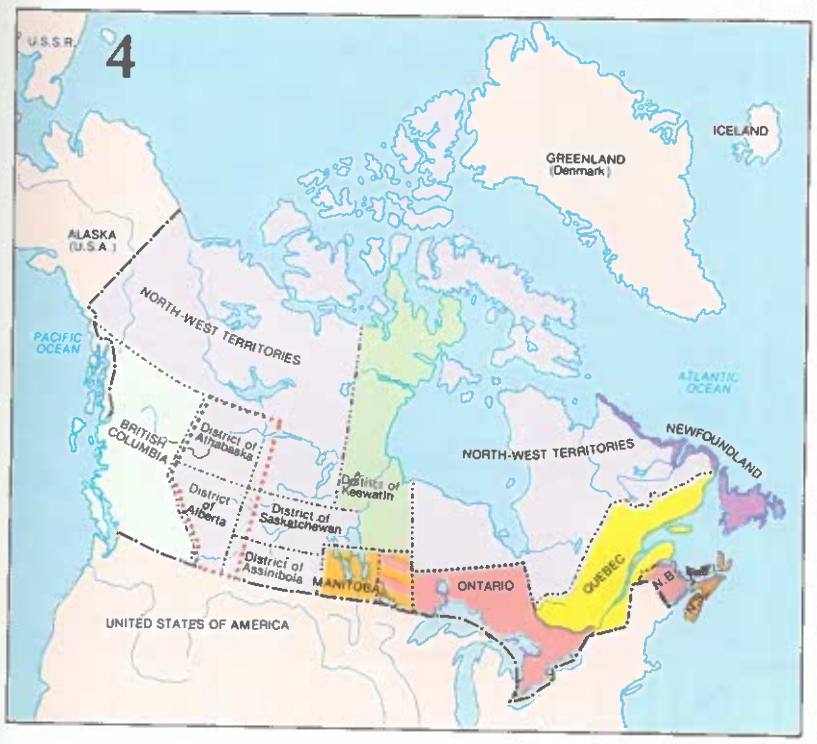
Canada has now been a dominion for nine years and British Columbia a province for five. Alberta's future western boundary has now taken form.

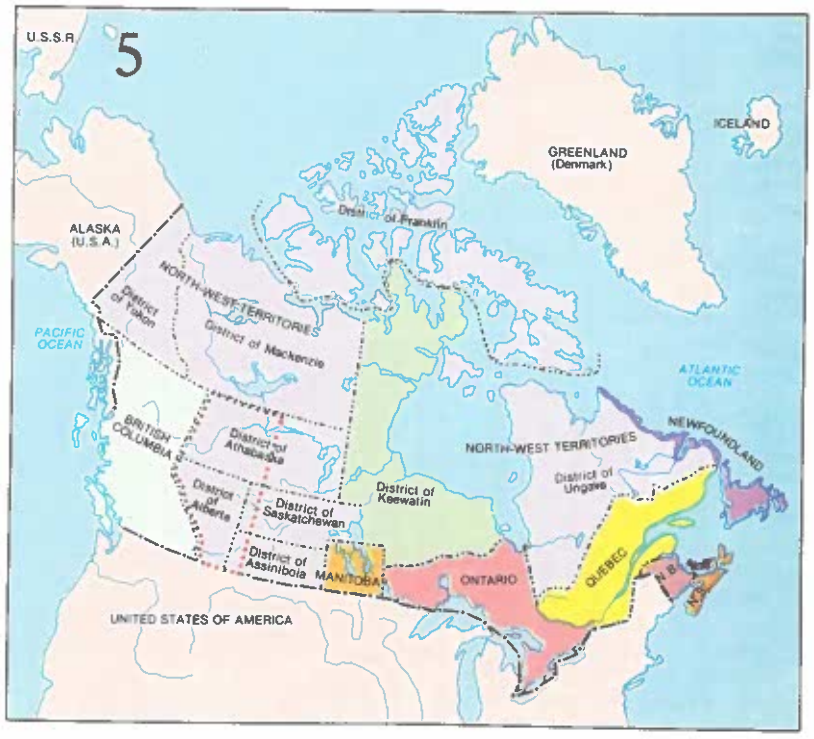
4 (1882)

Alberta has now been divided into two districts within the territories, Athabaska in the north and Alberta in the south. The eastern boundary, however, follows a line between the 111th and 112th meridian, not the 110th as it does today.

5 (1895)

The northern District of Athabaska has by now been expanded to include much of northern Saskatchewan. One proposal subsequently rejected would have combined Athabaska, Alberta, Saskatchewan and Assiniboia into a single province. The Laurier government decided, however, it would become too powerful, and the present map emerged instead.





The map that would have changed the Canadian West

This unusual map of western Canada would have changed its future face entirely if the vision it depicts had ever been fulfilled. It is, in fact, the proposal made by Sir Sandford Fleming for the future route of the Canadian Pacific through the West. Fleming was CP's engineer-in-chief.

Fleming's plan was to take the CPR northwest out of Winnipeg through what would one day become Saskatoon and the already established fur trade station at Edmonton. He would then have carried it through the relatively accessible Yellowhead Pass to the valley of the North Thompson River in British Columbia and thence to Vancouver.

Fleming proposed names for future towns along his route west of Edmonton, one being Ponoka, another Lacombe. Both of these, of course, would wind up instead on the Calgary-Edmonton rail line that was to be built later. As for Calgary itself, Fleming doesn't bother to even put it on his map.

If Fleming's plan had been followed, Alberta today would likely boast only one large centre, Edmonton, the way most provinces do, and Calgary would have remained a small town.

But history was to unfold very differently. The CPR rejected Fleming's route, choosing instead to run the railway through the southern prairie, creating both Regina and Calgary.

In the meantime the change left Edmonton with no railway at all, except the branch line that ran north from Calgary. Embittered Edmontonians cursed the CPR and watched Calgary mushroom to proportions much beyond their community's.

Two further developments, however, restored Edmonton's fortunes. After Alberta became a province, Edmonton was made the capital city and a year later the site of the provincial university. Then in the ensuing few years it hosted not one, but two, transcontinental railway systems, the Canadian Northern and the Grand Trunk Pacific. Both took Fleming's route to the Yellowhead and survive today as the Canadian National.

From that time to this both Alberta centres have raced one another neck-and-neck in their growth.

The first roads

The patrol routes of the Royal North West Mounted Police provided Alberta, and Saskatchewan too, with many of its first fixed overland routes, some of which would one day become highways—still patrolled by the Mounties.

The Mounties had come out in 1874, their 300 red coats moving westward across the prairie from Dufferin, now Emerson, on the Manitoba-Minnesota border. They established their main base at Fort Macleod and quickly brought to a halt the whisky trade that had been established by American traders at Fort Whoop Up which defiantly flew the U.S. flag on Canadian territory.

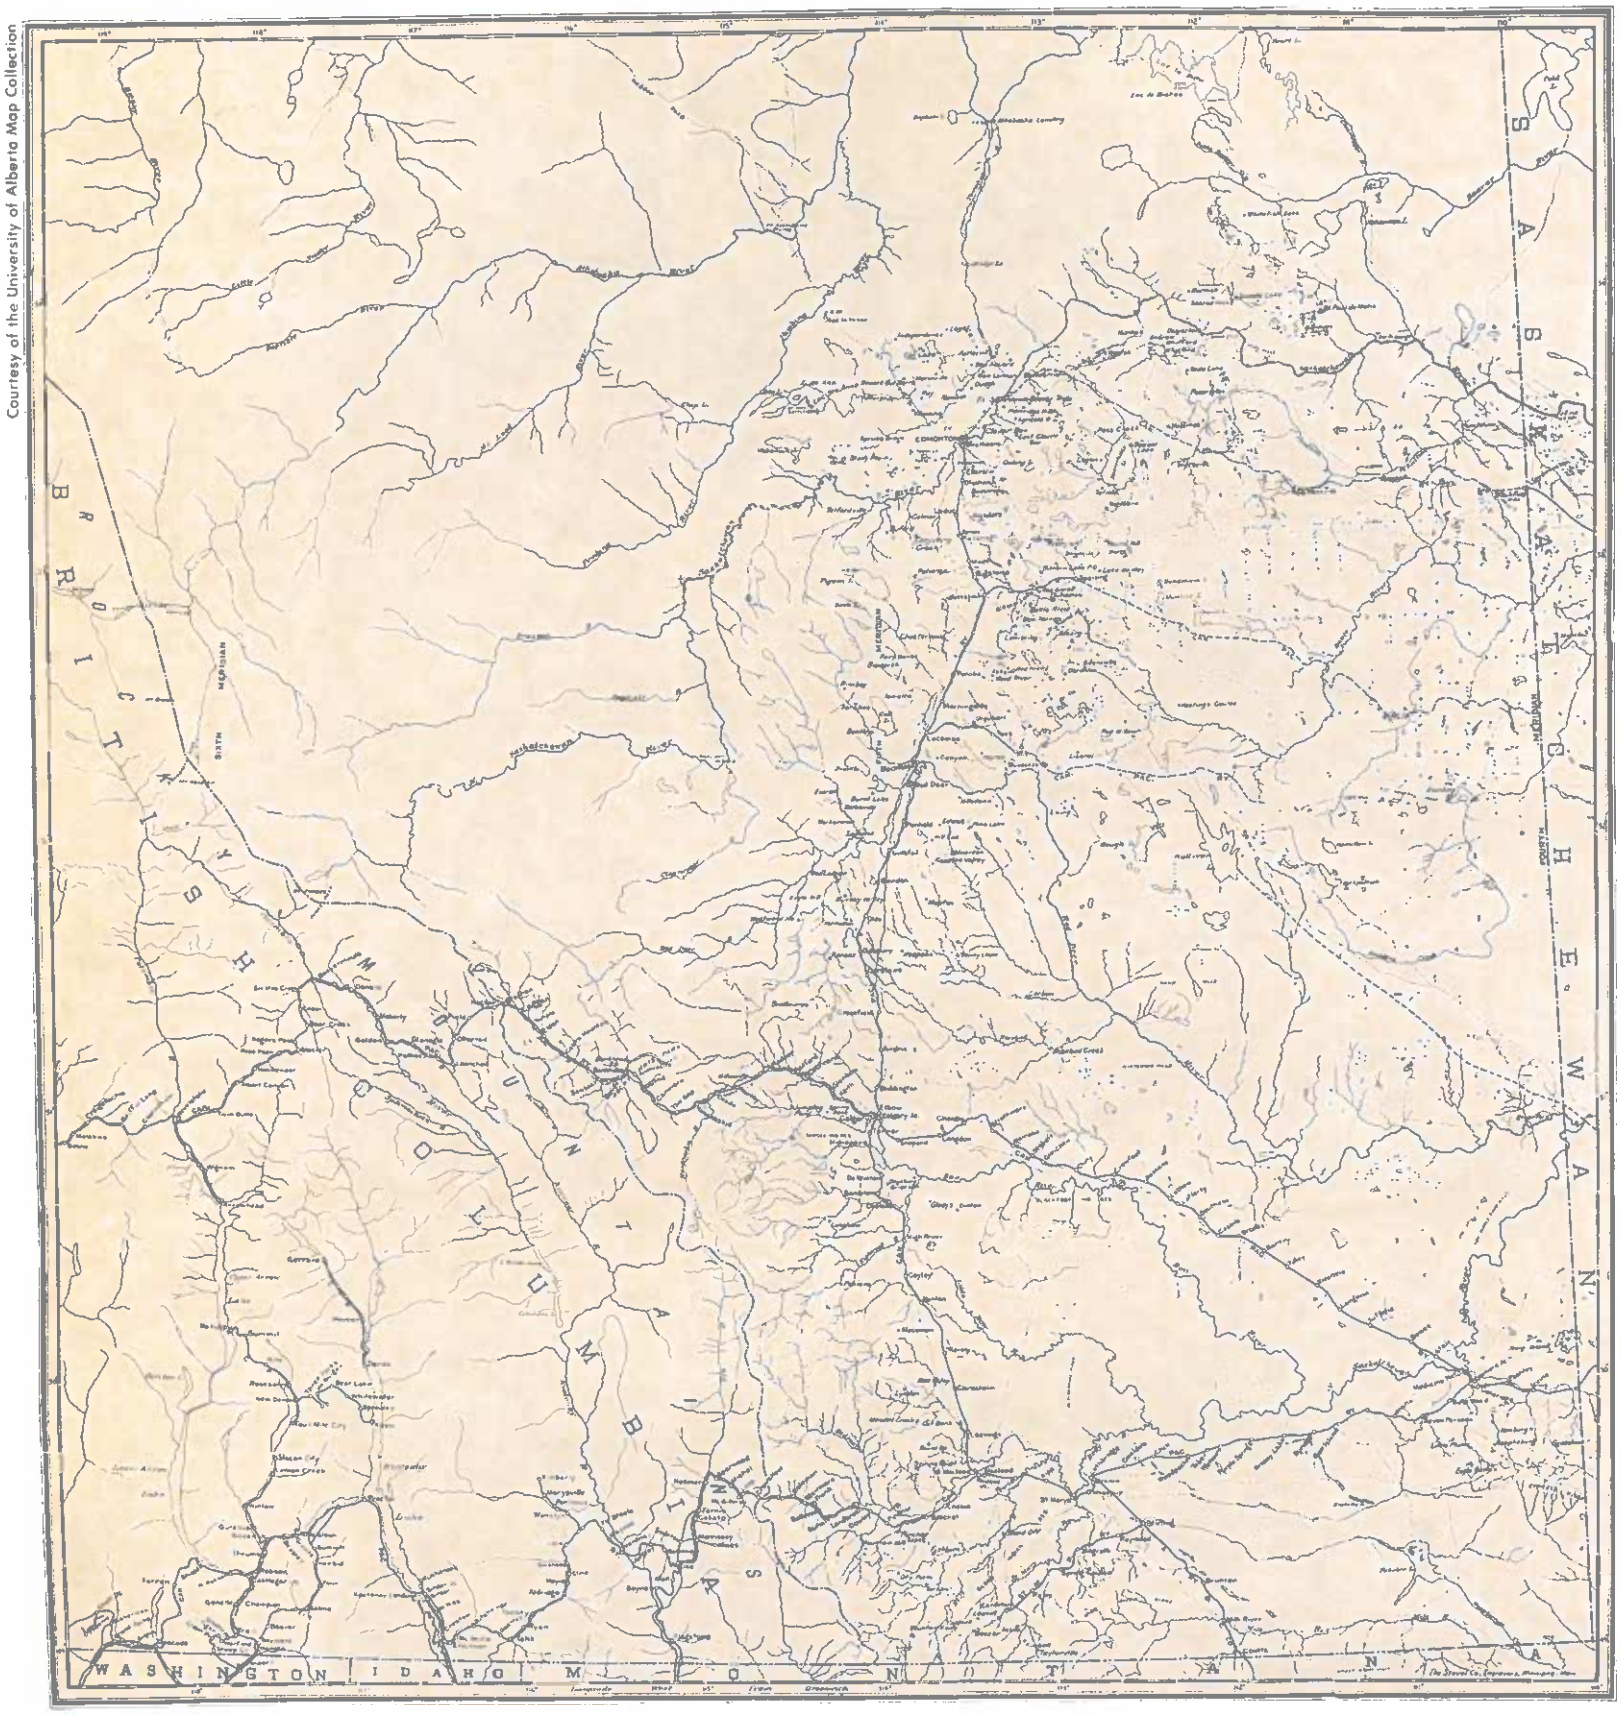
But their biggest task followed when they moved the Indians who had lived for centuries on the open prairie into the reserves provided for them under treaty.

Shown here is an excerpt from a NWMP map made during the territorial period. The reserves had been established, but serious agricultural settlement had not yet begun. The future Province of Alberta would embrace the Territory of Alberta shown here, plus a slice of the Territories of Saskatchewan and Assiniboia. The Saskatchewan-Alberta boundary will run down the 110th Meridian. (It could be taken for a "10" on the map since the meridian line itself runs through the second "1".)

The NWMP posts are identified with red flags. Dotted lines may be discerned running out from them and between them, from Fort Macleod to Calgary, for instance, from Calgary to Edmonton, and from Edmonton to Battleford down both sides of the North Saskatchewan. Portions of these will become highways. Other trails, now long lost, cover enormous distances. The Lord Lorne Trail, for example, runs from Fort Macleod to Battleford, and a whole system of trails radiates from something called the "Bull's Forehead" at the junction of the Red Deer and South Saskatchewan Rivers, one to Edmonton, one to Battleford, one south to the CPR mainline.

On the Calgary-Edmonton trail, site of the projected telegraph line, only Red Deer has so far appeared as a name recognizable today. North of Calgary we find Dickinson's, Scarlet's, Stopping House, Miller's, Muddy Bull (near Morningside) with an unidentified NWMP post between the future Wetaskiwin and Bigstone Creek.

Courtesy of the University of Alberta Map Collection



The province is born

When the province of Alberta was born in 1905, Stovel Press of Winnipeg issued one of the first published maps of it to help settlers discover where the townships lay. In this version of the Stovel map, we have removed the grid pattern of township lines, in order to show more clearly the development of the new province.

It can be seen immediately, for instance, that settlement was almost entirely restricted to three Canadian Pacific Railway lines. They were (and are): 1. The main line, by then about 20 years old, entering the province east of Medicine Hat, running northwest to Calgary, then weaving through the Kicking Horse Pass to Golden, B.C., Revelstoke and eventually Vancouver. 2. The Crowsnest line, striking west from Dunmore Junction east of Medicine Hat, to Lethbridge, Macleod, the Crowsnest Pass and eventually Creston and Trail. 3. The line north from Macleod through Calgary, previously the Calgary and Edmonton Railway, with Edmonton in resentful isolation at its northern terminus.

Coming west towards Edmonton, however, is the projected Canadian Northern, shown here only as a broken line, which will soon give the northern city its "own" railway. Shortly thereafter, another line will appear in Edmonton from the southeast called the Grand Trunk Pacific. It will bring into existence a whole new string of towns, including Wainwright, which have not yet made their appearance. Two more CP lines are projected to come west, one to Wetaskiwin and the other to Lacombe, and the westernmost fragments of them have already been constructed.

It is also noteworthy that no fewer than five American lines have pushed into Alberta and British Columbia.

Other disclosures on the map: The Yellowhead Pass is shown in approximate location. It will be taken by both the Canadian Northern and Grand Trunk Pacific. Later, of course, these will be combined in the Canadian National. But in 1905 the great CN mountain centre of Jasper still bears its old fur trade name, Henry House. In south central Alberta, Drumheller has not yet appeared, though "Rosebud Creek" already exists near that city's future location. And a little to the northwest a shortcut trail can be seen east of the rail line between Carstairs and Innisfail. Like all the other roads that tie the little settlements to the railway, it is mud and largely impassable in wet weather. One day, however, this will become the route of No. 2, our most-travelled superhighway.

The settlements take root

Medicine Hat in 1883

This map was the original survey map of the new townsite prepared by the Canada Land Company, a subsidiary of the CPR which owned the land. Although the map was completed in 1883, lots were not offered for sale until 1885 because of a dispute with the federal government over the location of the Blackfoot Indian reserve. The delay in offering the lots for sale to those who were already living in the community caused a great deal of concern and mistrust of the railway. As a division point of the CPR, Medicine Hat was dominated by the company and was administered by trustees with the Canada Land Company at Winnipeg until 1894 when residents finally decided to declare Medicine Hat a village. The new status introduced local taxation for improvements which the trustees had been reluctant to provide.

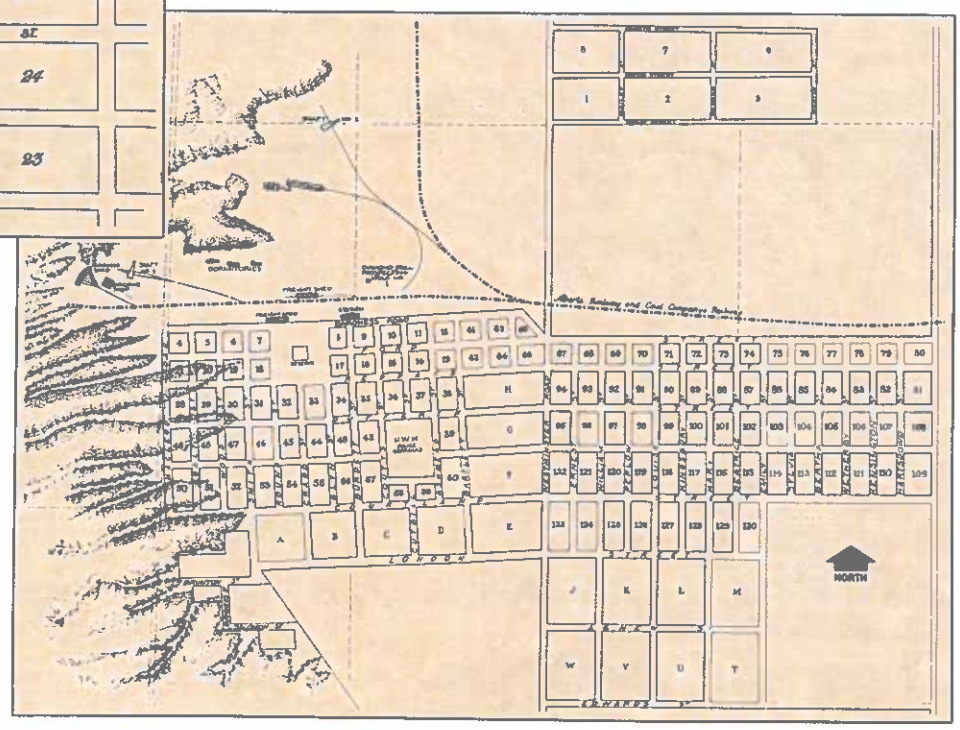
Red Deer in 1890

This was the first map of the Red Deer townsite and was prepared by G.B. Bemister, a Dominion Land Surveyor. He produced the map for Osler, Hammond and Nanton, land agents in Winnipeg for the Calgary and Edmonton Railway Company. The railway had planned to put the town further north but the Reverend Leonard Gaetz, a rancher, offered the railway half of his property in exchange for locating the town at this site. The railway was built by the C. and E. Railway Company but leased on completion to the CPR. This was a fairly common practice and allowed land grant advantages to the giant railway company which had already exhausted its own grants from the federal government.



Courtesy of the Archives, Galt Museum, Lethbridge

Lethbridge in 1890

This 1890 map shows the Alberta Railway and Coal Company Railway which ran from what was originally called the Coal Banks (now Lethbridge) to Dunmore east of Medicine Hat. This narrow gauge railway was built in 1885 to move coal for the CPR. It was dubbed "The Turkey Trail" because of its small cars and their rocking motion as they travelled down the track. The line was extended in 1890 to Coutts and into Great Falls, Montana. By 1892, it had performed so profitably that it was leased by the CPR. Five years later, the CPR bought the original line from Dunmore to Lethbridge and converted it to a standard gauge. Coal production continued to play a part in the Lethbridge economy until 1965.

Edmonton

The settlement and the emerging city

The map above was made for the Dominion Lands Office of the Department of the Interior in 1882, 10 years before the incorporation of the Town of Edmonton and 17 years before the incorporation of its sister, the Town of Strathcona, on the south bank of the North Saskatchewan River. The Hudson's Bay Company fort appears as a black square on the river bank in the reserve of land which the company held onto after parting with most of what was to become the West to the Dominion of Canada in 1870.

Already some of the outlines of modern Edmonton are evident. Malcolm Groat's estate overlooks the Groat Ravine at the left while the long narrow river lots to the east of the HBC reserve define the future 92nd to 99th Streets. Commonwealth Stadium today stands atop the upper reaches of what was then called "Rat Creek Ravine." (A more elegant age would later rename it Kinnaird Ravine.)

The map at the right was made at the peak of a boom in 1911, the last year of the "twin cities" before they were merged into modern Edmonton. By now the skeletal form of the present city has taken shape. The Grand Trunk Pacific Railway has created the Calder yards and the Canadian Northern the downtown yards. Both companies will be merged within 10 years into the Canadian National.

The street number system has appeared, though it begins with "First Street" (now 101st) downtown and the numbers build westward. East of First, the old name system still obtains. The southern portion of the HBC reserve has already been developed, and the northern will one day become the Edmonton Municipal Airport.

The restored Fort Edmonton

Below is a map of Fort Edmonton Park, west of the Quesnell Bridge, where the city's past is recreated at three periods—1885, 1905 and 1920.

Calgary

On the brink of two booms

The maps on these two pages portray the city of Calgary as it verged on the two booms that would bring it to its modern status of world oil and financial centre. The map on page 20 did not intend to depict a settlement at all, rather Township 24 in Range 1 west of the Fifth Meridian where the Canadian Pacific was slated to make two crossings of the Bow River, only the first of which is shown. Already, however, the area had several residents, most of them Northwest Mounted Police veterans with names like Denny, Walker, Butlin, Barwis and Van Courtlandt, whose residences are shown. So, too, are those of former Metis buffalo hunters like Faillan, Amouse, Mayett and McGillis.

The essentials of the future city's central geography were already in place. The downtown area would one day arise in the triangle of land bounded by the CP line, the bend of the Bow and its confluence with the Elbow where the NWMP fort and the Hudson's Bay Company post were located.

In the ensuing winter squatters would establish a tent town on the east bank of the Elbow in Section 14, where the CPR was expected to lay out the townsite. The following year the railway surprised them by putting it in Section 15 instead. The lines bounding these sections would one day become some of Calgary's main streets as the lower map shows. Of the various trails shown on the map with dotted lines, only the "McLeod" (now spelled Macleod) survives as a reality so designated on modern maps of the city. The trail in Section 7, however, would one day become the Richmond Road. In the three decades that followed immediately after this map was made, the development of Alberta agriculture was to turn the "township" into a city. Hence this map shows Calgary verging on its first great boom.

The map on page 21, a transit route system publication made in 1955, shows it verging on its second. By then the shape of the modern city was already clear, but the vast expansion that would accompany the oil hey-day of the '60s and '70s had not yet occurred. Hence the Glenmore reservoir was built appreciably outside the developed area in the southwest. There has been no development beyond Nose Creek to the east, and Ogden and Thorncliffe respectively marked the limits of south and north urban growth. The airstrips built during the Second World War at Currie Barracks were beyond the city's urban border and Bowness was a distinct community well beyond the limits of the map. The population of this Calgary of 1955 was about 175,000, less than a third of the population of the early 1980s. Such was the impact of the oil boom that was to come.

The two booms are the high-water marks of both Calgary and Alberta economic development. For Calgary there was a third, though less significant than the two. In 1890 and '91 the new Calgary and Edmonton Railway made Calgary the jumpoff point for the Alberta north, though this one was shortlived and faded within a year until the first big boom began at the century's turn.

Real estate built in that boom, which reached its zenith between 1909 and the crash in 1913, was never fully occupied, say the city's historians, for nearly 30 years.

CALGARY—1883

The coal mine map of Edmonton

If fur and pemmican were Edmonton's first industry, coal became its second. Fort Edmonton blacksmiths used it for their forges and settlers gopher-holed for it in the North Saskatchewan riverbank. Commercial operations began in 1880. The engineer who drew this map said mining was concentrated in three districts: Big Island, Rabbit Hill and in the city between Groat ravine and Clover Bar. Mines ranged in size from those that produced virtually nothing (prospects) to the Black Diamond mine that produced 3,125,950 tons. When operations closed in 1970, the total number of recorded mines had reached 153. For architects and engineers of downtown high-rises the location of the mines is of vital interest.

The first great oil strike

The Turner Valley was never to become a major Alberta field but the oil strike there in 1914 prefigured the great discoveries that would one day follow to the north.

As a by-product of oil, Turner Valley produced gas in such quantities that, so the story goes, the burn-off flares made it possible to read a newspaper at night in downtown Calgary, 30 miles away.

Calgary's proximity to Turner Valley had another permanent implication for Alberta's geography. Though the great oil finds of the future would lie around Edmonton, the head offices of the companies remained in Calgary, making it the administrative centre of the industry. Of the companies listed on this map, few survive today.

ALBERTA
the province

Alberta is a frontier land, geographically isolated from the world's major population belts. The province's western border, formed by the 120th meridian and the crest of the Rocky Mountains, bars easy access to the Pacific basin. Other Alberta boundaries—the 60th parallel to the north, the 110th meridian in the east and the 49th parallel on the south—nearly all face towards North America's vast, relatively empty Great Plains, which sweep from the Arctic Ocean to the Gulf of Mexico.

The province's 255,000 square miles (660,411 square kilometres) are inhabited by 2.3 million people. In area the province surpasses the combined total of Great Britain, Denmark and West Germany, nations occupying similar latitudes in Europe. Soviet Siberia and a small northerly tip of China are the only Asian lands parallelling Alberta.

Topographically the province divides naturally into northern, central and southern regions. The northern is dominated by coniferous forests of spruce and pine, interspersed with occasional tracts of open prairie. The area is drained northward by the Athabasca and Peace Rivers, all tributary to the Mackenzie River system. These waters flow ultimately to the Arctic Ocean. The centre is a pleasant parkland and rolling plain dotted with groves of timber. The treeless plains of the south extend from the Red Deer River to the border with Montana. Nearly all the south and centre lies in the drainage basin of the Saskatchewan Rivers.

Along the range of the Alberta Rockies, 26 peaks rise over 10,000 feet (3,048 metres), the highest being Mount Columbia in the southwest at 12,294 feet (3,747 metres).

The provincial climate is dry and sunny. The south receives 2,000 to 2,200 hours of sunlight annually, more than any other part of Canada. Precipitation can vary greatly but averages 13.8 inches (35 cm.) a year in the north, 17.7 inches (45 cm.) at Edmonton, slightly over 11.8 inches (30 cm.) around Calgary, and 19.7 inches (50 cm.) or more in much of the foothills.

Drought is a danger; Medicine Hat in the southeast has received as little as 6.7 inches (17 cm.) of moisture a year. Hailstorms occasionally damage crops across Alberta. The frost-free period ranges from 110 days at Lethbridge in the deep south to just 65 days high in the north.

Throughout Alberta temperatures vary dramatically, from southern highs over 100° F (38° C) to record lows under —76° F. (—60° C.) in the Peace River valley bottom. Warm winds, known as chinooks, periodically break through the Rockies barrier and flood the south, including Calgary, with warm Pacific air. A chinook can raise the temperature by as much as 68° F. (38° C.) within two hours. Due to these dry airflows, the far south can enjoy highs above freezing on 50% or more of winter days. All over the province low humidity mitigates the cold's impact.

About one in 10 Canadians lives in Alberta. The 1981 national census showed 77% of Alberta's population residing in urban centres, with well over half the total in the Calgary and Edmonton areas. In 1983 Calgary registered 620,692 inhabitants, Edmonton 560,085. Between 1971 and 1981 the provincial population jumped over 37%, but with the onset of economic recession in the early 1980s, Alberta began to experience a significant emigration, as it had in the decades preceding 1950.

Albertans tend to be young. One-third of the population is under 21; another third is 21 to 35. Contrary to a common misconception, native-born Albertans are not a minority in their own province; in 1981 two out of three Alberta residents had been born here. One out of five came from outside Canada.

The province's road network amounted to 93,208 miles (150,000 km.) in 1982, with 6,649 miles (10,700 km.) of paved highway. Over 1.9 million vehicles were registered by 1981. The railways' main trackage totalled 6,711 miles (10,800 kilometres). Regular flights within the province and around the world were available from nine air carriers. Alberta had licensed 63 airports, including two internationals. The province has 10 daily newspapers, nine television stations, 31 AM radio stations and 12 FM stations.

The province is governed by a 79-member legislative assembly. The 1983-1984 provincial budget planned expenditures of $9.68 billion. The Alberta Heritage Trust Fund, made up of a portion of resource revenues, stood at $13.3 billion at the end of September 1983.

The provincial government owns the telephone system throughout the province except in Edmonton, where the city operates its own system. The Alberta government also operates its own consumer banks through 130 Treasury Branches.

There are three conventional universities in the province: University of Alberta in Edmonton, University of Calgary and the University of Lethbridge. The first two offer a full range of programs at the undergraduate and graduate levels while the University of Lethbridge specializes in undergraduate programs and teacher education. Athabasca University offers degree courses through correspondence. There are 10 public junior colleges and several private ones in the province providing diplomas and university transfer programs.

In 1981, Statistics Canada reported that 9.6% of Albertans held university degrees, the highest proportion in Canada. Just over 40% had education beyond the secondary level.

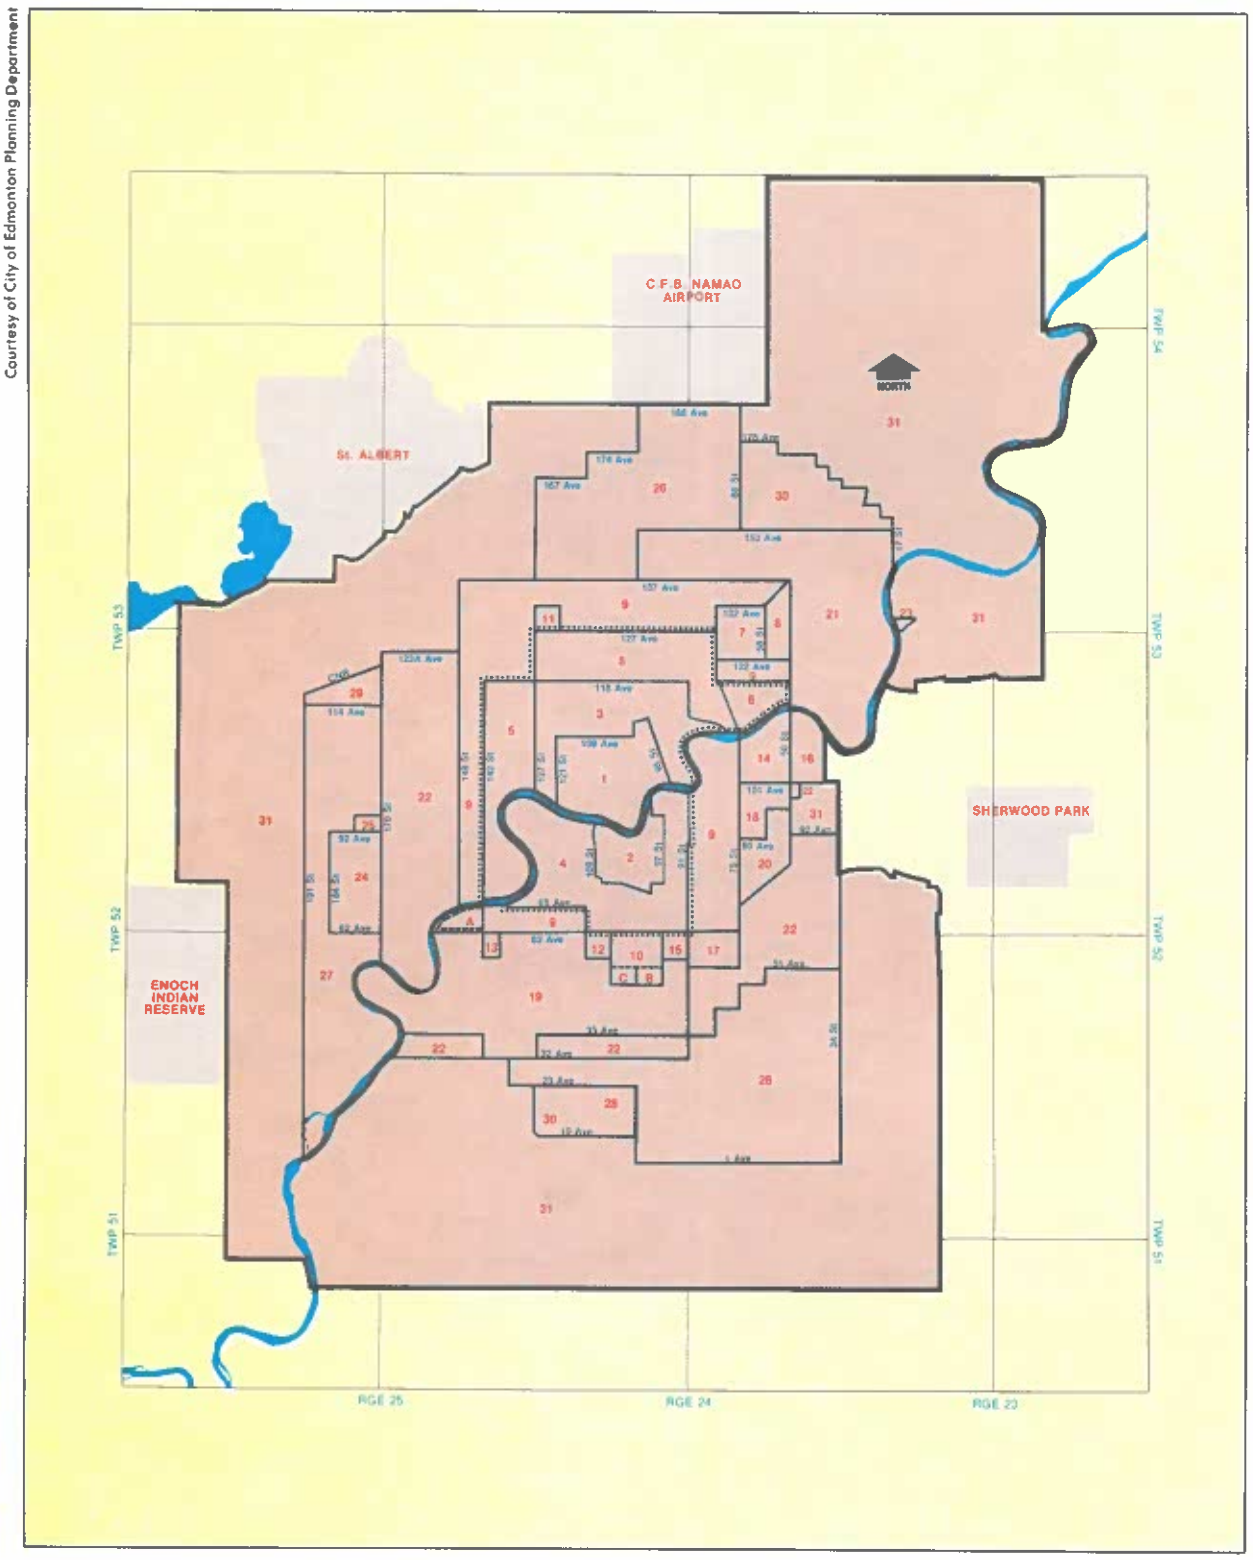
EDMONTON

the capital city



Courtesy of City of Edmonton Planning Department

Population: 560,085.

Location: On Highways 2 and 16, 183 miles (294 km.) north of Calgary on the North Saskatchewan River.

Street System: Since early in the 20th century, Edmonton streets have been numbered. Avenues run east and west from First Avenue in the south to 259 Avenue in the north with even house numbers on the north side. Streets run north and south from First Street in the east to 231 Street in the west with even house numbers on the west side. 101 Street runs roughly through the centre of the city, as does 101 Avenue which has been allowed to retain its original name, Jasper Avenue. If a street name carries a letter after the number (i.e. 106A Avenue), this means it is an extra street in the system (i.e., between 106 and 107 Avenue).

An Edmonton address on a numbered street can be found easily. No. 9180 149 Street, for instance, is between 91 Avenue and 92 Avenue on the west side of 149 Street. No. 17303 106A Avenue is located between 173 and 174 Street on the south side of 106A Avenue. The number system can also apply to named streets. For instance, 10632 Jasper Avenue would lie between 106 and 107 Street.

In 1982, with the annexation of vast outlying areas, a new street system was designed for Edmonton which will eventually see the whole area divided into four quadrants. First Street is to be renamed Meridian Street and First Avenue Quadrant Avenue so that nearly the whole of the existing city will lie within the northwest quadrant. Streets already developed on the city's far eastern and southern outskirts (east of Meridian Street, and south of Quadrant Avenue) are being numbered according to the four-quadrant system of the future.

History: Edmonton was originally Fort Edmonton, a site selected by the Hudson's Bay Company in 1795. Trader John Tomison named the fort after the site of a British estate owned by Sir James Winterlake, then deputy governor of the company. Edmonton became a town in 1892 and a city in 1904. The following year the Canadian Northern Railway reached the city and in 1906 Edmonton was declared the capital of the new province of Alberta.

How the capital grew

Annexations since the incorporation of the town of Edmonton in 1892

1 1892 Incorporation of Town of Edmonton, Hudson's Bay Reserve to River Lot 14 - 3.4 sq. mi.
2 1899 Incorporation of Town of Strathcona, River Lot 9 to River Lot 17 - 1.56 sq. mi.
3 1904 Incorporation of City of Edmonton, Groat Estate/Inglewood to Parkdale/Riverdale - 3.75 sq. mi.
4 1907 Incorporation of City of Strathcona, Windsor Park/Belgravia to Bonnie Doon/Hazeldean - 5.94 sq. mi.
5 1908 Buena Vista to Westmount, North Inglewood to Eastwood/Virginia Park - 7.5 sq. mi.
6 1911 Highlands - 1 sq. mi.
••• 1912 Amalgamation of City of Edmonton and City of Strathcona
7 1912 Belmont Park - 1 sq. mi.
8 1912 Kennedale - .59 sq. mi.
9 1913 Dominion Industrial to Quesnell Heights/Brander Gardens to Parkallen, Bonaventure to Belvedere, Forest Heights to Argyll - 15.02 sq. mi.
10 1914 Allendale/Duggan to Coronet/Papaschase - 1 sq. mi.
11 1917 Calder - .28 sq. mi.
A 1922 Separation of north Brander Gardens - .39 sq. mi.
B 1922 Separation of Papaschase - .14 sq. mi.
12 1947 Pleasantview - .25 sq. mi.
13 1950 Whitemud Creek - .13 sq. mi.
C 1951 Separation of part of Duggan - .17 sq. mi.
14 1954 Capilano/Fulton Place - .5 sq. mi.
15 1954 Coronet - .25 sq. mi.
16 1956 Gold Bar - 1 sq. mi.
17 1958 Davies Industrial - .70 sq. mi.
18 1959 Terrace Heights/Ottewell - .88 sq. mi.
19 1959 Terwillegar Park/Riverbend to Strathcona Industrial Park and re-annexation of A, B, C - 10.86 sq. mi.
20 1960 Ottewell to Girard Industrial - 1.2 sq. mi.
21 1961 Beverly/Clareview to Dickinsfield - 11.02 sq. mi.
22 1964 Jasper Place and Southeast Industrial - 16.92 sq. mi.
23 1967 Clover Bar Power Plant - .06 sq. mi.
24 1969 Springfield/Callingwood - 2.03 sq. mi.
25 1970 Springfield - north - .13 sq. mi.
26 1971 Castle Downs/Lake District and Mill Woods - 23.55 sq. mi.
27 1972 West Jasper Place - 10.07 sq. mi.
28 1974 Kaskitayo - 1.22 sq. mi.
29 1976 Northwest Industrial - .84 sq. mi.
30 1980 Pilot Sound and Twin Brooks - 4.41 sq. mi.
31 1982 Edmonton Northwest/Yellowhead to Heritage Valleys/The Meadows to Ranchlands/Northeast - 142.66 sq. mi.

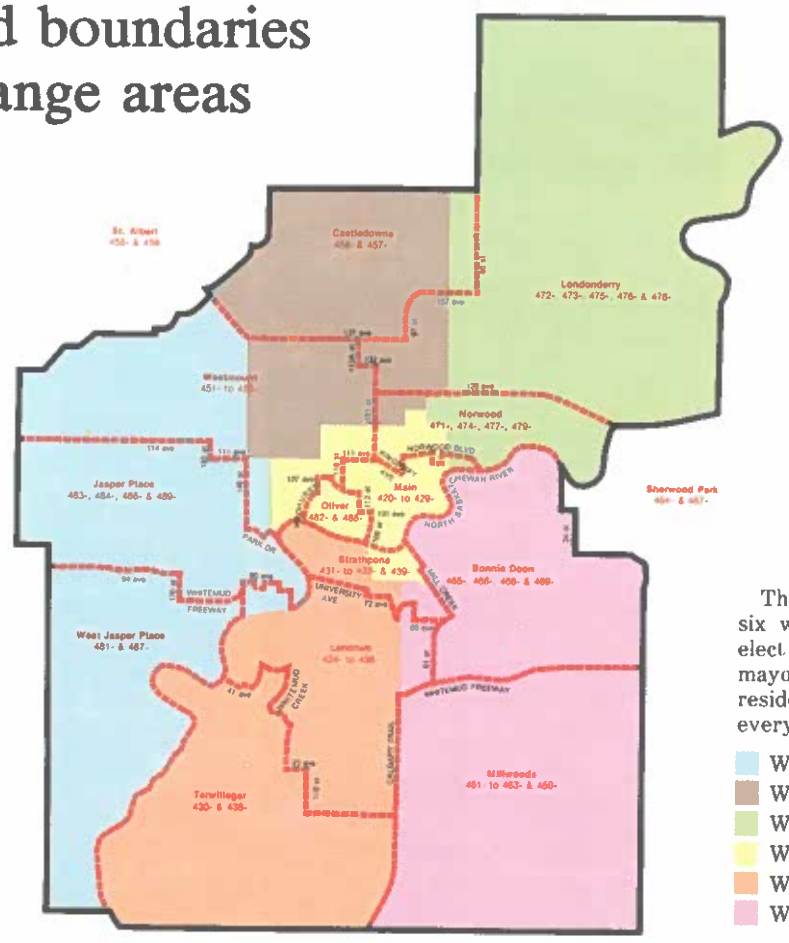
Edmonton's ward boundaries and phone exchange areas



Phone exchanges

As illustrated on the accompanying map, Edmonton is divided into phone exchange districts, each with precise geographic boundaries. One or more three-digit prefixes (e.g. 428-) is assigned to each exchange. If an individual moves or a business changes its location, the original phone number can be retained at no extra charge to the subscriber as long as the new address lies within the same exchange district.

The only prefix shared between two districts is 438. Numbers higher than 438-6000 belong to the Terwillegar exchange, those below to Lendrum.

Phone exchange boundaries

Ward boundaries

The city of Edmonton is divided into six wards. Residents of each ward elect two aldermen to city council. The mayor is elected at large by all city residents. Municipal elections are held every three years.

- Ward 1
- Ward 2
- Ward 3
- Ward 4
- Ward 5
- Ward 6

For explanation of symbols, see General Legend on page 5

This map outlines the area now designated historic Strathcona which is governed by development regulations aimed at preserving its character. The buildings, trails and so forth within the area date to the years immediately preceding the First World War.

Old Strathcona: the past preserved

In 1891 the Calgary-Edmonton Railway reached the North Saskatchewan River. There on the south bank a new community formed at the railhead, originally known as South Edmonton. The name was changed to Strathcona in tribute to the famed CPR financier when the town was incorporated in 1899.

Edmontonians, that is the people north of the river, watched in disgust as their new rival prospered, achieving a population of 3,500 and city status by 1907. Making matters worse the same year, the province's first university was sited in Strathcona.

However, the two cities amalgamated in 1912 and, in one sense anyway, Strathcona has outlived Edmonton. As high-rises obliterated downtown Edmonton's original identity and the oil boom swept away most of the architectural heritage of both cities, concerned citizens formed the Old Strathcona Foundation to save the Main Street atmosphere of the "south side."

Since 1976 the foundation has helped formulate strict guidelines that govern all development within the core of Strathcona and restores historic properties. This map identifies many of the sites ordered preserved.

Fort Saskatchewan

Population: 12,474.

Location: On Highways 15 and 21 on the North Saskatchewan River, 17 miles (27 km.) northeast of Edmonton.

Street System: Streets run north and south, from 79 Street in the west to 115 Street in the east, with odd numbers on the east side of the streets. Avenues run east and west, from 83 Avenue in the south to 103 Avenue in the north, with odd numbers on the south side of the avenues.

Transportation Facilities: There is no passenger rail service. One bus runs daily to and from Edmonton with access to other centres from there. Courtesy Taxi provides service to Edmonton LRT stations. No inter-city courier service is available.

History: The North West Mounted Police set up a fort, initially called Sturgeon Creek Post, at this site in 1875. The name was later changed to Fort Saskatchewan. It was incorporated as a village in 1899 and as a town in 1904.

Leduc

Population: 12,471.

Location: On Highway 2, 21 miles (34 km.) south of Edmonton and 162 miles (261 km.) north of Calgary at junction of Highway 39.

Street System: Streets run north and south, from 36 Street in the east to 54 Street in the west with odd numbers on the east side of the streets. Avenues run east and west, from 33 Avenue in the south to 70 Avenue in the north. Odd numbers are on the south side of the avenues.

Transportation Facilities: Leduc is on the CP Rail line but has no passenger rail service. Five buses run daily to Edmonton and three to Calgary. Couriers from Edmonton will pick up and deliver in Leduc. Scheduled air service is available from Edmonton International Airport, 3 miles (5 km.) north on Highway 2.

History: Leduc began as a termination point of the telegraph line from Winnipeg in 1876. R.T. Telford, a former member of the Northwest Mounted Police, homesteaded at Leduc in 1892 and the settlement was incorporated as a village in 1899. Leduc was named after Father Hippolyte Leduc, an Oblate priest. Leduc was incorporated as a city in 1983.

Sherwood Park

Population: 30,251.

Location: Sherwood Park is a hamlet, 9 miles (15 km.) east of Edmonton and 185 miles (298 km.) northeast of Calgary.

Transportation: Local bus service to Edmonton runs every half-hour daily, to the University of Alberta, twice daily. There is no passenger rail service. Local and inter-city courier service is available.

History: Sherwood Park was planned as a bedroom community to Edmonton by a local landowner, John Campbell, in the early 1950s. The name Sherwood Park was given to what was to be the first phase of Campbelltown. The first resident of Sherwood Park moved in on New Year's Eve, 1955.

St. Albert

Population: 35,032.

Location: On Highway 2 at the northwest boundary of the City of Edmonton.

Street System: The city is divided into 11 residential and three industrial subdivisions. Each subdivision is named and the streets within each begin with the same letter as the subdivision name. For example, all the streets in Grandin begin with "G." The numbering system on the closed bays and crescents varies with the subdivisions.

Transportation Facilities: There is no passenger rail service. The city has daily transit bus service, except Sundays, into Edmonton. Greyhound also maintains service between St. Albert, Edmonton and other centres. The city of St. Albert operates a handibus for the handicapped. Inter-city courier service is available. There is no scheduled air service, but there is a private airport.

History: The area was first settled in 1861 by Father Albert Lacombe and 20 Metis families in a community called Mission Hill, claimed to be the oldest settlement not associated with a fort in Alberta. That community was wiped out by disease but resettled in 1880, again mostly by Metis families. In 1885, Bishop Vital-Julien Grandin of the St. Albert diocese organized a home guard to fight, if need be, for the federal cause in the Riel Rebellion. The majority of the guard were Metis and one of their leaders was Felix Dumont, nephew of Riel's lieutenant, Gabriel Dumont. St. Albert was incorporated as a village in 1899, as a town in 1904, and as a city in 1977.

Spruce Grove

Population: 11,307.

Location: On Highway 16, 17 miles (28 km.) west of Edmonton.

Transportation Facilities: There are two Greyhound buses daily each way between Edmonton and Spruce Grove. The town is situated on the CN main line but has no passenger rail service. Couriers from Edmonton will pick up and deliver parcels. No scheduled air service is available.

History: Spruce Grove's first residents were Scottish, English and French, in the late 1800s. In 1890, a large influx of German settlers arrived and the Canadian Northern Railway reached the area in 1908. The village was a self-sufficient agricultural centre until the late '60s and has since developed into a bedroom community for the growing city of Edmonton. The town's name refers to the spruce groves which were in the area prior to the settlement, some of which remain.

LEGEND

Stony Plain

Population: 5,291.

Location: On Highway 16, 21 miles (34 km.) west of Edmonton.

Street System: Streets run north and south, from 42 Street in the east to 52 Street in the west, with odd numbers on the east side of the streets. Avenues run east and west, from 40 Avenue in the north to 57 Avenue in the south, with odd numbers on the south side of the avenues.

Transportation Facilities: Stony Plain is on the CN main line but has no passenger rail service. There is Greyhound bus service to and from Edmonton twice daily each way. There is no scheduled air service but inter-city courier service is available.

History: One of Stony Plain's first settlers was John MacDonald who arrived from Ontario in 1882 and farmed until 1892 when he set up a post office and store in what became the village of Stony Plain in 1908. The town was named for the Stoney Indians who inhabited the area before the white settlers arrived. It was incorporated as a village in 1908 and as a town in 1909.

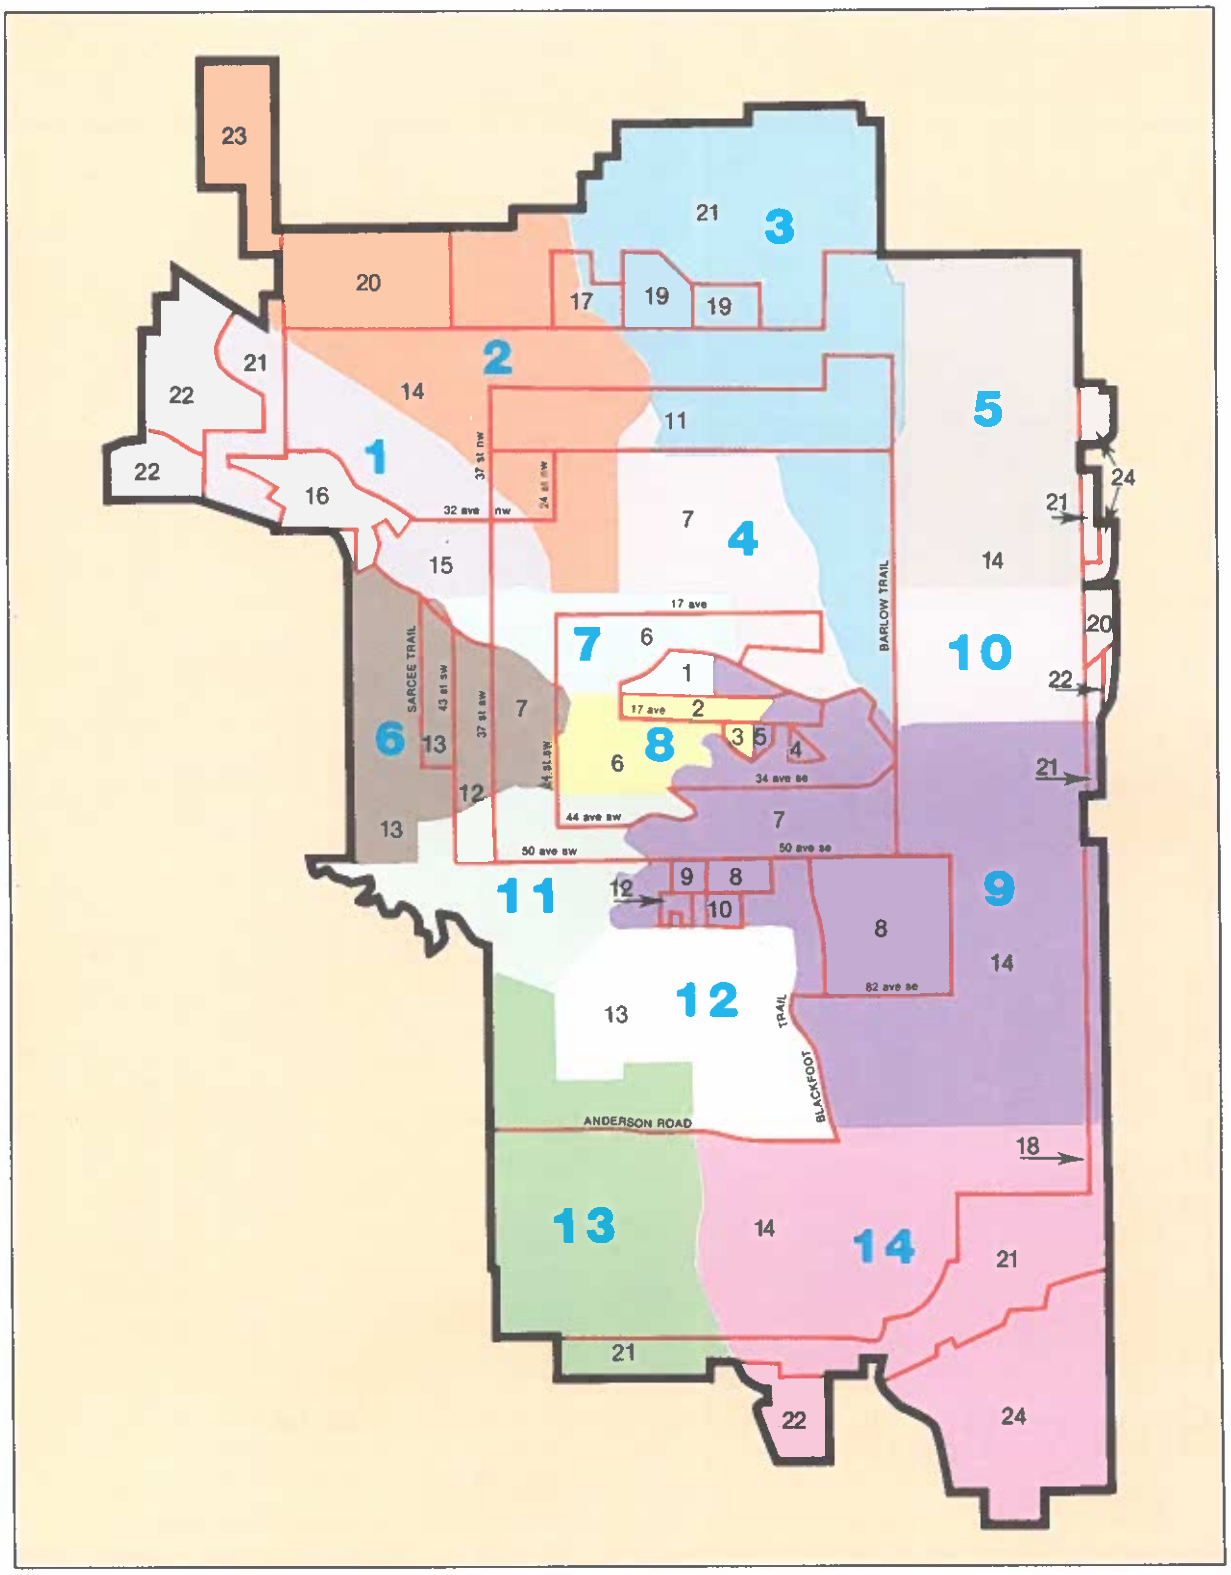
For explanation of symbols, see General Legend on page 5

CALGARY

the financial centre



Population: 620,692.

Location: On Highways 1 and 2, 183 miles (294 km.) south of Edmonton.

Street System: Calgary is divided into four quadrants—northeast, northwest, southeast and southwest. These are defined by an east-west line and a north-south line that runs through the city. (See map on page 71 for yellow quadrant lines).

All Calgary addresses therefore carry the designation NE, NW, SE or SW to show which quadrant they're located in. The address of a numbered street reveals its location. No. 1104 14 Street SW, for instance, would be located between 11 Avenue South and 12 Avenue South on 14 Street West. Since 1104 is an even number it will be on the east side of the street. Even numbered houses on avenues are on the north side of the street.

However, an idiosyncrasy distinguishes Calgary's numbering system on avenues. Pioneer planners decided to begin numbering houses in the first block west of Centre Street with the number 101, rather than the number 1. Hence the numbers between First and Second Streets had to begin with 201 and those between Second and Third with 301. The result is confusing to non-Calgarians. Where in almost all other city street systems an address in the 500s will lie between Fifth and Sixth Streets, in the case of Calgary avenues, it will lie between Fourth and Fifth.

Calgary subdivisions developed in the last two decades have combined the number system with names. Some identity has been preserved between the name of the street and the name of the subdivision. But while Brae Place, Brabourne Mews and Brakenridge Road are all reliably in the Braeside area, Braden Crescent and Brantford Drive are at the opposite end of town. So to locate named streets, consult the Calgary general index on page 72.

History: Fort Calgary was established in 1875 by the North West Mounted Police. Colonel J.F. Macleod named it Fort Calgary after his ancestral estates in the Hebrides. Calgary was incorporated as a town in 1884 and a city in 1893.

The city of Calgary has 14 wards, each represented by one alderman on city council. The mayor is elected at large by all residents of the city. Municipal elections are held every three years.

The 24 annexations that made the city

(in colour, the 14 wards)

1 1884 Town of Calgary 2.38 sq. mi. (original townsite)
2 1893 Mount Royal and part of Mills Estates and Pearce Estates - Area not known
3 1901 Victoria Park - .14 sq. mi.
4 1903 Part of Burns Avenue - .08 sq. mi.
5 1906 Part of Grandview and Burns Avenue - .15 sq. mi.
6 1907 Hillhurst, Sunnyside, Westmount, Bridgeland, St. George Heights, Knob Hill, Bankview, South Calgary, Glencoe, Altadore, Rideau Park, Roxboro, Eriton, Burnsland and Inglewood - 9 sq. mi.
7 1910 Foothills, North Bow, part of Inglewood, part of Glamorgan/Glenbrook and Highfield - 24 sq. mi.
8 1911 Ogden, Lynwood, Millican Estates - 4.50 sq. mi.
9 1951 Windsor Park - .25 sq. mi.
10 1952 Part of Manchester - .25 sq. mi.
11 1953 West Thorncliffe, Airport - 7.50 sq. mi.
12 1954 Part of Glenpark, part of Glamorgan/Glenbrook, part of Richmond - 1.75 sq. mi.
13 1956 Part of Richmond, Strathcona, Lakeview, part of Glenpark, Blackfoot, Glenmore and Southland - 26.00 sq. mi.
14 1961 Varsity, Silver Springs, Dalhousie, Crowchild, Nose Hill Park, Thorncliffe, Saddle Ridge, Marlboro, Forest Lawn, Dover, Eastfield, Southeast Industrial, Riverbend, Barlow, Burnsmead, Bonavista, South Bonavista, Canyon Meadows, Livingston and Midnapore - 75.25 sq. mi.
15 1963 University Heights and Montgomery - 1.50 sq. mi.
16 1964 Bowness - 3.50 sq. mi.
17 1972 MacEwan Glen - .75 sq. mi.
18 1974 Road allowance known as 68 St. East - .17 sq. mi.
19 1975 Beddington Heights - 1.35 sq. mi.
20 1976 Hawkwood, Rundle and Abbeydale - 4.35 sq. mi.
21 1979 Beddington, Scenic Acres, Sundance and McKenzie - 25.60 sq. mi.
22 1981 Applewood, West Scenic Acres, Valley Ridge and Chapparal - 5.93 sq. mi.
23 1982 Research and Development Park - 2.59 sq. mi.
24 1983 Part of East McKenzie, part of Burlington - 7.17 sq. mi.

Airdrie

Population: 10,431.

Location: On Highway 2, 17 miles (28 km.) north of Calgary.

Street System: In the older part of town on the west side of the highway, streets run north and south and are named. Avenues run east-west from Centre Avenue to 6 Avenue N. and from Centre Avenue to 3 Avenue S. Odd numbers are on the south side of the avenues and on the west side of the streets. In the newer areas of town streets are named.

Transportation Facilities: Airdrie is on the CP Rail line but has no passenger rail service. Cardinal Coach provides bus service to and from Calgary twice daily and Greyhound has three buses daily each way to Calgary and two to and from Edmonton. There is no scheduled air service. Inter-city courier service is available.

History: Airdrie was first settled by railway workers building the Calgary and Edmonton Railway which was completed in 1891. The community was named by William McKenzie, an engineer with the railway, after a village near his home in Glasgow, Scotland. Airdrie was incorporated in 1909, and became a town in 1974.

Fort McMurray

Population: 34,494.

Location: On Highway 63, at the confluence of the Clearwater and Athabasca Rivers.

Street System: City streets are named not numbered.

Transportation Facilities: Fort McMurray is at the northern terminal of CN's Waterways subdivision (formerly the Northern Alberta Railway). The city has no passenger rail service but is served by two bus lines, Greyhound and Red Arrow, with bus service to and from Edmonton four times a day. Inter-city courier service is available. Both Pacific Western Airlines and Wapiti Aviation have scheduled flights between Fort McMurray and Edmonton. The number of flights varies each day.

History: The first white man to see the site of the present city was Peter Pond, an American explorer who came to the area in 1778. He was followed 30 years later by the Hudson's Bay Company which set up a trading post. John Moberly, a Hudson's Bay factor, named the fur trading post after Chief Factor William McMurray. Development in the area was spurred with the completion of the Alberta Great Waterways Railway in 1924 at Waterways, Alberta, a few miles from Fort McMurray (now part of the city). This gave Edmonton access to the province's northern resources. Fort McMurray was incorporated as a village in 1947, as a town in 1949 and achieved the status of new town in 1962 with the advent of tar sands development in the area. Fort McMurray became a city in 1980.

Grande Prairie

Population: 24,076.

Location: On Highway 2, 283 miles (456 km.) northwest of Edmonton.

Street System: Streets run north and south, from 89 Street in the east to 116 Street in the west, with odd numbers on the east side of the streets. Avenues run east and west, from 61 Avenue in the south to 132 Avenue in the north. Odd numbers are on the south side of the avenues.

Transportation Facilities: Grande Prairie is on the Grande Prairie subdivision of the CN, but has no passenger rail service. There are four buses daily to and from Edmonton. CP Air, Time Air and Wapiti Airlines all fly between Grande Prairie and Edmonton. Other points in Alberta served by air from Grande Prairie are Whitecourt, Grande Cache and Peace River. Inter-city courier service is available.

History: Settlers began arriving in Grande Prairie about 1908 as the area was promoted for its fertile farmland. The Canadian Northern Railway arrived in the area in 1916. The town was named by Father Emile-Jean-Marie Grouard, an Oblate, who described it as "la grande prairie." Grande Prairie was incorporated as a village in 1914, a town in 1919 and a city in 1958.

The irrigation districts

Over a million acres of land in southern Alberta are serviced by the province's 13 irrigation districts. Depending on rainfall and the type of crops seeded, between 75% and 90% of that land will be irrigated in a given year. Maximum water capacity of the system is two million acre-feet. The irrigation districts range in size from 3,000 acres to 300,000 acres, catering to approximately 5,900 farmers. Operation and maintenance costs are borne by the provincial government and the users. Alberta Environment pays for movement of the water from the rivers to the district and farmers pay for the service from the district to the farm gate. Capital works replacement costs in the districts are borne by the province and the water users, with the province bearing 86% of the costs and the users 14%.

The first irrigation projects in the province were built by individual settlers beginning in 1877 on small plots of land. Between 1898 and 1915 large company projects by the CPR and the coal mining Galt family were developed. In 1915, the Alberta government passed the Alberta Irrigation Districts Act which established farmer-owned and operated systems under the supervision of the provincial government. With rising costs after the Second World War, the federal and provincial governments began contributing capital and maintenance funds. It was during this period that the massive St. Mary River scheme was built. The provincial government took over the entire government portion in 1974.

It has been estimated that the irrigated area, which comprises 4% of Alberta's crop base, generates 20% of the province's agricultural production. The system also allows producers to grow specialty crops such as grain and feed corn, dry beans and sugar beets, which are difficult to grow elsewhere on the prairies.

Lethbridge

(Map on pages 102 and 103)

Population: 58,086.

Location: On Highway 3, 135 miles (217 km.) southeast of Calgary and 102 miles (164 km.) west of Medicine Hat.

Street System: Streets run north and south, from 1 Street in the west to 43 Street in the east, with odd numbers on the east side of the streets. Avenues run east and west, from 1 Avenue to 44 Avenue north of the railway tracks and from 1 Avenue to 30 Avenue south of the tracks. Odd numbers are on the north side of the avenues.

Transportation Facilities: Lethbridge is on the CP Rail line, but has no passenger rail service. Greyhound buses run five times a day between Lethbridge and Calgary and once daily to and from Medicine Hat. Time Air has four flights daily each way between Calgary and Lethbridge and two a day between Lethbridge and Medicine Hat, once a day to and from Vancouver. Inter-city courier service is available.

History: In 1869, American traders set up shop near the present site of Lethbridge to sell whisky to the Indians. The rowdy behaviour which resulted at "Fort Whoop-up," as it was called, led to the establishment of the North West Mounted Police in 1873. Later, the area became known as the Coalbanks after Nicholas Sheran began mining coal from the banks of the Belly (now the Oldman) River. Residents began calling the community Lethbridge, after the president of the North Western Coal and Navigation Company, William Lethbridge. Lethbridge was incorporated as a town in 1891 and as a city in 1906.

Medicine Hat

(Map on pages 106 and 107)

Population: 41,167.

Location: Beside the South Saskatchewan River on the Trans-Canada Highway, 182 miles (293 km.) southeast of Calgary and 102 miles (164 km.) east of Lethbridge.

Street System: Avenues run north and south from Division Avenue, the main north-south road, to 15 Avenue W. and from Division to 22 Avenue E. Streets run east and west, from 1 Street to 22 Street north of the river and from 1 Street to 32 Street south of the river. Odd numbers are on the east side of the avenues and the south side of the streets.

Transportation Facilities: Medicine Hat is on the CP main line with VIA passenger service once a day to and from Calgary. Greyhound buses run five times a day each way between Medicine Hat and Calgary and once daily to and from Lethbridge. Time Air has four flights a day to Calgary and two to Lethbridge. Inter- and intra-city couriers are available.

History: Medicine Hat was surveyed in 1883 by engineers for the CPR. The first settlers were men working on the building of the railway. The city's peculiar name is apparently taken from an incident which occurred between the Cree and Blackfoot Indians who were fighting on the banks of the river when the hat of the Cree medicine man fell into the river. This was such a bad omen the Cree fled and the Blackfoot were victorious. The site was known as "ford-where-the-medicine-man-lost-his-hat," later condensed to Medicine Hat. Medicine Hat was incorporated as a town in 1899 and as a city in 1907.

Red Deer

Population: 50,257.

Location: On the north bend of the Red Deer River and on Highway 2, 92 miles (148 km.) south of Edmonton and 90 miles (145 km.) north of Calgary.

Street System: Avenues run north and south from 30 Avenue in the east to 67 Avenue in the west with odd numbers on the east side of the avenues. Streets run east and west, from 28 Street in the south to 81 Street in the north, with odd numbers on the south side of the streets.

Transportation Facilities: Red Deer is on the CP Rail line between Calgary and Edmonton and has VIA Rail service twice a day to and from each. Greyhound and Pacific Western buses run eight times a day each way to Calgary and Edmonton. There is no scheduled air service but the city has an industrial airport capable of accommodating jets. Inter- and intra-city courier services are available.

History: The first homesteader and land title holder was Dr. Leonard Gaetz, who arrived in the area from eastern Canada in 1884. He gave part of his land to the Calgary and Edmonton Railway Company to build a station beside his farm. The name Red Deer was mentioned on maps by David Thompson in the early 1800s. The Cree name for the river was Waskasoo, which means elk, and it is believed that the explorer translated the word incorrectly. Red Deer was incorporated as a village in 1898, as a town in 1901 and as a city in 1913.

Banff

Population: 3,410.

Location: On the Trans-Canada Highway (Hwy. 1) 80 miles (128 km.) west of Calgary and 179 miles (288 km.) south of Jasper. The town is inside Banff National Park and is administered by the federal government.

Street System: Streets are named not numbered.

Transportation Facilities: Banff is on the CP main line and VIA Rail provides service once a day to and from Calgary and Vancouver. Buses run between Calgary and Banff daily. There is no scheduled air service. Inter-city courier service is available.

History: Frank McCabe and William McCardell, CPR employees, found the hot springs at Cave End Basin around 1883. The park, originally called Rocky Mountains Park, was the first national park in Canada and extended for about 10 square miles around the townsite. Banff, Scotland, was the birthplace of Donald Smith, a founder and promoter of the CPR.

Brooks

Population: 9,421.

Location: On the Trans-Canada Highway (Hwy. 1) 115 miles (185 km.) southeast of Calgary, and 69 miles (111 km.) west of Medicine Hat.

Street System: Streets run north and south, from Centre Street to 9 Street in the east and from Centre Street to 11 Street in the west. Even numbers are on the west side. Avenues run east and west, from 1 Avenue in the south to 13 Avenue in the north, with even numbers on the north side.

Transportation Facilities: Brooks is situated on the CP main line and has VIA Rail passenger service to and from Calgary once a day. Greyhound buses run four times a day to Calgary and five times daily from Calgary. There is no scheduled air service. Inter-city courier service is available.

History: The Crooker family, ranchers from Winnipeg, settled in Brooks in 1904, setting up a grocery store near the stockyard. They later added a hotel and cafe. The village was incorporated in 1910 and became a town the following year. Brooks was named after Noel Edgell Brooks, a divisional engineer for the CPR.

Camrose

Population: 12,809.

Location: On Highway 13, 58 miles (94 km.) southeast of Edmonton and 171 miles (275 km.) northeast of Calgary.

Street System: Streets run north and south, from 37 Street in the east to 75 Street in the west, with odd numbers on the west side. Avenues run east and west, from 34 Avenue in the south to 55 Avenue in the north, with odd numbers on the south side.

Transportation Facilities: Camrose is on the Camrose subdivision of the CN rail line and the Wetaskiwin subdivision of the CP line but has no passenger rail service. Buses to Edmonton and Calgary run three times daily. Inter-city courier service is available. There is no scheduled air service.

History: Camrose was first settled by Norwegian homesteaders in 1903, one of the first being a bachelor named Ole Bakken who farmed near the present-day courthouse. The village was originally called Sparling, but the name was changed to Camrose to avoid confusion with several other towns of the same name. The name "Camrose" ~~is taken from~~ a community ~~of the same name~~ in Britain and means "Valley of the Roses." Camrose was incorporated as a village in 1905, a town in 1906, and a city in 1955 for its 50th anniversary.

Municipality of Crowsnest Pass

Population: 7,577.

Location: On Highway 3 in the Crowsnest Pass through the Rocky Mountains, 134 miles (216 km.) south of Calgary.

Street System: In all communities except Bellevue and Hillcrest Mines, streets run north and south, from 56 Street in the west to 153 Street in the east. Avenues run east and west from 4 Avenue in the south to 29 Avenue in the north. Odd numbers are on the north side of avenues and the east side of the streets.

In Bellevue and Hillcrest Mines streets run east and west, from 205 Street in the north to 233 Street in the south. Avenues run north and south from 4 Avenue in the west to 31 Avenue in the east. Odd numbers are on the south side of the streets and the east side of avenues.

Transportation Facilities: The municipality is located on the CP Crowsnest line, but has no passenger rail service. Buses run between Calgary and Crowsnest Pass twice daily. There is no scheduled air service. Inter-city courier service is available.

History: In 1979 the communities of Bellevue, Hillcrest Mines, Blairmore, Frank and Coleman were amalgamated to form the Municipality of Crowsnest Pass. The history of each is given with its map.

Bellevue

Bellevue (population 1,231) was established by a French engineer, J.J. Fleutot, who came to Canada in the early 1900s to look for coal. He formed the Western Canadian Collieries in 1903 and set up a mine and townsite. The town was named by his daughter Elise who upon first seeing the site exclaimed, "Quelle belle vue." (What a beautiful scene!) Much of the town was destroyed by fire in 1917.

Hillcrest Mines

Hillcrest Mines (population 789) was built in 1905 by Hillcrest Coal and Coke, an American company owned by Charles Plummer Hill. The company town had a main street 80 feet wide. A railway owned by the Hillcrest Collieries ran through town. The Hillcrest mine explosion in 1914 killed 189 men. Another explosion in 1926 rocked the community but no one was killed. The mine shut down in 1939.

See Coleman Map

See Frank Map

Blairmore

Blairmore (population 2,476) was the first settlement in the Crowsnest Pass. The community was the Tenth Siding of the Canadian Pacific Railway when the line was built through the Pass in 1898. The first two settlers were H.E. Lyon, the CPR station agent, and Felix Monalbetti, a section foreman. The community was named Blairmore after A.G. Blair, the federal minister of highways at the time. Blairmore was incorporated as a village in 1901.

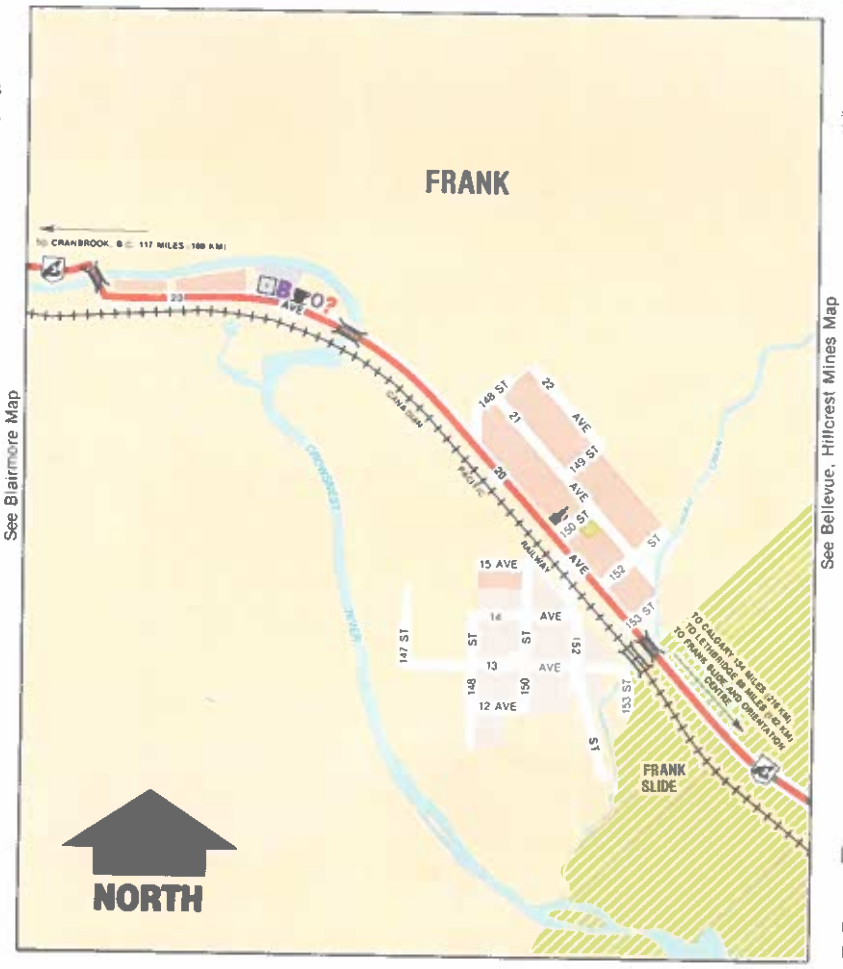
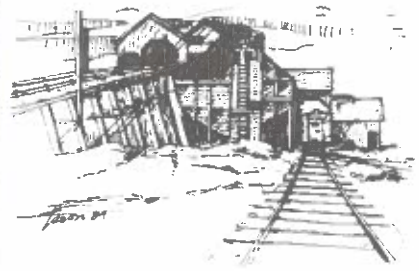
See Blairmore Map



See Bellevue, Hillcrest Mines Map



Frank

One of the first settlers in what is now Frank (population 188) was S.W. Gebo, who arrived about 1900 to look for coal property. He met up with one A.L. Frank from Montana who bought land from Gebo and set up a coal mine. The town opened in 1901. Disaster struck two years later when the great Frank Slide buried the south side of the town, killing about 70 people. The mine continued to produce until 1917 when it was shut down. Frank is now a residential community.

Coleman

Coleman (population 2,893) was set up in 1903 by the International Coal and Coke Co. which began selling lots to prospective miners in 1903. The deeds restricted the sale of liquor for 15 years. The town was named after Coleman Flummerfelt, daughter of the president of the International Coal and Coke Co. Coleman was incorporated as a village in 1904 and as a town in 1910. In the past 50 years the town's two mines have produced 25 million tons of coal and almost 2 million tons of metallurgical coke.

Drayton Valley

Population: 4,867.

Location: On Highway 39, 86 miles (138 km.) southwest of Edmonton and 188 miles (303 km.) northwest of Calgary.

Street System: Streets run north and south, from 37 Street in the east to 80 Street in the west. Odd numbers are on the east side of the street. Avenues run east and west, from 41 Avenue in the south to 56 Avenue in the north with odd numbers on the north side.

Transportation Facilities: The town is not on a rail line and has no scheduled air service. Buses run once daily to Calgary and Edmonton. Inter-city courier service is available.

History: Drayton Valley is primarily an oil service centre. Before 1911, the site was called Power House because of a proposed project (never built) to dam the North Saskatchewan River. In 1911, the name was changed to Drayton Valley, after the British home town of the Drake family who ran the local post office. With the Alberta oil boom, population in the tiny community soared from 75 people in 1953 to 2,000 in 1954.

Drumheller

Population: 6,671.

Location: Beside the Red Deer River on Highway 9 in Alberta's Badlands, 86 miles (138 km.) northeast of Calgary and 176 miles (283 km.) southeast of Edmonton.

Street System: Streets run north and south, from Centre Street to 19 Street in the east and from Centre Street to 25 Street in the west. Odd numbers are on the west side of the streets. Avenues run east and west, from 4 Avenue in the north to 12 Avenue in the south, with odd numbers on the south side of the avenues.

Transportation Facilities: Drumheller is on the CN rail line but has no passenger rail service. Buses run twice daily each way between Drumheller and Calgary and once daily between Drumheller and Edmonton. There is no scheduled air service. Inter-city courier service is available.

History: One of the first settlers in the area was Thomas Greentree, a rancher. The city took its name from one Samuel Drumheller, who came to the Alberta coalfields and opened a mine in Drumheller in 1918. Drumheller was incorporated as a city in 1930.

Edson

Population: 7,329.

Location: On Highway 16, 124 miles (199 km.) west of Edmonton, and 102 miles (164 km.) east of Jasper.

Street System: Streets run north and south, from 40 Street in the east to 59 Street in the west. Avenues run east and west, from 1 Avenue (Railway Avenue) in the south to 18 Avenue in the north. Odd numbers are on the east side of the streets and south side of the avenues.

Transportation Facilities: Edson is on the CN rail line and has VIA Rail service from Edmonton and Jasper three times a week. Greyhound buses run three times a day between Edson and Edmonton. There is no scheduled air service but there is a private heliport which serves the coal and petroleum industry. Inter-city courier service is available.

History: The Edson site came about in the race between the Grand Trunk Pacific and Canadian Northern Railways for construction of a line through the Yellowhead Pass. In 1909, the GTP beat CN and planned to establish its mountain divisional point 18 miles east of what is now Edson. Speculators had driven up the price of land at that spot, however, so the flag was planted instead in muskeg at a site called Heatherwood. The town was renamed Edson after Edson J. Chamberlain, general manager of the GTP. Edson was incorporated as a village in January 1911, and as a town in September of 1911.

Hinton

Population: 8,825.

Location: On Highway 16, the Yellowhead Highway, 178 miles (286 km.) west of Edmonton.

Street System: Streets in the town are named, with odd numbers on the south and west sides of the streets and even numbers on the north and east sides of streets.

Transportation Facilities: The town is located on the CN main line. Via Rail passenger service runs three times a week to Edmonton eastward and Jasper and Prince Rupert westward. There are three buses daily from Hinton to Edmonton and four from Edmonton to Hinton. There is no scheduled air service. Inter-city courier service is available.

History: One of the first white men to see the site of present-day Hinton was the explorer David Thompson, who ascended the Athabasca River past Hinton in 1810. A century later, in 1911, the Grand Trunk Pacific Railway was completed to Hinton and the town was named after W.D. Hinton, one of the railway company's general managers. In 1956, the province's first pulp mill, operated by St. Regis Paper Company, was opened in Hinton. Hinton was incorporated as a town in 1958.

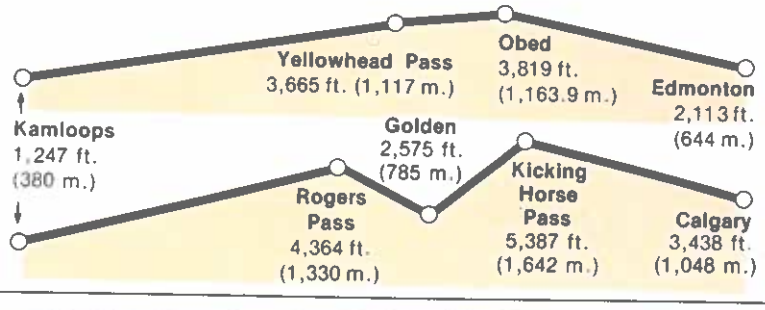
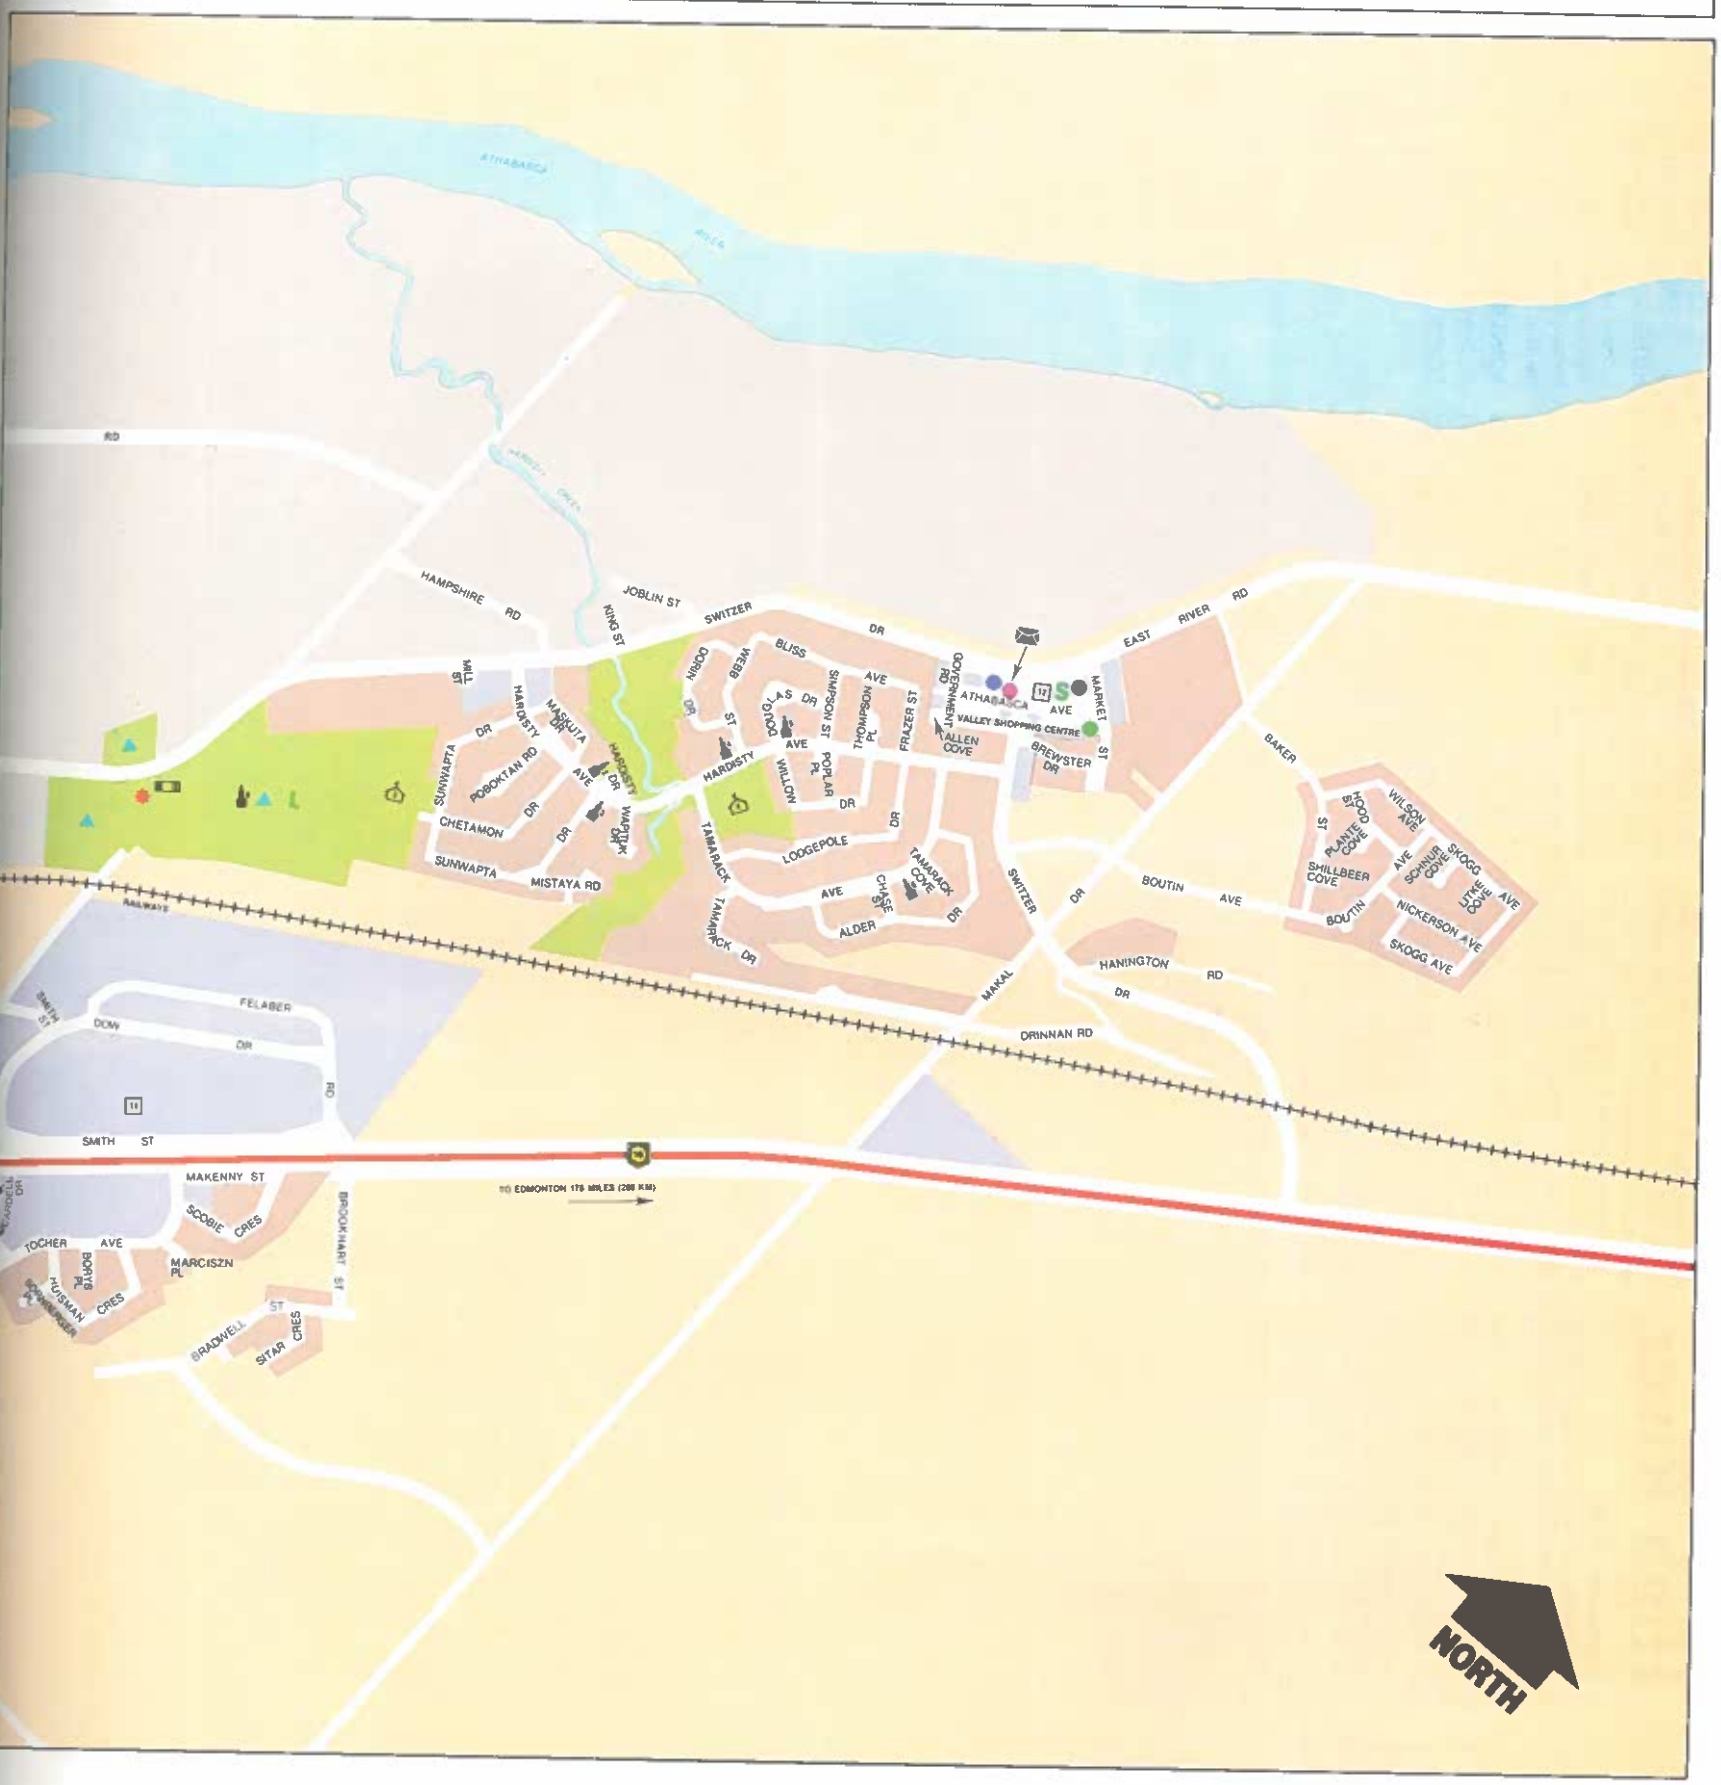
Elevations on the Yellowhead and Trans-Canada Highways



The Yellowhead Highway extends from Winnipeg to Prince Rupert, B.C., with a southern arm to Kamloops, a total of 1,998 miles (3,216 km.). The highest point of the highway occurs, not in the mountains, but between Hinton and Edson at Obed.

The Trans-Canada Highway which takes the southern route through the mountains has considerably higher elevations. In a 268-mile (431 km.) stretch from Kamloops to Kicking-Horse Pass, the highway rises 4,140 ft. (1,262 m.). In the Selkirk range, the Rogers Pass section of the highway rises 2,992 ft. (912 m.) in approximately 30 miles (48 km.).



High River

Population: 5,049.

Location: The town of High River is located 35 miles (56 km.) south of Calgary on Highway 2A.

Street System: Streets run north and south from 1 Street E. to 24 Street E., east of the railway tracks, and from 1 Street W. to 12 Street W., west of the railway tracks. Odd numbers are on the west side of the streets. Avenues run east and west, from 1 Avenue S. to 12 Avenue S. on the south side of the river and from 1 Avenue to 4 Avenue north of the river. Odd numbers are on the south side of the avenues.

Transportation Facilities: The town is located on the CP Rail line but has no passenger rail service. There are five buses daily to Calgary and four a day from Calgary to High River. Inter-city courier service is available. There is no scheduled air service.

History: High River was originally called "The Crossing" because it was a convenient spot to cross the Highwood River. The first couple to settle there were Katy and John Quirk who drove their herd of cattle from Montana in 1882, built a log cabin and settled at High River. High River was incorporated as a village in 1901 and as a town in 1906. Former Prime Minister Joseph Clark was born in High River.

Innisfail

Population: 5,444.

Location: On Highway 2, 72 miles (116 km.) north of Calgary and 111 miles (178 km.) south of Edmonton.

Street System: Streets run east and west, from 34 Street in the south to 59 Street in the north. Odd numbers are on the south side of the streets. Avenues run north and south, from 43 Avenue in the east to 57 Avenue in the west, with odd numbers on the west side of the avenues.

Transportation Facilities: Innisfail is located on the CP Rail line between Edmonton and Calgary and has VIA Rail service to both those centres twice a day. Buses run three times a day to each city as well. Inter-city courier service is available. There is no scheduled air service but there is a private airstrip.

History: Napoleon Remillard established a stopping house at what was then called Poplar Grove in 1883. The town was named from the hometown in Ireland of the grandparent of an early resident who liked the sound of the name. It means "Isle of Destiny." Innisfail was incorporated as a village in 1896 and as a town in 1903.

Jasper

Population: 3,404.

Location: Beside the Athabasca River in Jasper National Park on Highways 16 and 93, 225 miles (362 km.) west of Edmonton and 256 miles (412 km.) northwest of Calgary.

Transportation Facilities: This resort centre has VIA Rail service three times a week to and from Edmonton and Prince Rupert. There are three buses daily between Edmonton and Jasper and during the summer there is daily bus service to Banff. There is no scheduled air service. Inter-city courier service is available.

History: The area around Jasper was declared a federal preserve in 1907, when both the Grand Trunk Pacific and the Canadian Northern Railways were planning lines to the west coast through the Yellowhead Pass for which Jasper is the eastern access. The GTP line came through in 1911 followed two years later by the CN. In 1913 the townsite was surveyed. One early settler to the area, Lewis John Swift, a farmer located outside the town but in the park, refused to sell to the government and his land remained freehold until 1962 when the rights reverted to the federal government. Jasper was named after Jasper Hawes who set up a fur trading post in the area about 1817. The town is not incorporated and is administered by the federal government under Parks Canada.

Lacombe

Population: 5,723.

Location: On Highway 2A, 79 miles (128 km.) south of Edmonton and 103 miles (166 km.) north of Calgary.

Street System: Streets run north and south, from 47 Street in the east to 64 Street in the west with odd numbers on the east side. Avenues run east and west from 43 Avenue in the south to 55 Avenue in the north with odd numbers on the south side.

Transportation Facilities: Greyhound buses run four times daily between Edmonton and Lacombe and five times a day to and from Calgary. Lacombe is on the CP Calgary-Edmonton line but has no passenger rail service. Inter-city courier service is available.

History: Lacombe was first settled in 1883 by Ed Barnett, an ex-North-west Mounted Police officer, who set up a stopping house between Edmonton and Calgary. Officials of the CPR renamed siding 17 Lacombe in memory of Father Albert Lacombe who worked with the Indians to allow the railway to be built. Lacombe was incorporated as a village in 1896 and as a town in 1902.

Lloydminster

Population: 15,232.

Location: On Highway 16, 155 miles (250 km.) east of Edmonton, straddling the border between Alberta and Saskatchewan.

Street System: Streets run east and west, from 25th in the south to 60th in the north with odd numbers on the south side of the streets. Avenues run north and south, from 45th in the east to 63rd in the west with odd numbers on the east side. The main north-south road is 50th Avenue or Meridian which is also the provincial boundary.

Transportation Facilities: Located on both the CN and CP rail lines, but has no passenger rail service. Buses between Lloydminster and Edmonton run five times daily. There is no scheduled air service. Inter- and intra-city couriers are available.

History: Lloydminster was settled in 1903 by a group of British settlers led by the Reverend Isaac Barr and his English Missionary Society. Two thousand people left Great Britain for Canada with Barr. The group split up in Saskatchewan with 500 following the Reverend George Lloyd to the site of Lloydminster. In 1905 the provinces of Alberta and Saskatchewan were created, with the boundary established at the 4th Meridian which cut through the centre of the community. The two halves operated as separate municipalities with their own councils and police forces until 1930, when they were incorporated as one city.

Lloydminster
Canada's bi-provincial city

The city of Lloydminster is unique in North America because it in effect exists legally in two provinces at the same time. There are many examples of "twin cities" (Ottawa and Hull, Minneapolis and St. Paul), but in those cases two separate corporate bodies exist. What's unique about Lloydminster is that there's only one and it's recognized by both provinces.

When the provinces of Saskatchewan and Alberta were created out of the Northwest Territories in 1905, most of the settlement at Lloydminster was on the east side of the fourth meridian, in Saskatchewan. The new provincial boundary thus created the Town of Lloydminster, Saskatchewan, and a village of Lloydminster, Alberta. The two had separate elections for mayor and councillors and separate police and fire departments with no jurisdiction outside their own municipal borders.

They remained separate for 25 years when the awkwardness and additional expense of duplication led officials in each community to request the provincial governments to amalgamate the communities into one city. In 1930 both legislatures passed laws incorporating the city of Lloydminster, Saskatchewan-Alberta.

For city administrators, however, such a hybrid creature means four times the paperwork as they fill out and file forms and keep records for two masters. Programs which apply in one province do not necessarily apply in the other and officials run back and forth trying to work out schemes to serve all the residents. There is no blanket policy between the two provinces on how to deal with Lloydminster so each new program unveiled by either results in meetings, negotiations and pleadings with the governments.

For residents of Lloydminster life can be confusing. About 60% of them now live on the Alberta side of the border. The Alberta liquor store outsells its Saskatchewan counterpart because of cheaper prices, except during Alberta's frequent beer strikes. Hotels on the Alberta side of town serve 18 year olds. In Saskatchewan one has to be 19 to drink legally.

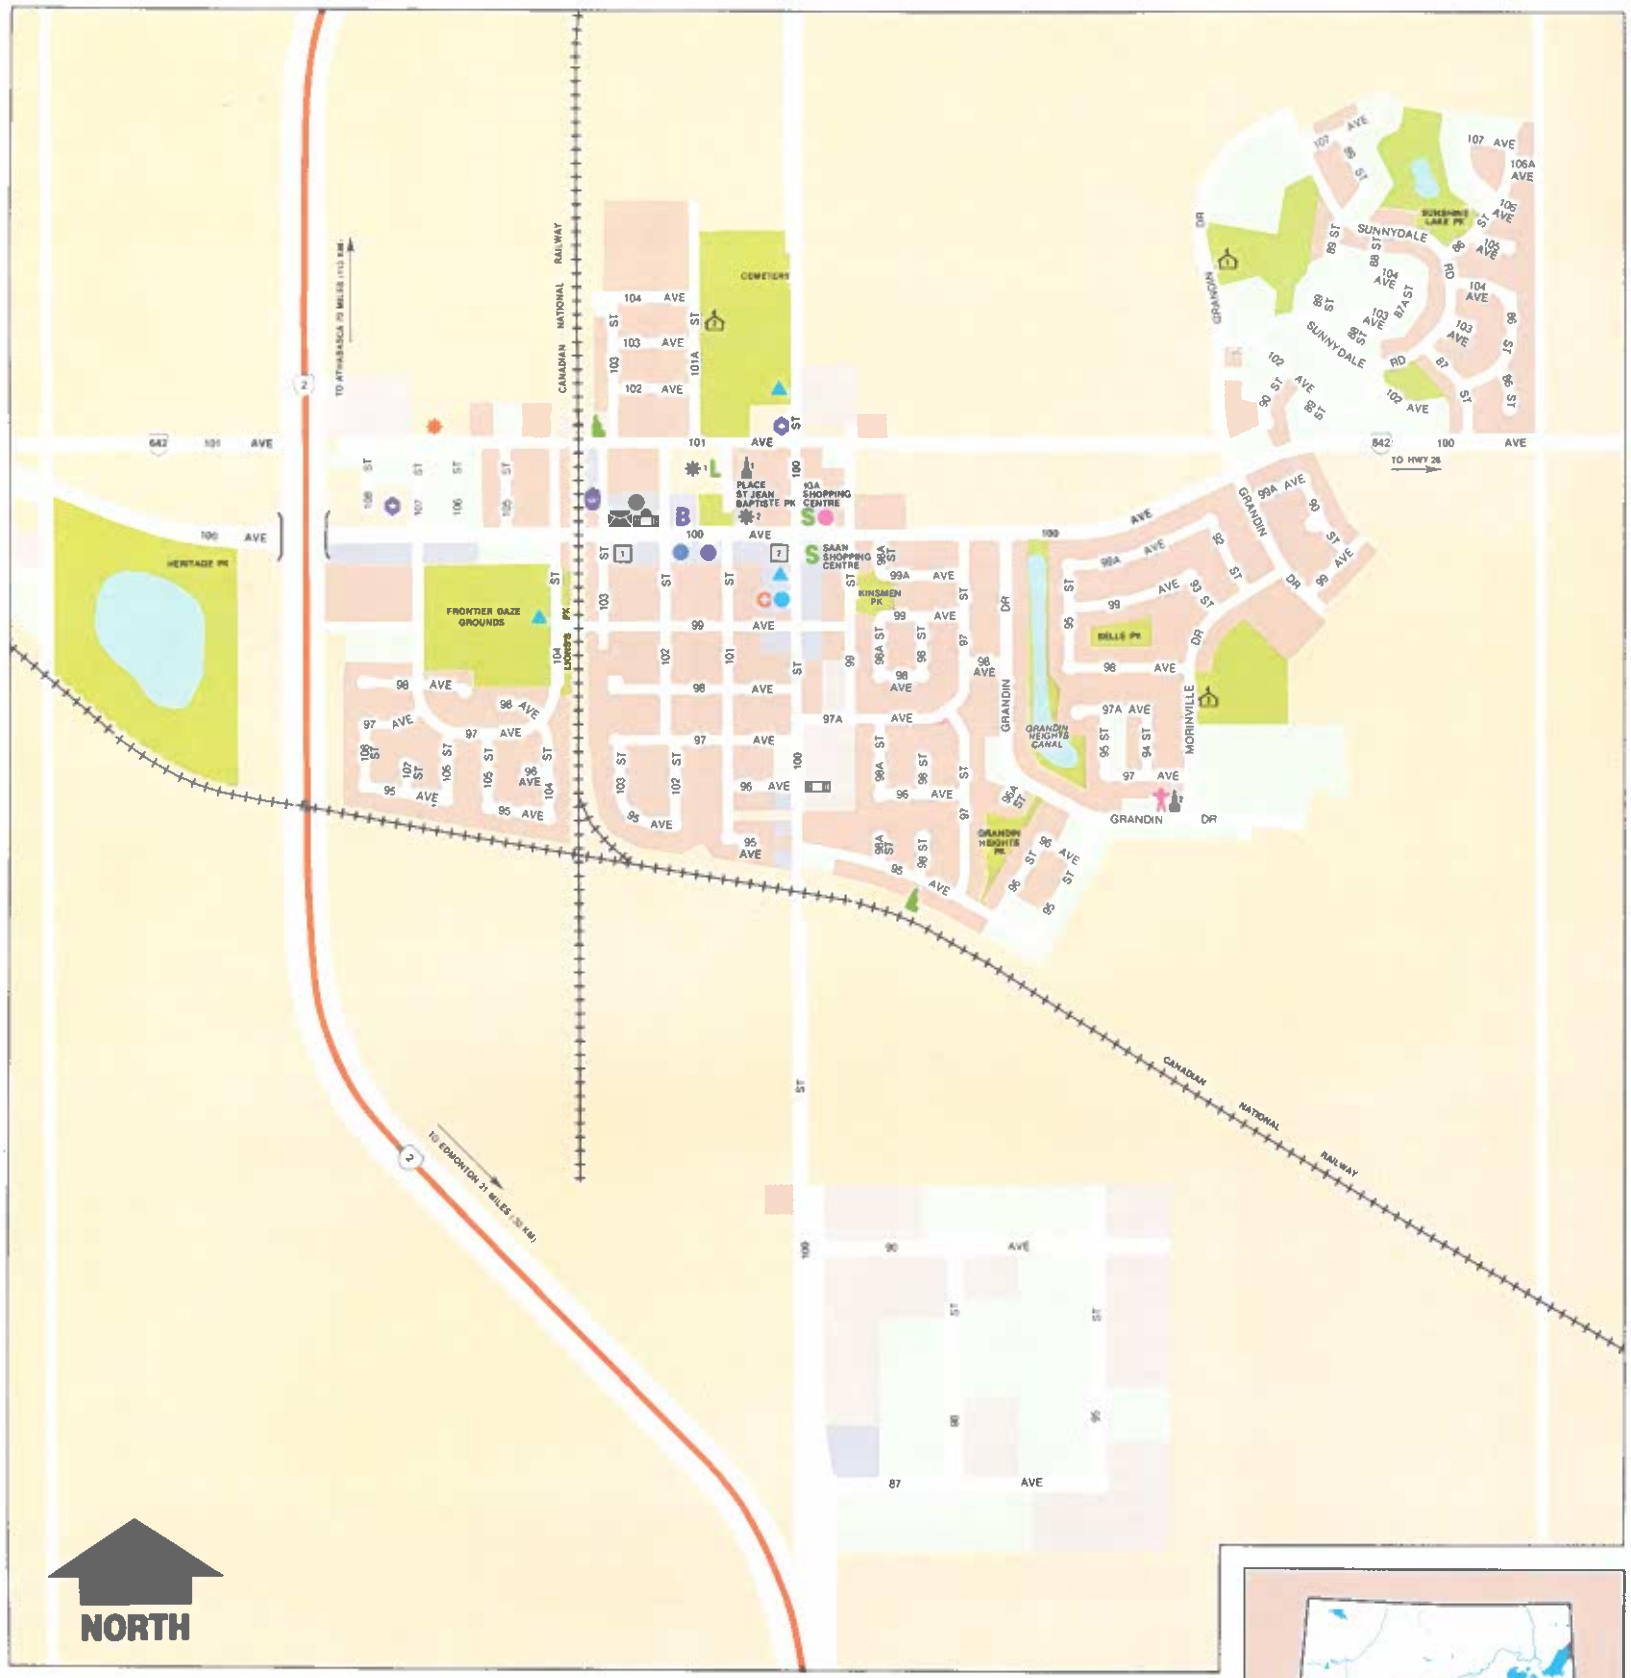
People who work in Saskatchewan are eligible for a minimum wage of $4.35 an hour and three weeks vacation after one year. Albertans aren't so fortunate. Their minimum is $3.85 with two weeks holidays after one year. The trick, say some locals, is to live in Alberta, where income tax is lower, but to work in Saskatchewan where the benefits are better.

Sales tax is another confusion. Technically, Saskatchewan retailers are obliged to charge a 5% health and education tax on all goods purchased and consumed in Saskatchewan. The administrative nightmare and higher prices mean that most don't do it—except on high-priced goods like cars and major appliances. Instead they estimate what they owe the province and send a cheque to Regina or they just don't pay.

All telephones are serviced by Alberta Government Telephones but power is provided by both Alberta Power and Saskatchewan Power. However, Alberta residents get a rebate on power bills from Alberta Power so that rates vary wildly throughout the city.

Housing prices are higher on the Alberta side since more people want to live there. During the boom years in the late '70s, prices varied by as much as one-third. The province of Alberta charges a monthly fee for health care while Saskatchewan does not, but the city's hospital is located in Saskatchewan.

With all the confusion and additional expense of operating (estimated by one city official at almost double the cost of other cities) one wonders why the city wouldn't be declared the property of one province or the other. Never, says a local resident. Citizens of Saskatchewan do not want to give up their status nor do Albertans. They like it this way.



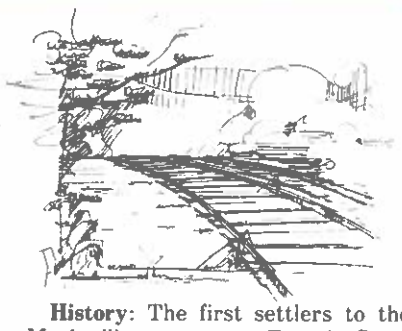
Morinville

Population: 5,109.

Location: 21 miles (33 km.) north of Edmonton on Highway 2.

Street System: Streets run north and south, from 86th in the east to 108th in the west with odd numbers on the east side of the streets. Avenues run east and west, from 87th in the south to 107th in the north, with odd numbers on the south side of the avenues.

Transportation Facilities: On the CN rail line but has no passenger rail service. There is no scheduled air service. Buses run three times daily to and from Edmonton. Inter-city courier service is available.



History: The first settlers to the Morinville area were French Canadians from Quebec brought to Alberta by Abbe Jean-Baptiste Morin, an Oblate missionary, who convinced them that a better life was to be had in the West. Named after the abbe, Morinville was incorporated as a village in 1905 and as a town in 1911.

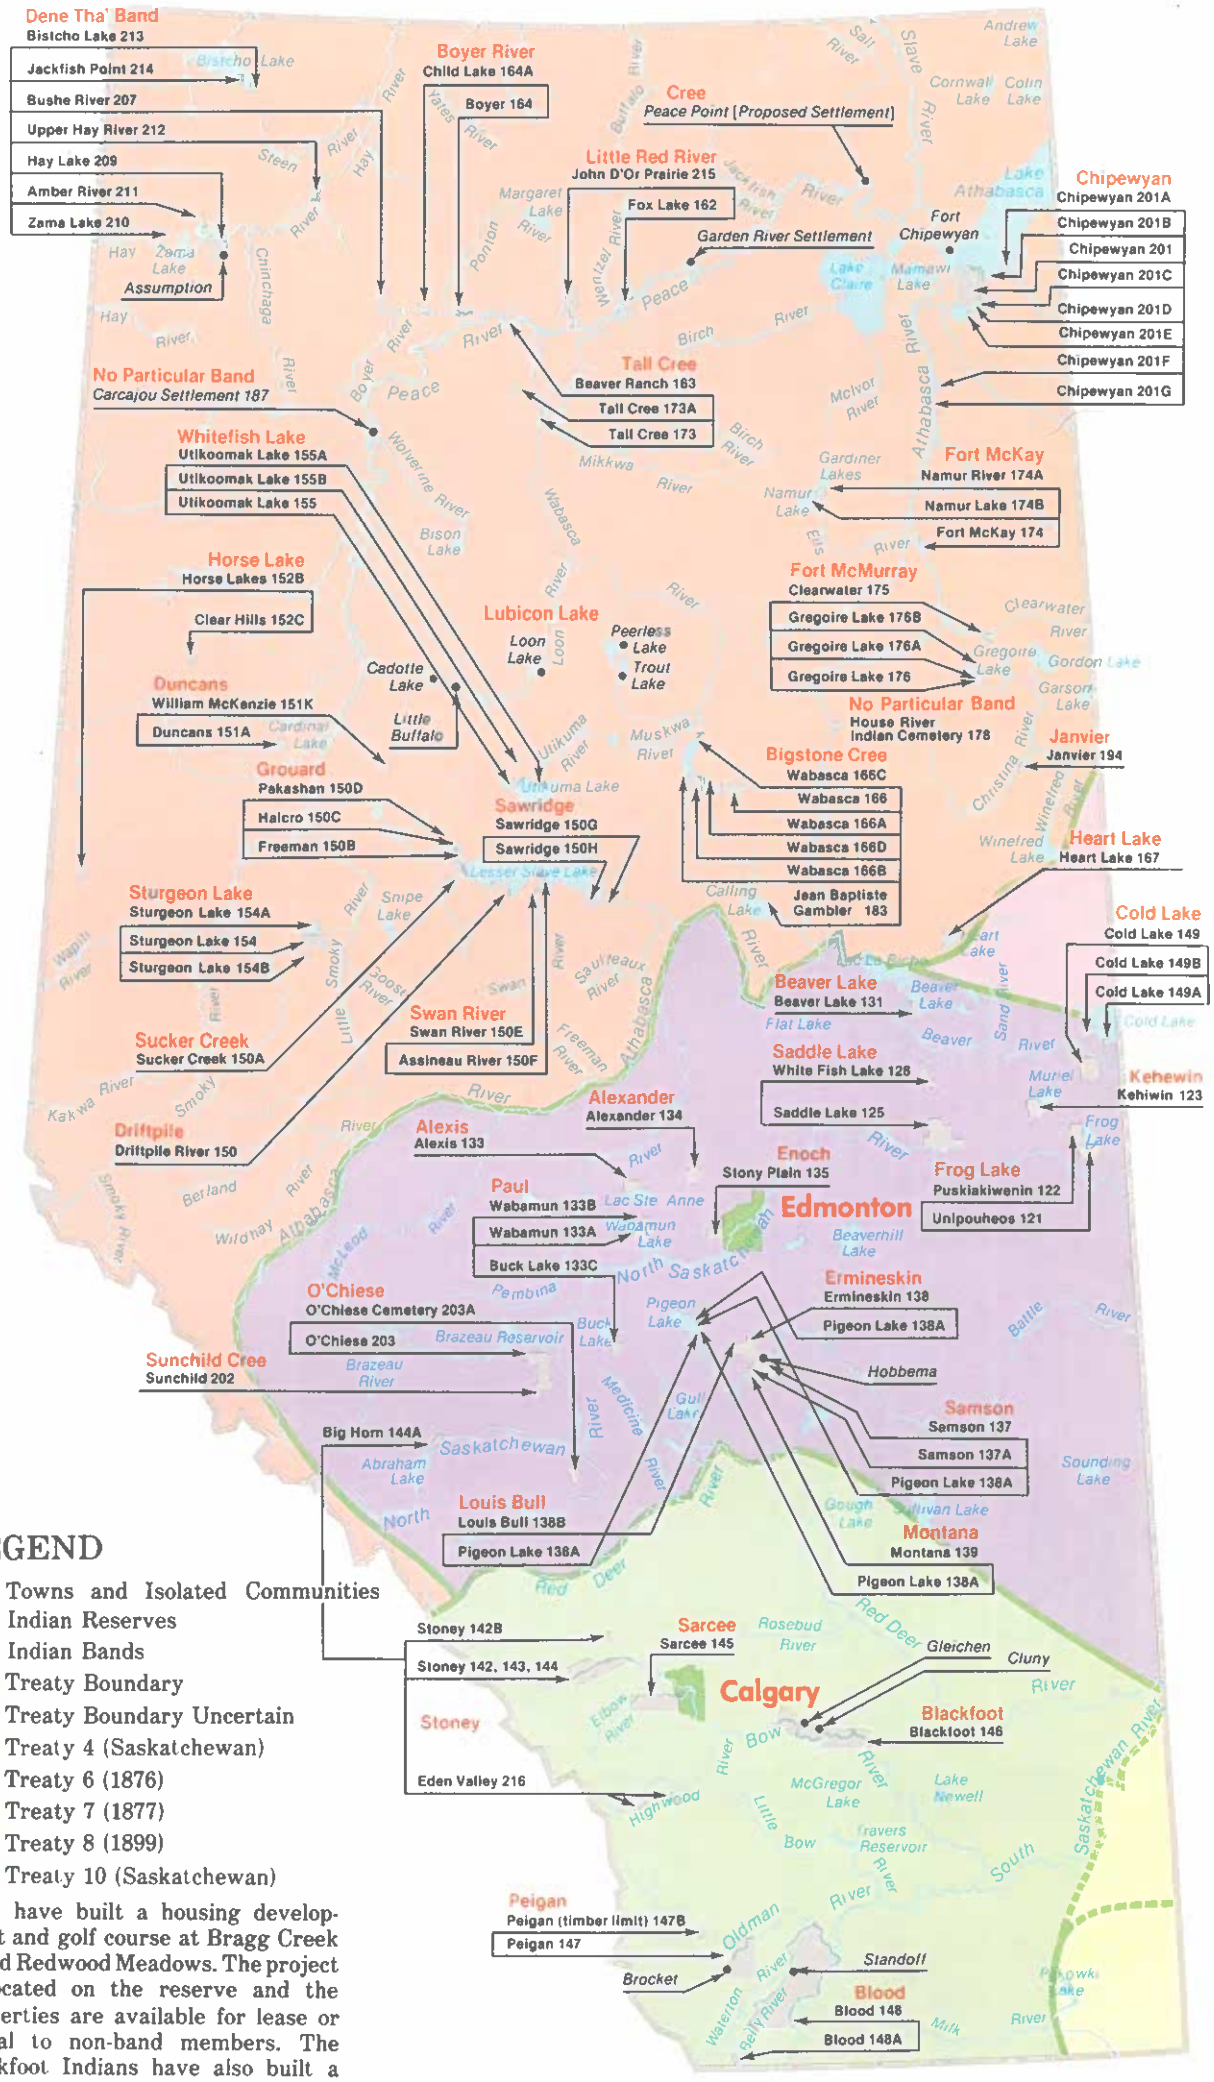
Indian bands, reserves and treaty areas

The Canadian government bought Rupert's Land from the Hudson's Bay Company in 1870. The government needed title to the land in order to build the Pacific railway, which necessitated treaties with the Indians. They signed three treaties in Alberta: Treaty 6 covering central Alberta in 1876, Treaty 7 covering southern Alberta in 1877, and Treaty 8 covering northern Alberta in 1899. In exchange for surrendering their rights to the land, the Indians were given reserves on a location of their own choice on the basis of five people per square mile and certain other privileges. The reserves were surveyed and more or less permanent boundaries were established. However, the government did have the right to expropriate land for roads and the Indians themselves could vote to surrender land, which they were often pressured to do between 1907 and 1920.

The original reserves were established on the basis of the existing Indian population. Since that time growth of some bands has led to overcrowding and disputes with the federal government over the treaties. In addition, there are arguments over whether the existence of the treaties quashes aboriginal rights, particularly since many of the band chiefs who signed the agreements did not understand what they were doing.

As of November 1983, there are 42,256 treaty Indians in the province of Alberta. They are divided into 41 bands occupying 1.62 million acres on 92 reserves. The largest band in the province is the Blood band in southern Alberta with a population of 6,015. The smallest is the Sawridge, located near the town of Slave Lake, with 41 members. Most bands are governed by a chief and council elected by the band members every two years. However, there are three bands in the province, the Dene Tha' in the northwest, the Heart Lake band near Cold Lake and the Grouard band in the Peace River area, which are run by chiefs elected for life. In the case of the Dene Tha', Chief Harry Chonkolay has been in charge since 1938.

Twenty-three reserves in the province obtain revenue from resources which amount to about $200 million annually. The four bands at Hobbema, the Ermineskin, Louis Bull, Montana and Samson, are the wealthiest in the province. The money obtained from resources is held in trust by the federal government and can be used for a variety of projects with government approval. For example, the Hobbema group has built a furniture factory and owns a semi-professional hockey team. The Sarcee Indians near Calgary have built a housing development and golf course at Bragg Creek called Redwood Meadows. The project is located on the reserve and the properties are available for lease or rental to non-band members. The Blackfoot Indians have also built a summer housing development and golf course called Siksika Vacation Resort just south of Cluny on the Bow River.



Peace River

Population: 6,043.

Location: 301 miles (485 km.) northwest of Edmonton on Highway 2.

Street System: Streets run north and south, from 73rd in the west to 103rd in the east with even numbers on the west side of the streets. Avenues run east and west, from 70th in the north to 116th in the south with even numbers on the north side of the avenues.

Transportation Facilities: The town is situated on the CN rail line but has no passenger rail service. Pacific Western Airlines and Time Air provide scheduled air service to Edmonton daily except Saturday. Inter-city courier service is available.

History: In 1793, Sir Alexander Mackenzie passed through the Peace River area on his trek to the Pacific, the first European to do so. Before 1900 the area was a centre for the fur trade and missionaries; then a publicity campaign across North America attracted homesteaders to the area, many from the United States. Peace River was incorporated as a village in 1914 and as a town in 1919.

Ponoka

Population: 6,043.

Location: On Highway 2A, 65 miles (104 km.) south of Edmonton and 122 miles (197 km.) north of Calgary.

Street System: Streets run north and south, from 38th in the east to 67th in the west, with odd numbers on the east side. Avenues run east and west, from 35th in the south to 63rd in the north, with odd numbers on the south side.

Transportation Facilities: Ponoka is on the CP Rail line but has no passenger rail service. Buses to Edmonton run five times a day and to Calgary three times daily. There is no scheduled air service. Inter-city courier service is available.

History: Ponoka was originally Siding 14 on the CPR which was built through in 1891. In 1895 Fredric Edward Algar and his father Charles Duncan Algar arrived in the area from Ontario and rented the CPR station house from which they ran a store. C.D. Algar also built the first home in Ponoka in the same year. The name Ponoka is the Blackfoot Indian name for elk which were plentiful in the region. Ponoka was incorporated as a town in 1904.

St. Paul

Population: 4,963.

Location: On Highway 28, 129 miles (208 km.) northeast of Edmonton.

Street System: Streets run north and south, from 39th in the east to 57th in the west, with odd numbers on the east side of the streets. Avenues run east and west, from 44th in the south to 57th in the north, with odd numbers on the south side.

Transportation Facilities: On the CN rail line but has no passenger rail service. Buses travel to and from Edmonton twice daily. There is no scheduled air service. Inter-city courier service is available.

History: St. Paul des Metis was established in 1896 as a Metis settlement and mission by the Oblate fathers of Quebec after an earlier Metis colony was wiped out by disease. In 1909 it was opened to white settlers and 500 people stood in line at the Edmonton land office to apply for homesteads. St. Paul des Metis acquired village status in 1912; it was incorporated as a town in 1936, and the name was changed to St. Paul.

Alberta's Metis settlements

In 1885 a Metis rebellion in Saskatchewan was crushed by central Canadian troops. With their capital Batoche captured and their leader Louis Riel executed, many Metis drifted west into Alberta.

The Ottawa government found an inexpensive measure to placate their need for land. Scrip was issued to all Metis entitling each individual to a quarter section homestead. Some did become successful settlers but far more did not. Most Metis lacked the training, equipment and motivation required to transform raw bush and prairie into profitable farms.

In 1896 the Roman Catholic Church tried to remedy this situation. Receiving a federal lease on four townships in northeast Alberta, the church drew 50 families to its settlement, St. Paul des Metis. Again some individuals prospered but the majority did not. In ~~1910~~ 1906 the Ottawa administration opened unoccupied lands in the settlement to all comers.

Metis poverty during the 1930s shocked the provincial government into action. After heavy lobbying by what was then called the "Half-Breed Association of Alberta," the province in 1939 set aside substantial tracts of land for their use.

Each of the nine parcels was placed in the jurisdiction of a settlement association. Membership in these associations is open to adults with at least one Indian grandparent and five years' residence in Alberta. Settlement land cannot be sold to outsiders. These settlements are governed by elected councils with powers similar in many respects to those of municipalities.

One settlement, Wolf Lake, was revoked by government order in 1960, the area being transformed into the Cold Lake Air Weapons Range. The lands of the remaining eight total 1.25 million acres. Approximately 4,000 Metis form the total population in these settlements.

Stettler

Population: 5,136.

Location: On Highways 12 and 56, 115 miles (185 km.) southeast of Edmonton and 143 miles (230 km.) northeast of Calgary.

Street System: Streets run north and south, from 40th in the east to 74th in the west, with odd numbers on the east side. Avenues run east and west, from 35th in the south to 53rd in the north, with odd numbers on the south side.

Transportation Facilities: Stettler is on both the CN and CP rail lines but has no passenger rail service. Buses run once daily to Edmonton and Calgary. There is no scheduled air service. Inter-city courier service is available.

History: Stettler was originally a Swiss farming settlement called Blumenau, established around the turn of the century. A pause in construction of the CPR in 1905 encouraged growth there. Carl Stettler, the Blumenau postmaster who built a hotel and store there, gave his name to the village which was incorporated in 1905. It became a town in 1906.

Population: 5,988.

Location: On Highways 3 and 36, 165 miles (266 km.) southeast of Calgary.

Street System: Streets run north and south, from 46 Street in the west to 64 Street in the east, with odd numbers on the east side. Avenues run east and west, from 36 Avenue in the south to 64 Avenue in the north, with odd numbers on the north side of the avenues.

Transportation: Taber is on the CP Rail line but has no passenger rail service. Buses run twice daily to Calgary and twice daily to Medicine Hat. There is no scheduled air service. Inter-city couriers are available.

History: Taber was originally Watertank No. 77 on the CPR line. In 1901 the area was opened up to homesteaders and attracted settlers from the U.S. and eastern Canada, many of them Mormons. James Hull, who arrived from the U.S. in 1902 with his brothers, built the first homestead in 1903. The name "Taber" was taken from "tabernacle" reflecting the religious influence of the Mormons. The original spelling when the village was incorporated in 1905 was "Tabor" after Mount Tabor. This was changed to the current spelling when Taber was incorporated as a city in 1906.

Vegreville

Population: 5,251.

Location: On Highway 16, 63 miles (101 km.) east of Edmonton.

Street System: Streets run north and south, from 43rd in the east to 75th in the west, with odd numbers on the east side. Avenues run east and west, from 41st in the south to 61st in the north, with odd numbers on the south side.

Transportation Facilities: Vegreville is situated on the CN rail line and has no passenger rail service. There are buses three times a day each way between Vegreville and Edmonton. There is no scheduled air service. Inter-city courier service is available.

History: Vegreville was established in 1895 by a group of French settlers from Kansas. They named their community after Father Valentin Vegreville, the Roman Catholic Oblate missionary who brought them to Alberta. Vegreville was incorporated as a village in 1906, and attracted a large number of Ukrainian settlers between 1910 and 1930.

Wetaskiwin

Population: 10,022.

Location: Wetaskiwin is on Highway 2A, 43 miles (69 km.) southeast of Edmonton and 144 miles (232 km.) from Calgary.

Street System: Streets run north and south from 45 Street in the east to 57 Street in the west with even numbers on the west side. Avenues run east and west, from 36 Avenue in the south to 64 Avenue in the north with even numbers on the north side.

Transportation Facilities: Wetaskiwin is situated on the CP Rail line with VIA Rail passenger service to Edmonton and Calgary twice daily. Greyhound bus service runs seven times daily to Edmonton, four times daily to Calgary. Inter-city courier service is available.

History: Wetaskiwin was the sixteenth siding on the CP line when the railroad was built in 1891. Father Albert Lacombe, an Oblate priest, suggested the name Wetaskiwin, which means Hills of Peace in Cree. Incorporated as a village in 1902, a town in 1904 and proclaimed a city in 1906, Wetaskiwin was for many years the smallest city in the British Empire.

Whitecourt

Population: 5,408.

Location: On Highway 43, 111 miles (178 km.) northwest of Edmonton.

Street System: Streets run north and south, from 35th in the east to 52nd in the west, with even numbers on the west side. Avenues run east and west, from 34 Ave. in the south to 57th in the north, with odd numbers on the north side.

Transportation Facilities: On the CN rail line but has no passenger rail service. Buses run three times a day to and from Edmonton. There is no scheduled air service. Inter-city courier service is available.

History: The Hudson's Bay Company established a substation at this site in 1897; the subsequent settlement was named after local postmaster Walter White. In 1959 it was incorporated as a village and was declared a new town by the province in 1961. Ten years later it acquired town status.

The Resources of Alberta

Virtually all Albertans depend on the land for survival, very directly. This dependence is nearly as total today as it was in the prehistoric hunting era. Petroleum and wheat, cattle and coal, all derive from the land, and these provide the means by which Albertans eat and live. Without them the commercial and industrial sectors would collapse.

Alberta's resource development, however, has always faced two great obstacles. The province is a long way from the sea and far removed from the world's strategic trading routes. Second, though Albertans are blessed with a vast quantity of raw material, the variety of their resources is limited. Therefore the provincial economy has always tended to be unstable, booming or busting with the price fluctuations of a few commodities, particularly oil and grain.

PETROLEUM

Early in 1947 a probing drill bit chewed into oil-soaked limestone near the small town of Leduc, 21 miles (34 km.) south of Edmonton. Conventional liquid petroleum roared up the oil rig's hollow drillstem, carrying Alberta into the era of vigorous oil development. As additional discoveries accumulated rapidly, the province's population and development surged ahead. Until 1970, the known reserves of conventional oil continued to grow. Alberta was the only major source of oil in Canada.

However since 1970 the province's known oil reserves have fallen steadily. More oil was pumped out of the ground each year than was found. Most experts expect conventional oil production to taper off drastically in Alberta by the end of the 1980s.

HEAVY OIL AND OIL SANDS

Though Alberta's conventional oil production may well keep on shrinking, the province could continue to supply all Canada's oil needs for centuries. This is not theory but fact. Alberta contains enormous known reserves of non-conventional oil; estimates run in the range of a trillion barrels.

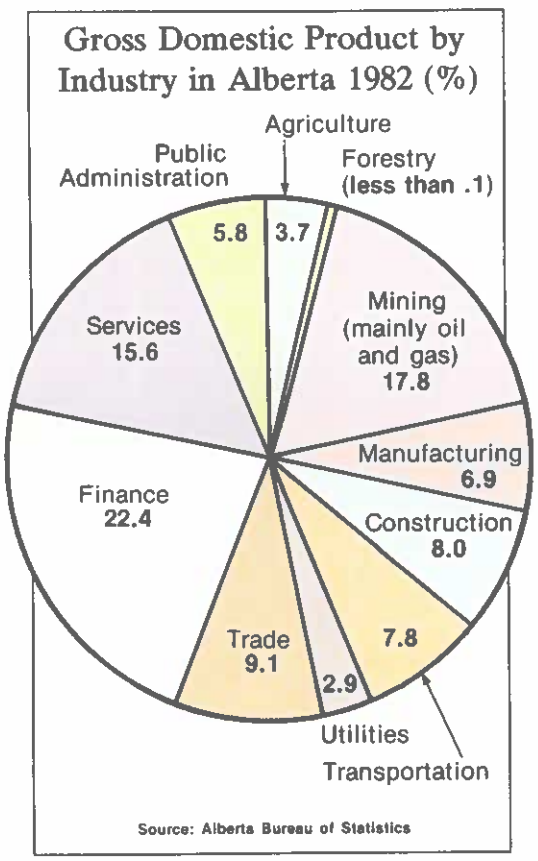
This oil is thicker than conventional crude, ranging from a molasses-like sludge to actual tar. Whereas conventional oil, soaked in the ground like water in a sponge, can squeeze through the pores between the grains of rock to a well bore, 'heavy' oil can at best ooze very slowly. The oil sands 'tar' will not budge at all on its own. These oils can be strip-mined or flushed out with underground injections of steam and chemicals. Either way, non-conventional production is more expensive than conventional oil.

Alberta has two major oil-sands operations near Fort McMurray, Suncor and Syncrude, both of which work by mining. Experimental injection projects, especially in the heavy oilfields of the province's northeastern region, are well underway. Should the world price of energy rise sufficiently, non-conventional sources may be able to lessen Albertans' dangerous dependence on revenues from rapidly disappearing conventional oil.

NATURAL GAS

The Alberta gas industry is considerably older than its oil counterpart. A CPR crew drilling for water near Medicine Hat in 1883 ignited a gas deposit that burned down their rig. By the First World War Calgary and other southern centres were hooked into a gas pipeline network, supplying heat and street lighting.

Alberta's wildcat drillers have always been able to find gas faster than the market would absorb it. In the early decades of the century, when a well produced both liquid petroleum and gas, more often than not the gas was flared, that is, burned off, representing millions of dollars at today's prices. At that time it couldn't be given away. Today the province's proven reserves stand close to two trillion cubic feet, better than a 30-year supply at the 1982 rate of production.



COAL

From earliest times, coal was reported in many areas of Alberta. As the coal-burning steam engines pushed west, deposits in the Lethbridge and Drumheller regions were mined on a large scale. During its peak year, 1947, the Drumheller operations alone produced two million tonnes and employed more than 2,000 men. The coal miners' long fight for better pay and less dangerous working conditions made them a driving force in the province's early labour movement.

When the railways and other traditional customers switched to oil during the 1950s, coal fell on hard times. The industry revived in Alberta with the building of coal-fired electrical generating plants, both in the province and elsewhere. Alberta mines produce almost half the Canadian total; the province's reserves of both high- and low-grade coal constitute the bulk of the national supply.

FORESTS

About 60% of Alberta is forest. At the beginning of this decade, the provincial government calculated that a complete regrowth cycle could be maintained with an annual harvest of 28 million cubic metres of timber. The actual cut in 1980 was four million cubic metres.

Traditionally Alberta's forest industries have been dominated by hundreds of small plants, and that remains the case still. A recent count showed 325 manufacturing units, of which 300 were sawmills. Besides dressed lumber, the province produces paper, bleached kraft pulp, plywood, fibreboard, flakeboard and veneer.

AGRICULTURE

Canada's total rural population in 1981 amounted to just over a million people, of whom one in five was Albertan. Of the 50 million acres used for crops and livestock in the province, approximately 28 million were classed as cultivated. Albertans produce about 20% of Canada's total agricultural output.

The provincial farm income for the year 1981 was $3.9 billion, of which cattle accounted for $1.2 billion, wheat for $1.1 billion, and barley almost half a billion. Canola earned better than a quarter billion dollars, hogs a fifth of a billion.

The primary agricultural challenge to southern Alberta's pioneers was drought. During the 1920s and 1930s, many southerners re-emigrated northward, settling much of the Peace River country. Current dryland farming methods place a heavy emphasis on summer fallowing. Typically half the land is left fallow every year while the soil's moisture replenishes itself.

In the north three generations of spine-wrenching work was often necessary before the thick brush could be completely cleared from a farm.

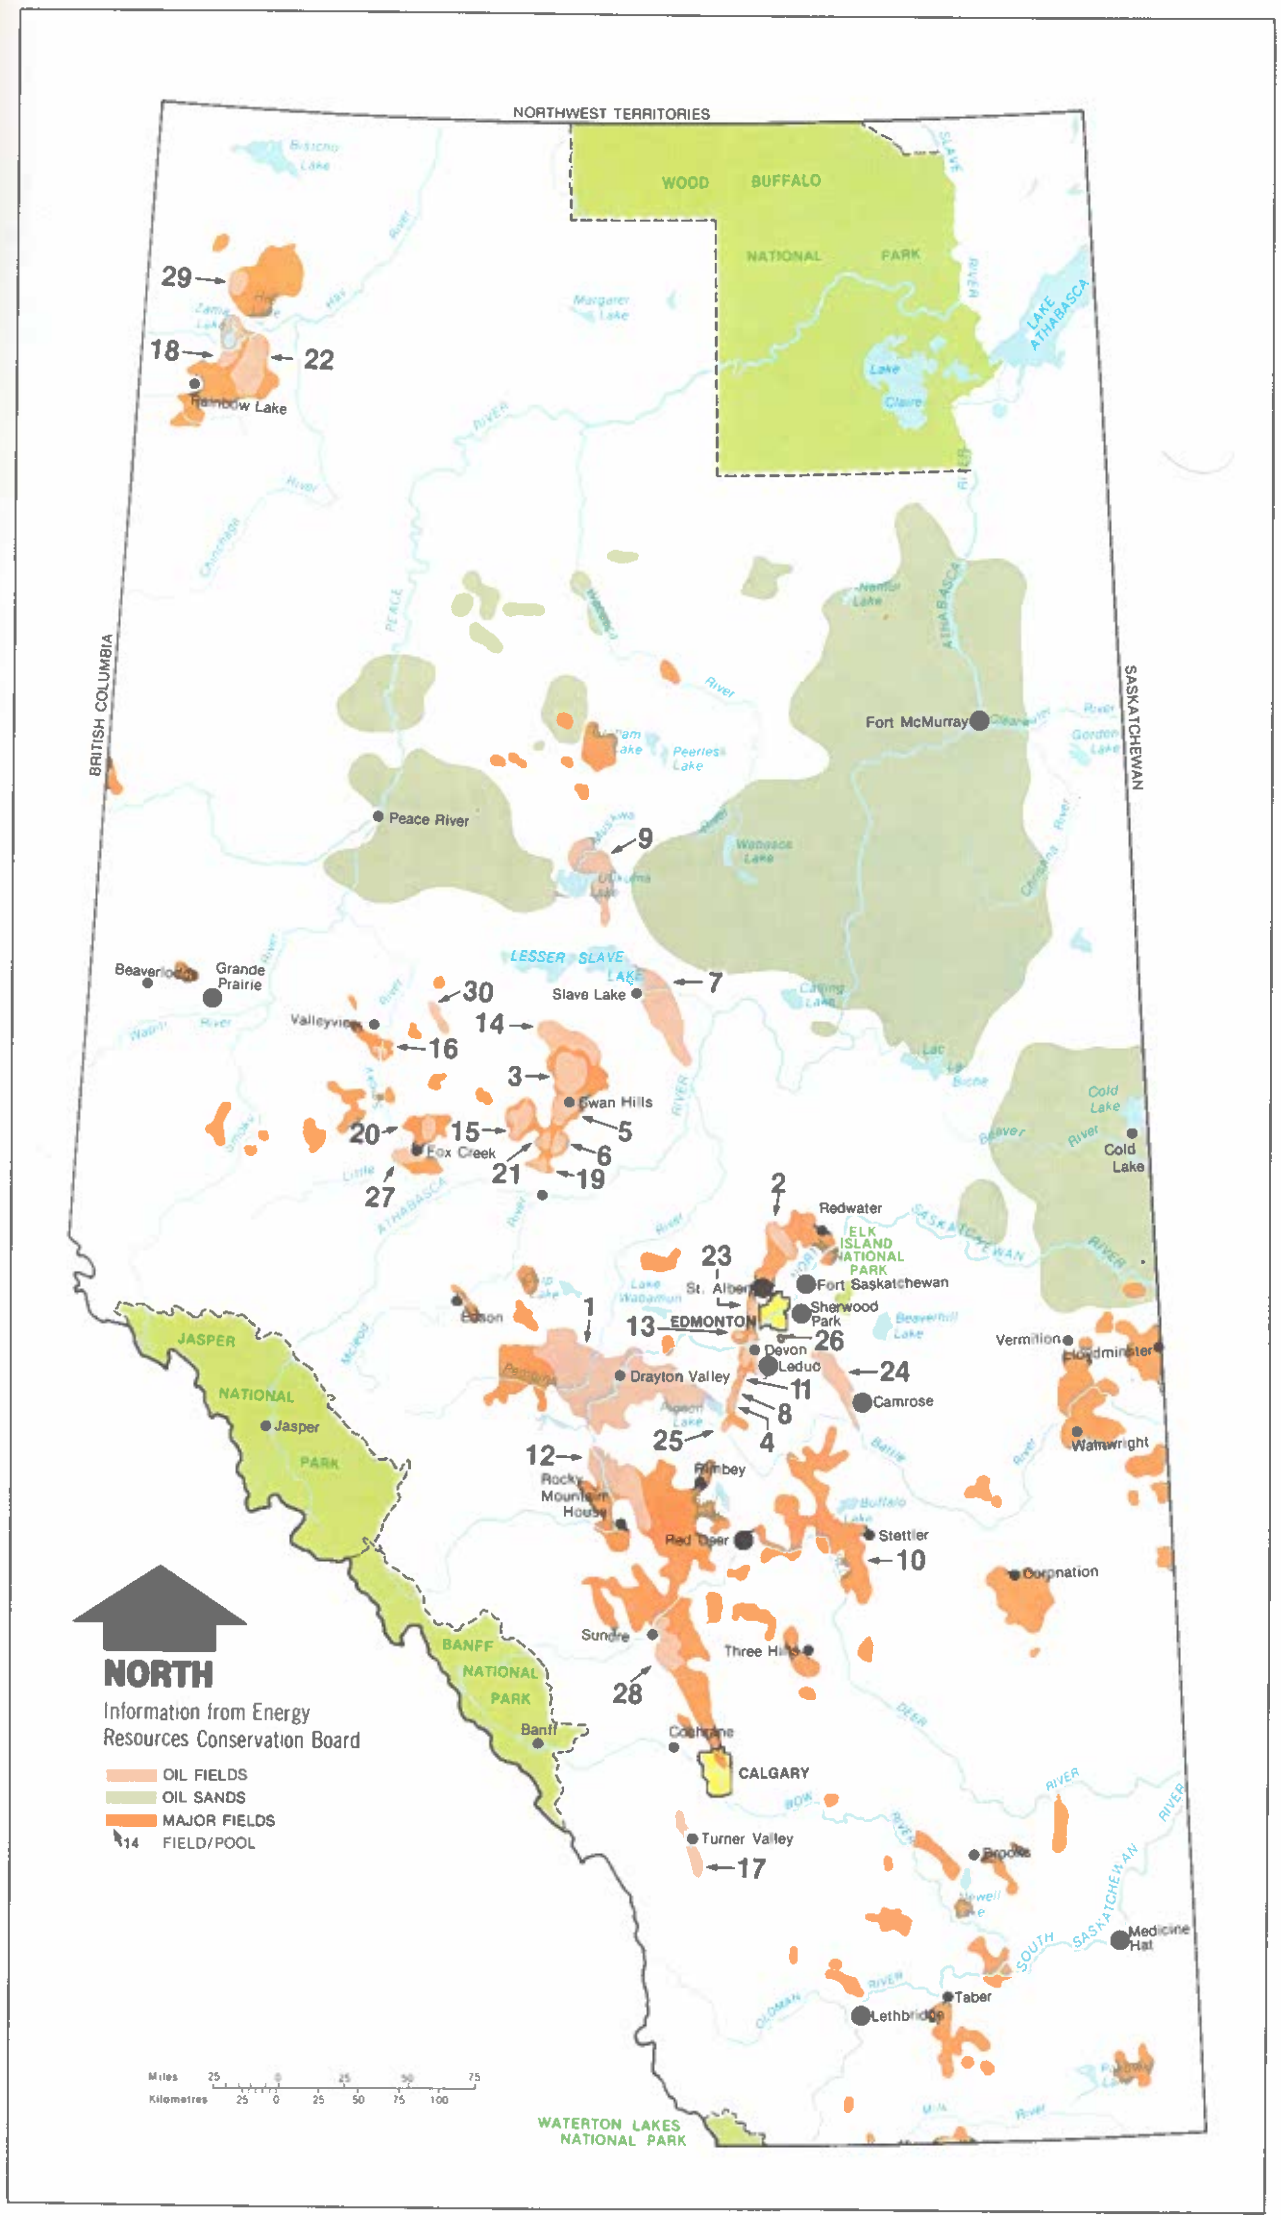
Every year Alberta's ranchers and farmers cope with a formidable combination of unpredictable prices for their products, rising costs, increasingly larger scale operations, complex equipment, political interference, and ever more sophisticated agricultural techniques. As a rule, even the best need a little luck to make the grade.

OTHER RESOURCES

Northern Alberta's abundant water may one day transform the south; visionaries have persistently dreamt of a time when higher food prices and new technology combine to make possible a massive north-to-south irrigation of the southern plain.

Some other Alberta assets are more tangible. The province is a world-scale supplier of sulphur. The Canadian Rockies' global reputation is the solid basis of an expanding tourist industry. Should the western Arctic develop strongly, Alberta's strategic position as a jumping-off point for the North could emerge as an important advantage.

Despite these alternatives, one fact is inescapable: the massive new structure of post-Second World War Alberta rests on a foundation of fossil fuels. No alternate economic resource now visible is of sufficient scale to alter that basic dependency. Whether oil sands, heavy oils, coal, the more difficult reserves of conventional oil and gas—the development of its resources remains Alberta's most probable, though problematic, source of future prosperity.



Oil fields of Alberta

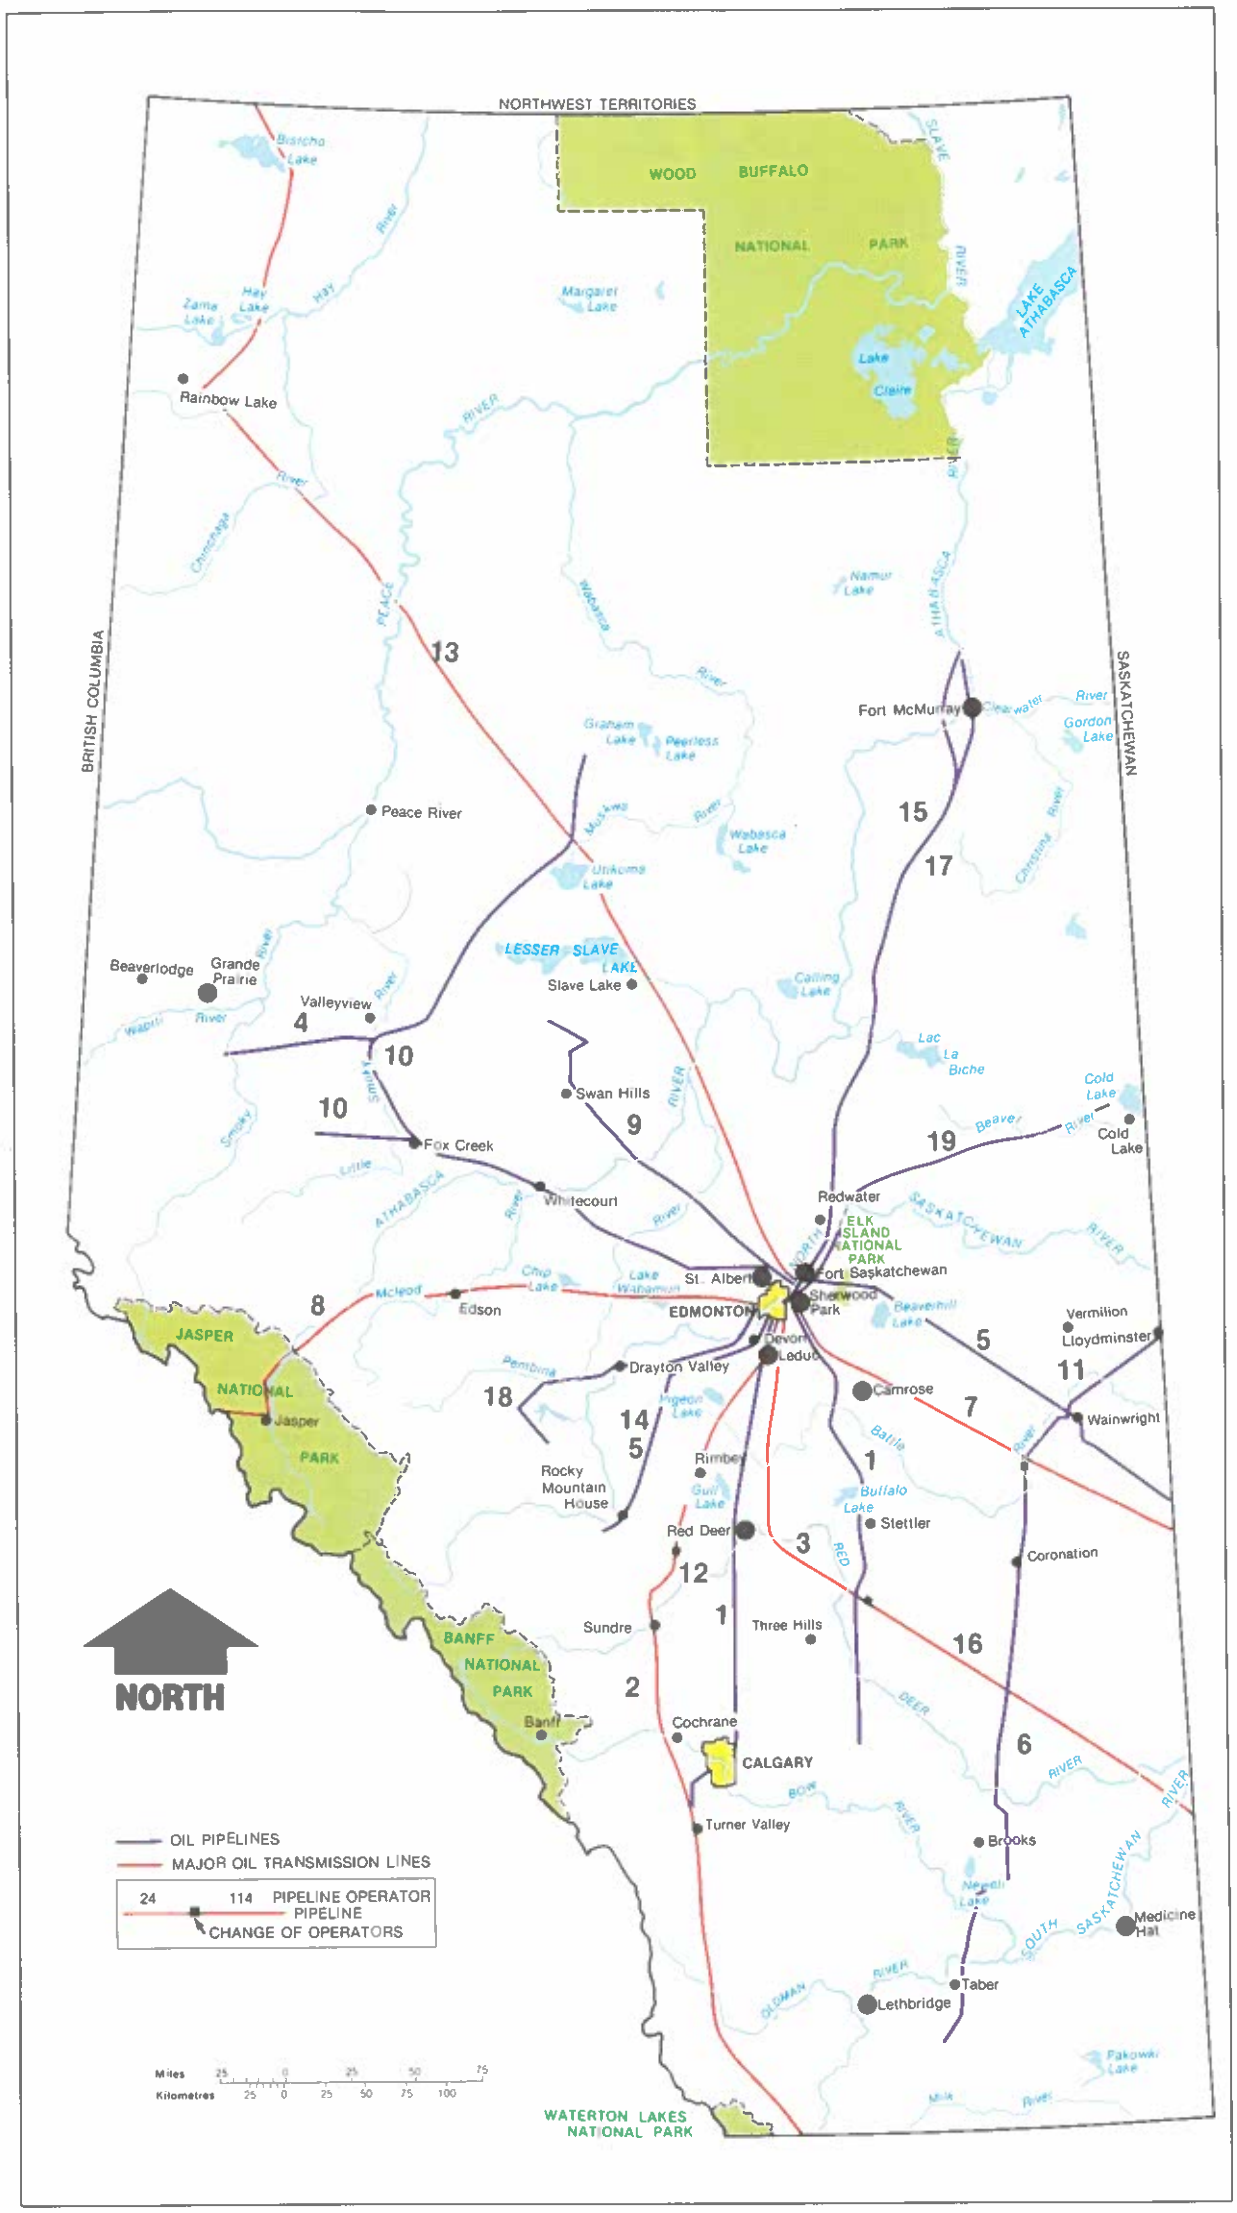
29. Rainbow Keg River A, 79.3 mm. bbl. (12.6 mm. cu. m.), 1965, Aquit Mobil Rainbow
30. Snipe Lake Beaverhill Lake, 78 mm. bbl. (12.4 mm. cu. m.), 1962, Atlantic Snipe Lake



Oil pipelines of Alberta

There are 26,298 miles (42,313 km.) of oil pipelines in the province of Alberta regulated by the provincial Energy Resources Conservation Board. In addition, the National Energy Board regulates 972 miles (1,564 km.) of oil pipeline in the province. These include the Interprovincial Pipeline, the Trans Mountain Pipeline and the Cochin Pipeline. Lines which cross provincial boundaries fall under federal jurisdiction. There are several types of oil lines. Flow lines gather production at the wells and move it to a battery which separates the oil into component products. From the battery, the oil is moved through secondary pipelines to a pipeline terminal for refining or shipment through a major pipeline.

The first major oil line in Alberta was built by the Royalite Oil Co. in 1925. The four-inch line ran approximately 30 miles from Turner Valley to Calgary carrying condensate to an Imperial Oil refinery.

OPERATORS

1. Gulf Canada Resources Ltd.

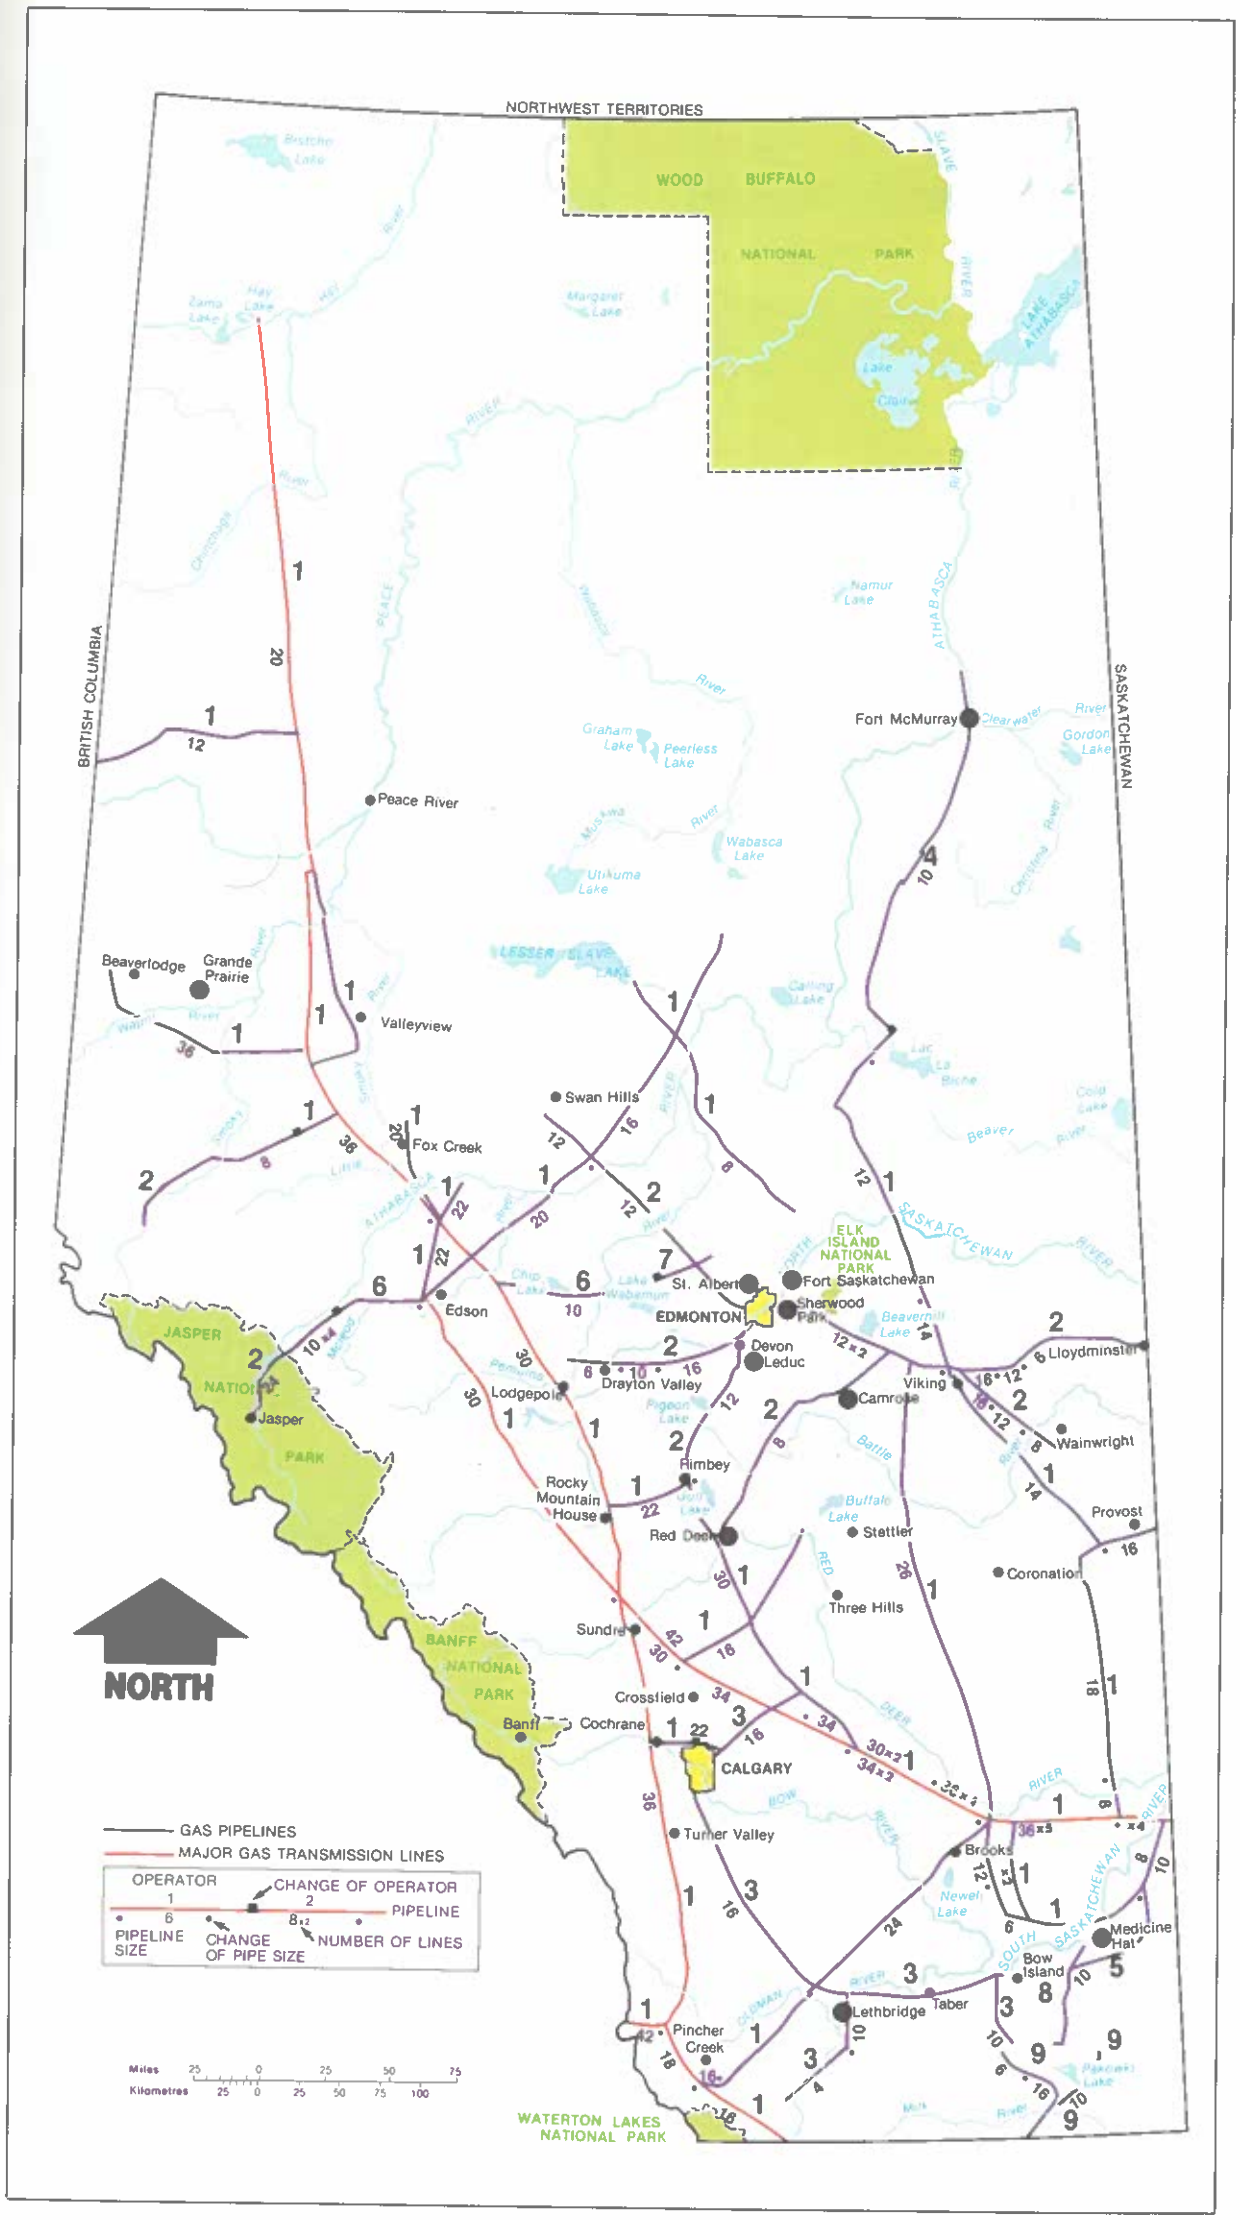
18. Pembina Pipe Line Ltd.
19. Alberta Energy Corp.

Information from Energy Resources Conservation Board



Gas pipelines of Alberta

There are 102,537 miles (165,012 km.) of gas pipelines in Alberta. Most of that is regulated by the provincial Energy Resources Conservation Board, with the exception of approximately 15 miles (24 km.) of line near the provincial border and the 312 miles (502 km.) of the Alaska Highway Gas Pipeline. Construction of an additional 494 miles (795 km.) on that line has been suspended pending a decision on gas sales in the United States.

Natural gas is gathered in secondary gas lines and shipped to gas plants where hydrogen sulphide is removed and in some cases, liquids like propane, butane and ethane are extracted. The sweet gas is then gathered by Nova An Alberta Corporation's pipeline system and delivered to export points. The extracted liquids move in different lines under extremely high pressure.

The first major gas line in the province was a 16-inch line built in 1912 by Canadian Western Natural Gas. The line was 167 miles (269 km.) long and ran from Bow Island to Calgary.

OPERATORS

The Rocky Mountain Passes

The Rocky Mountains, the towering barrier whose watershed roughly defines the border between Alberta and British Columbia, have been posing an obstacle and a challenge to human beings from the days the first Indians found paths through them. Many of these "passes" were used by Canadian fur traders trying to establish accessible routes between the west coast and the interior of North America. Today rail and road transportation is concentrated in three of them: the Yellowhead, west of Jasper; the Kicking Horse, northwest of Banff; and the Crowsnest, west of Coleman. The fur traders used two others: the Howse, near the south edge of the map on this page, (shown also at the top edge of the map on page 151); and the Athabasca, southwest of Jasper. All the passes that cut through the main ridge of the Rockies are shown on these two maps. Among the 83 passes shown, some traverse the spur ranges that branch off from the centre spine.

Parks in Alberta

There are in Alberta five national parks under the jurisdiction of Parks Canada, and 61 provincial parks operated by Alberta Recreation and Parks. Together, national and provincial parks occupy almost 24,900 square miles (64,296 square kilometres).

National Parks

Banff was Canada's first national park, though then it was part of the Northwest Territories. In 1885, the federal government set aside 10 square miles (26 sq. km.) in the Rocky Mountains after conflicting claims arose over the rights to hot springs at Sulphur Mountain. Sir John A. Macdonald's cabinet realized the potential of the springs and decided to preserve the site in its natural state for all Canadians. At that time there was no official parks policy, but politicians wanted to protect the area from private developers. Two years later the federal government passed the Rocky Mountains Park Act, creating the first national park and expanding it to 260 square miles (673 square kilometres).

Alberta now has more national parks than any other province. Three are in the Rockies: Jasper National Park west of Edmonton, Banff National Park west of Calgary, and Waterton Lakes National Park in the province's southwest corner, part of the Glacier-Waterton International Peace Park. Elk Island National Park east of Edmonton is the smallest of the five, and Wood Buffalo National Park, which straddles the border between Alberta and the Northwest Territories, ranks as Canada's largest.

Each is under the administrative governance of a superintendent, who reports to the regional director of Parks Canada; ultimate political responsibility rests with the federal minister of the environment. The superintendents of Jasper, Banff and Waterton, each of which includes a town, run civic affairs through townsite managers. There is no elected municipal government and no local taxation. This has led to periodic complaints from residents that they have no voice in the way their communities are run, and a continuing demand for elected government.

All national parks regulations reflect a single overall purpose: to reserve places of natural beauty and scenic value for the benefit of this and future generations; their officials urge all visitors to treat them as such.

Wood Buffalo

For location, see Alberta: The Province map, pages 27 and 29

This enormous 17,301 square-mile (44,807 sq. km.) tract straddles the border between Alberta and the Northwest Territories. It is a massive subarctic wilderness, teeming with wildlife. Originally 10,500 square miles (27,193 sq. km.), the park was set aside in 1922 primarily to preserve a dwindling herd of woodland bison which still roamed wild in the territory. Today it numbers 5,000 to 6,000 buffalo, the largest free-roaming herd in the world. In 1954, biologists discovered that the park also contained the last nesting grounds for the whooping crane, which remains a rare and endangered species.

In addition to its wildlife, Wood Buffalo National Park boasts the most extensive gypsum karst terrain in the world, consisting of sinkholes, underground rivers, caves and deep valleys.

The only road into Wood Buffalo is via Highway 5 from Fort Smith in the Northwest Territories. It is an undeveloped wilderness park for the most part, though there are some fixtures in place to assist camping, picnicking and swimming. The surrounding country is almost entirely uninhabited, and only a few hundred tourists visit Wood Buffalo each year.

Elk Island

(For location, see Alberta: The Province map, pages 29 and 31)

Elk Island National Park was the first large federally controlled area to be enclosed as a big game sanctuary. In 1913, a 16-square-mile (41 sq. km.) area, 21 miles (34 km.) east of Edmonton, was declared a national park, though it had been set aside since 1906 to protect an overhunted elk herd. The park now contains 75 square miles (194 sq. km.) and shelters a herd of bison.

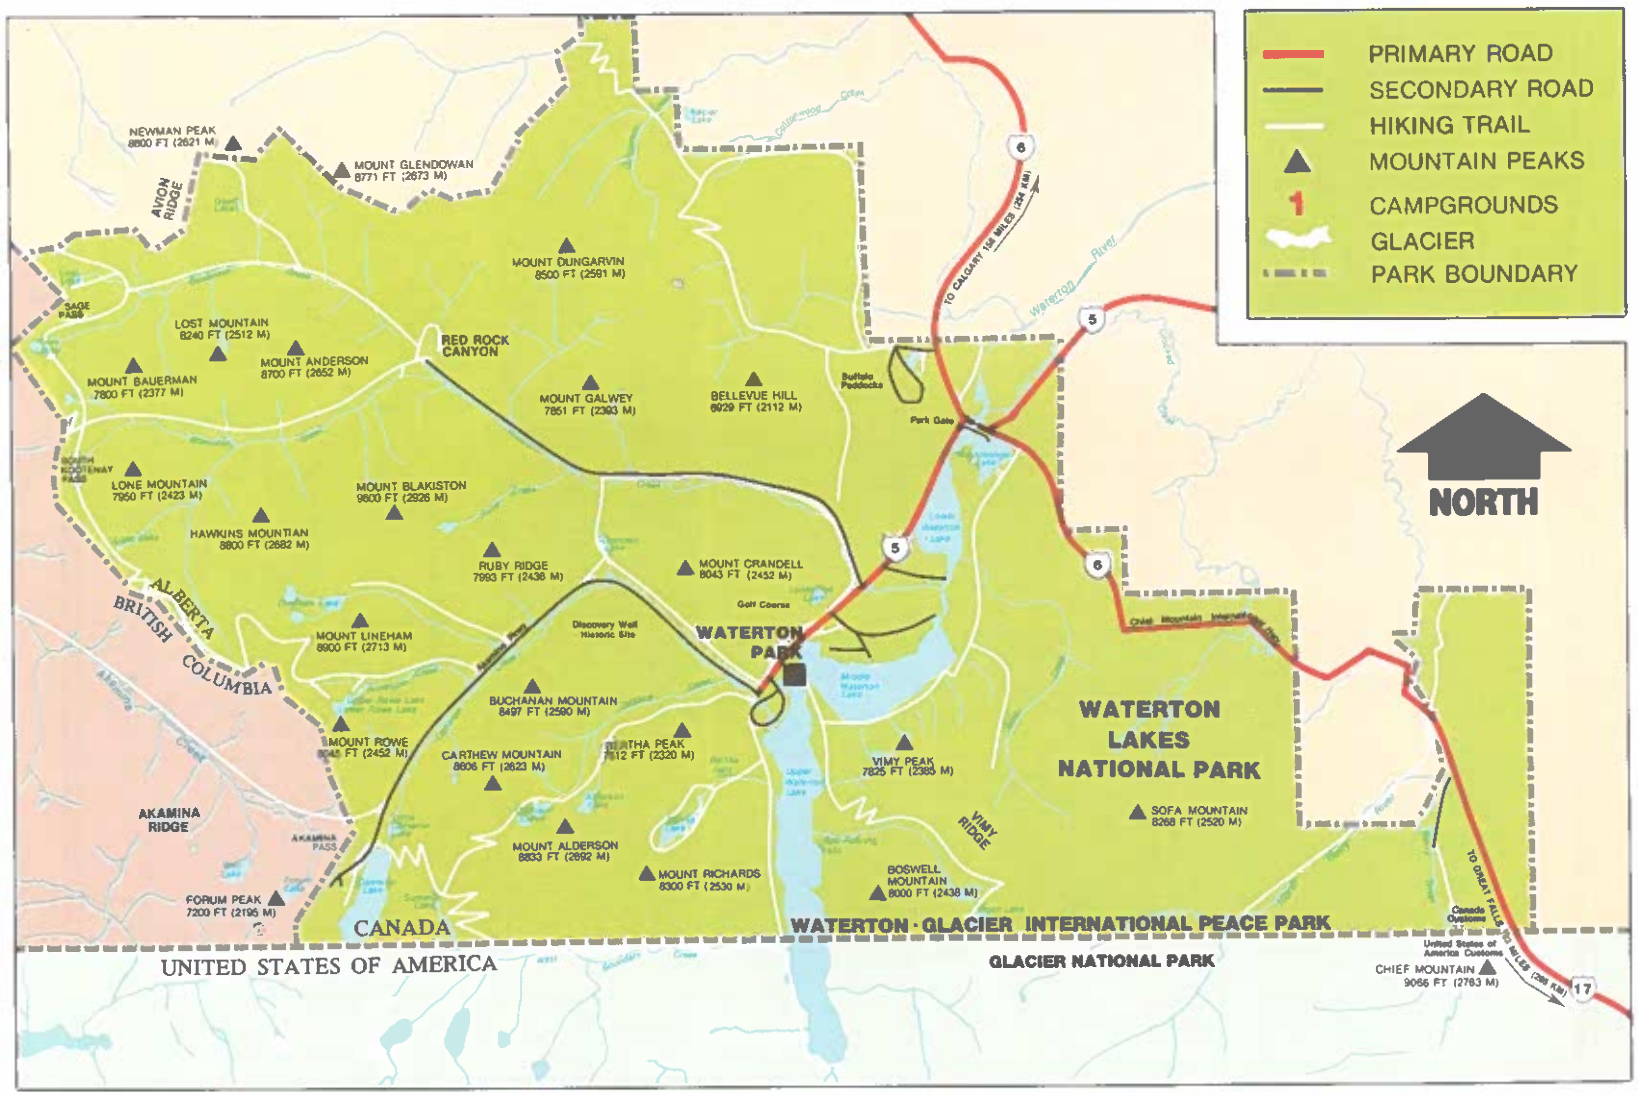
The park is not in fact an island, except in that it is located in the Beaver Hills, which rise out of the surrounding prairie. It consists of large outcroppings of rock, aspen forests and numerous spruce bogs.

Waterton Lakes

In 1895 the federal government, at the request of nearby residents, reserved 54 square miles (140 sq. km.) around Waterton Lake. Sixteen years later it founded Waterton Lakes Dominion Park, within a tiny area of 13.5 square miles (35 square kilometres). In 1914, however, local pressure led to an expansion of the park to 423 square miles (1,095 square kilometres), and in 1932, the U.S. and Canadian governments passed complementary legislation to create the Waterton-Glacier International Peace Park between Montana and Alberta. This was the first such park in the world.

It lies 160 miles (257 km.) south of Calgary on Highways 2, 5 and 6. The area encompasses both prairie and mountain landscapes and boasts the largest lake in the Rockies, Upper Waterton Lake, 485 feet (148 metres) deep. Waterton Park has 109 miles (175 km.) of trails through a wide variety of terrains. Cruise boats operate on Upper Waterton Lake to provide a view of the park's interior.

Waterton Park is rich in minerals as well. In 1902, western Canada's first oil well was drilled on Cameron Creek in the southwest corner of the present-day park. The activity surrounding that find created a town called Oil City. The excitement died quickly, however, and the town has long since vanished. A decade later the town of Pocahontas was established to exploit coal deposits. That lasted for about 10 years, as did the town. Since then national parks policy has precluded any resource exploitation.



Banff National Park

In 1883, Frank McCabe and William McCardell, workers on the Canadian Pacific Railway, came upon a pool fed by hot springs from Sulphur Mountain. They put up shacks, as did other railway workers, and applied to the federal government for permission to develop the area. The Minister of the Interior, Thomas White, received claims from several people, however, and after examining the area his government decided that it should be reserved for public use. In 1887 Rocky Mountains Park was officially created with an area of 260 square miles (673 square kilometres). That same year, the CPR began construction of the Banff Springs Hotel on a spot chosen by CPR vice-president W.C. Van Horne.

In the first year, there was some confusion over whether lots surrounding the hotel should be leased or sold. The acting park superintendent, George Stewart, thought they should be sold, and accepted options to that end. The government later decided upon leasing only. A scandal soon erupted which eventually led to the removal of Mr. Stewart as park superintendent.

In 1887, the new park attracted 3,000 visitors. By 1891, that had increased to 7,250. In 1892, 51 square miles (132 sq. km.) around Emerald Lake, now Lake Louise, were reserved by the government, and were added to Rocky Mountains Park in 1902. Until after the First World War, access to the parks was by railway only. In 1912, the CPR built a tram line from the Lake Louise station to Chateau Lake Louise, to shuttle passengers to its hotel on the remote, picturesque lake. The line was in service for 20 years.

A unique aspect of this park is the presence of the Banff Centre, a fine arts and management school. It began in 1948 as the Banff School of Fine Art, then an extension of the University of Alberta. The school's Summer Festival of the Arts now attracts visitors and acclaim from around the world each year, and has made Banff an international cultural centre.

8. Johnston Canyon
9. Two Jack
10. Tunnel Mountain

Jasper National Park

The area around Jasper figured prominently in Alberta's early history. The Athabasca, Whirlpool and Miette Rivers were routes for early explorers and fur traders. As early as 1811 explorer David Thompson crossed the Athabasca Pass, opening up the area for fur traders and missionaries. The North West Company built a post at Brule Lake in 1813 called Jasper House, named for the man who ran it, Jasper Hawes.

In 1907, with plans underway for two northern transcontinental railways, the federal government set aside 5,000 square miles (12,945 sq. km.), incorporating the watershed of the Upper Athabasca River, as Jasper Forest Park. As planned, the Grand Trunk Pacific Railway ran right through it. The railway, completed in 1912, and its competitor, the Canadian Northern, provided the only access to the park until after the Second World War. In 1913, the Jasper townsite was surveyed to provide for tourists.

When the park was established, the government had to persuade a few settlers, who had already staked homesteads in the area, to leave. Only one refused. Lewis Swift, the first in the vicinity, was eventually given title to his claim, a gesture for which the government would pay dearly. In 1926, Swift refused the government's $6,000 offer for his land. During the Depression he offered to sell but the government wouldn't buy. Instead, he sold to a private developer, who set up a dude ranch within the park. The property changed hands several times and in the late 1950s, Ottawa finally purchased the property for over a quarter of a million dollars.

The first downhill ski runs at Jasper were developed in 1937 at Whistler. In 1949 Marmot Basin began to attract skiers as well. With no road access to the mountain, visitors had to be carried by snowmobile from the highway. Active development of the ski hills did not begin until the mid-1960s, and the first major highway with access to the slopes was completed in 1970.

Residents in the townsite of Jasper lease their property from the federal government and pay other fees for community maintenance.

Motorists can drive along the Icefields Parkway between Jasper and Lake Louise past scenic waterfalls, the Athabasca Glacier and the Columbia Icefield. Jasper is also the site of the Miette Hot Springs.

10. Wilcox Creek

Kananaskis Country

Kananaskis Country was set up in 1978 as a "multi-use recreation area," funded by the Alberta Heritage Savings Trust Fund. Kananaskis covers 1,600 square miles (4,143 sq. km.) and encompasses three provincial parks: Kananaskis, Bragg Creek and Bow Valley. They lie 56 miles (90 km.) southwest of Calgary.

The vicinity has long been popular with Albertans for everything from skiing, hiking and camping to off-road drives and wildlife watching. Part of the rationale for creating Kananaskis Country was to accommodate and control conflicting uses.

Kananaskis Country is not considered a provincial park, and is run by its own managing director. As well, a citizens' advisory committee appointed by the government represents the public's interest to the minister of recreation and parks. Over 300,000 persons visited Kananaskis Country during 1982. In addition to summer and winter camping, fishing, skiing and a variety of other activities, Kananaskis boasts two world-class 18-hole golf courses, and designated trails for off-road and all-terrain vehicles.

KANANASKIS PROVINCIAL PARK

35. Indefatigable Hiking Trail

Provincial Parks

Alberta has 61 provincial parks and one multi-use recreation area called Kananaskis Country, which itself contains three more. These all told comprise some 483 square miles (1,251 sq. km.), and drew over five million visitors in 1982.

The provincial government entered park development relatively late, considering that Alberta's national parks began in 1887. Not until 1932 did Alberta create its first provincial park, which was at Aspen Beach, northwest of Red Deer. This stemmed from the fact that before 1930, the federal government retained control over all natural resources and crown land in Alberta. Shortly after land jurisdiction was handed over to the province, the Alberta government created eight parks.

Until the early 1950s, provincial parks were small waterside areas set aside to serve local, mainly rural, residents. For this reason, much of the work and materials required to develop and maintain them was donated, and Alberta's parks budget was fairly modest. As urbanization and prosperity increased, so too did the need for different sorts of parks. Their management was gradually taken away from local advisory boards to become a full-time government responsibility.

The province's parks now reflect a variety of interests and uses. Many are used primarily for swimming, fishing and camping. But others, like Dinosaur Park near Drumheller and Writing-on-Stone near the Montana border, help preserve the province's geological, historical and archaeological heritage. Still others, like Strathcona Science Park in Edmonton and Fish Creek in Calgary, cater to urban hikers, cyclists and picnickers. Provincial parks present a full range of Alberta's topography, from mountains and foothills to flat prairie, parkland forest and deep coulees.

Regulations and facilities vary considerably from one to the next. In general, admission is free but some levy a fee for camping, and accommodation may be reserved at some. Fishing in any of the parks requires only a provincial permit.

NAME OF PARK	LOCATION
Aspen Beach	9 miles (14 km) west of Lacombe
Beauvais Lake	7 miles (11 km) west; 5 miles (8 km) south of Pincher Creek
Big Hill Springs	5 miles (8 km) north; 3 miles (5 km) east of Cochrane
Big Knife	5 miles (8 km) west; 8 miles (13 km) south of Forestburg
Bow Valley	10 miles (16 km) east of Canmore
Bragg Creek	11 miles (18 km) west; 13 miles (21 km) south of Calgary
Calling Lake	30 miles (48 km) north of Athabasca
Carson-Pegasus	4 miles (6 km) west; 7 miles (11 km) north of Whitecourt
Chain Lakes	24 miles (39 km) southwest of Nanton
Cold Lake	2 miles (3 km) east of Cold Lake
Crimson Lake	5 miles (8 km) west; 4 miles (6 km) north of Rocky Mountain House
Cross Lake	30 miles (48 km) north; 12 miles (19 km) northeast of Westlock
Cypress Hills	18 miles (30 km) east; 21 miles (34 km) south of Medicine Hat
Dillberry Lake	32 miles (52 km) east; 13 miles (21 km) south of Wainwright
Dinosaur	5 miles (8 km) north; 21 miles (33 km) northeast of Brooks
Dry Island Buffalo Jump	8 miles (13 km) north; 12 miles (19 km) east of Trochu
Fish Creek	Calgary southern limit
Garner Lake	30 miles (48 km) east; 3 miles (5 km) north of Smoky Lake
Gooseberry Lake	1 mile (2 km) east; 8 miles (13 km) north of Consort
Gregoire Lake	12 miles (19 km) south; 6 miles (10 km) east of Fort McMurray
Hasse Lake	7 miles (11 km) west; 4 miles (6 km) south of Stony Plain
Hilliard's Bay	10 miles (16 km) east; 12 miles (19 km) northeast of High Prairie
Jarvis Bay	4 miles (7 km) north of Sylvan Lake
Kananaskis	17 miles (27 km) east; 31 miles (50 km) south of Canmore
Kinbrook Island	8 miles (13 km) south; 1 mile (2 km) west of Brooks
Lesser Slave Lake	6 miles (10 km) north of Slave Lake
Little Bow	12 miles (19 km) south; 12 miles (19 km) east of Vulcan
Little Fish Lake	11 miles (18 km) south; 14 miles (22 km) east of Drumheller
Long Lake	4 miles (6 km) east; 24 miles (37 km) northeast of Thorhild
Ma-Me-O Beach	Summer Village of Ma-Me-O Beach; 25 miles (40 km) west of Wetaskiwin
Midland	1 mile (2 km) west of Drumheller
Miquelon Lake	2 miles (3 km) west; 16 miles (26 km) north of Camrose
Moonshine Lake	18 miles (29 km) west; 3 miles (5 km) north of Spirit River
Moose Lake	2 miles (3 km) north; 7 miles (11 km) west of Bonnyville
Notikewin	23 miles (37 km) north; 18 miles (29 km) east of Manning
O'Brien	7 miles (11 km) south of Grande Prairie
Park Lake	9 miles (14 km) north; 1 mile (2 km) west of Lethbridge
Pembina River	2 miles (3 km) east of Evansburg
Pigeon Lake	30 miles (48 km) west; 6 miles (10 km) north of Wetaskiwin
Police Outpost	10 miles (16 km) west; 11 miles (18 km) south of Cardston
Queen Elizabeth-Lac Cardinal	2 miles (3 km) north; 3 miles (5 km) west of Grimshaw
Red Lodge	8 miles (13 km) south; 8 miles (13 km) west of Innisfail
Rochon Sands	7 miles (11 km) west; 10 miles (16 km) north of Stettler
Saskatoon Island	12 miles (19 km) west; 2 miles (3 km) north of Grande Prairie
Sir Winston Churchill	6 miles (10 km) northeast of Lac La Biche
Strathcona Science	Edmonton eastern limit
Sylvan Lake	11 miles (17 km) west of Red Deer
Taber	1 mile (2 km) west; 2 miles (3 km) north of Taber
Thunder Lake	13 miles (21 km) west of Barrhead
Tillebrook	5 miles (8 km) east of Brooks
Vermilion	1 mile (2 km) northwest of Vermilion
Wabamun Lake	18 miles (29 km) west; 1 mile (2 km) south of Stony Plain
Whitney Lakes	16 miles (26 km) east of Elk Point
William A. Switzer	2 miles (3 km) west; 9 miles (15 km) north of Hinton
Williamson	11 miles (18 km) west; 1 mile (2 km) north of Valleyview
Willow Creek	4 miles (6 km) west; 5 miles (8 km) south of Stavely
Winagami Lake	10 miles (16 km) south; 7 miles (11 km) east of McLennon
Woolford	2 miles (3 km) northeast; 8 miles (13 km) southeast of Cardston
Writing-on-Stone	20 miles (32 km) east; 6 miles (10 km) south of Milk River
Wyndham-Carseland	15 miles (24 km) south of Strathmore
Young's Point	16 miles (26 km) west; 6 miles (9 km) northeast of Valleyview

How to read the legal description of an Alberta property

The Dominion Land Survey, initiated during the 1870s, divided the fertile Canadian prairies into a mammoth grid of 160-acre parcels. These "quarter-section" homestead lots, available virtually free at one per family, lured a tidal wave of settlers to the West. The DLS system forms the basis of Alberta land titles to this day.

To create the grid, the surveyors required reference lines running both north/south and east/west. The north/south requirement was met by choosing five lines of longitude, known as meridians. The first DLS meridian passes west of Winnipeg. The fourth meridian today forms the border between Saskatchewan and Alberta. The fifth runs through the community of Stony Plain; in Calgary the Barlow Trail in part follows the course of this meridian. The sixth and last of the Alberta meridians cuts east of Grande Prairie, west of Edson and winds up in Jasper National Park. Meridians are shown on the map this way ——.

East/west "base lines" were also established, numbering 32 in Alberta, the first being the U.S.-Canadian border along the 49th parallel. Edmonton's 101st Avenue follows the 14th base line; the seventh slices through north Calgary. They're shown on the map thus ——.

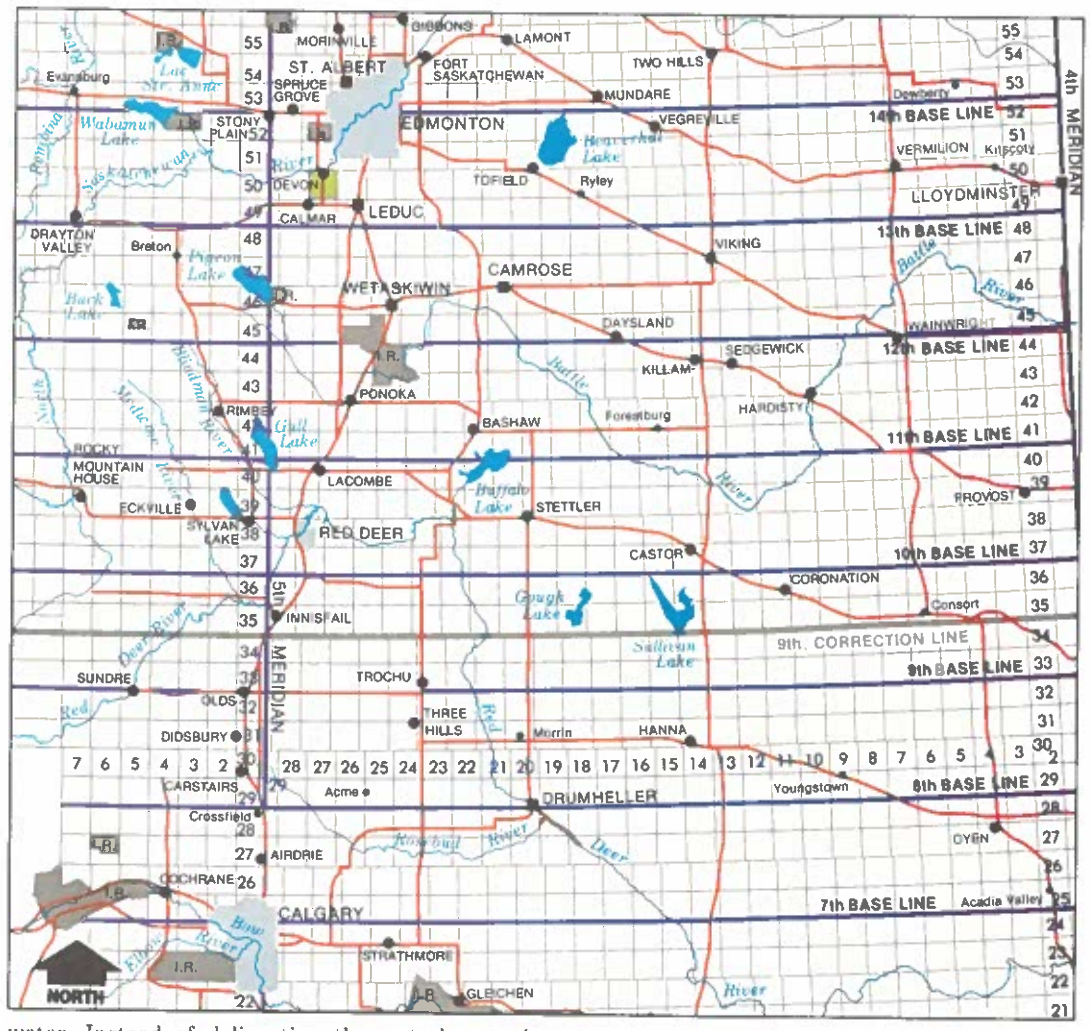
Meridians and base lines, therefore, formed a large-scale grid. Using these as reference, surveyors laid out hundreds of additional parallel lines, blanketing the province with 36-square-mile units known as "townships."

The accompanying map illustrates the township system. Moving south to north, "township" lines are numbered. (Note that township row 29 is also the eighth base line.) Cutting across the township rows are "ranges," parallelling the meridians. Ranges move numerically from east to west, with the sequence beginning again at 1 as each meridian is crossed. Every individual township is bounded by two range lines and two township lines. Range and township lines are shown ——.

Between the base lines, the ranges jog westward a little. This compensates for the error inherent in laying out a grid on the earth's curvature. (This error factor is due to the meridians' drawing closer as they move towards the North Pole, where all lines of longitude converge in a single point.) Along the U.S. border, 30 ranges lie between the fourth and fifth meridians. In the north, that figure has been stepped down to 24.

An individual township is divided into 36 "sections," each a square mile (see below). The other diagram below shows the pattern of subdivision identification, within any section. Note that the numbers increase east to west, south to north like the township rows and ranges.

A section in turn is made up of quarter sections, identified as northeast, southeast, northwest and southwest. Alternatively a section may be carved into 16 legal subdivisions, with the numbers running back and forth from the southeast corner. The finer legal subdivision grid was useful to surveyors in need of a rough, quick method of identifying bodies of water. Instead of delineating the water's actual boundary, the surveyor would simply identify a legal subdivision or approximate fraction as being water.



The DLS ensured access by providing road allowances. An Alberta motorist driving east or west will encounter a "section road" every mile. Moving north or south, road allowances appear every second mile. Occasionally local geography will force the second pattern to skip a beat and a "forced road" has been built along the "blind line" where normally no route would exist. Old section roads were often incorporated into the urban network, as with Calgary's 17th Avenue S.W.

In areas settled before the DLS, such as St. Albert, Fort McMurray and Edmonton, the township grid ran up to existing property lines. Typically these earlier boundaries reflect the long, narrow riverfront lots popular with the Metis.

Later towns were often laid out by a railway company; names like Grand Trunk Pacific are still preserved in Alberta legal titles. The urban system of land identification did not replace the DLS usages but rather built on top of the earlier pattern with the quarter-section grid being formed into convenient subdivisions. Developers file legal "plans" with municipal and provincial agencies. On a plan, a subdivision is split into clearly defined "blocks" and blocks into numbered "lots."

The following example illustrates the system:

LOT TWELVE (12)
IN BLOCK TWENTY-FOUR (24)
PLAN 720 H.W.
DEVON (N.W. 34-50-26-W.4TH)

This title identifies the property as lot 12 in block 24 as laid out on a permanent plan filed and numbered by the North Alberta Land Registration District. Devon is an incorporated town southwest of Edmonton. The land is further identified under the DLS system as situated in the northwest quarter of section 34, north of township line 50 and west of range 26, a range lying west of the fourth meridian. It is shown on the map in green.

31	32	33	34	35	36

Provincial electoral constituencies

The province is divided into 79 constituencies from which the provincial legislators are elected. The map of Alberta depicts the constituency boundaries throughout the province except in the two major cities. Constituencies in Calgary and Edmonton are shown separately.

Edmonton

Calgary
